# Introduction

National Australia Bank Limited (NAB) is an authorised deposit-taking institution (ADI) subject to regulation by the Australian Prudential Regulation Authority (APRA) under the authority of the *Banking Act 1959* (Cth). This document has been prepared in accordance with APRA Prudential Standard APS 330 *Public Disclosure*, which requires disclosure of key prudential information to the market to contribute to the transparency of financial markets and to enhance market discipline.

This document has also been prepared in accordance with the Group External Reporting Policy, which has been adopted by the Board to assist in discharging its oversight of the integrity of external reporting. The Group External Reporting Policy sets out the approach the Group, being NAB and its controlled entities, takes to managing compliance with APS 330, as well as other Australian statutory and regulatory external reporting obligations.

This is the first disclosure prepared under the revised APS 330 which took effect on 1 January 2025. The revised APS 330 requires prudential disclosures to be made as set out in the standard made by the Basel Committee on Banking Supervision (BCBS) titled *Disclosure Requirements*, as exists from time to time, subject to modifications made by APRA specified in Attachment A of APS 330.

While the BCBS *Disclosure Requirements* standard requires limited comparative period disclosures, it is NAB's intention to generally provide comparative period disclosures to enhance the useability of this report. The reporting frequency, as set out in the disclosure requirements index, drives the comparative period to accompany the current period disclosure. Comparative period disclosures have been provided where practicable in this first disclosure since the revised APS 330 took effect.

Amounts are presented in Australian dollars unless otherwise stated, and have been rounded to the nearest million dollars (\$m) except where indicated.

Quantitative information contained in this document is available in Microsoft Excel format at [nab.com.au/about-us/shareholder-centre/regulatory-disclosures](http://nab.com.au/about-us/shareholder-centre/regulatory-disclosures).

## Capital adequacy methodologies

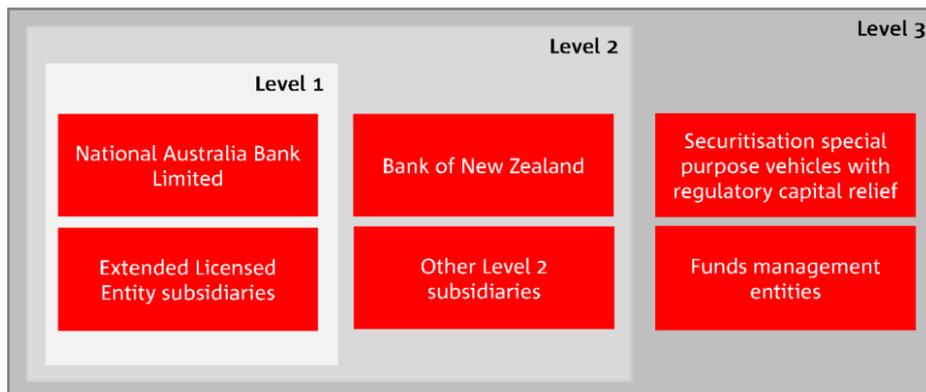

The Group uses the following approaches to measure capital adequacy.

Credit risk	Operational risk	Non-traded market risk	Traded market risk
Internal ratings-based (IRB) approach <sup>(1)</sup>	Standardised measurement approach (SMA)	Internal model approach (IMA)	Internal model approach (IMA) and standard method

(1) The Group has received IRB accreditation from APRA and applies the advanced IRB (A-IRB), foundation IRB (F-IRB), supervisory slotting and standardised approaches to different portfolios. Risk-weighted assets (RWA) and expected loss for the Group's banking subsidiary regulated by the Reserve Bank of New Zealand (RBNZ), Bank of New Zealand (BNZ), are calculated using RBNZ prudential requirements, with the exception of scaling factors which are applied under APRA requirements. BNZ has received internal ratings-based accreditation from the RBNZ and applies the internal ratings-based approach, supervisory slotting approach and standardised approach to different portfolios.

## Scope of application

APRA measures the Group's capital adequacy by assessing financial strength at three levels as illustrated below.

Level 1 comprises NAB and its subsidiaries that have been approved by APRA as part of its Extended Licensed Entity.

Level 2 comprises NAB and the entities it controls, excluding securitisation special purpose vehicles to which assets have been transferred in accordance with the requirements for regulatory capital relief in APS 120 *Securitisation* and funds management entities. Level 2 controlled entities include BNZ, National Australia Bank Europe S.A. and other financial entities such as broking, wealth advisory and leasing companies.

Level 3 comprises the consolidation of NAB and all of its subsidiaries.

This report applies to the Level 2 Group, headed by NAB, unless otherwise stated.

For personal use only

### Regulatory reform

Key reforms that may affect the Group's capital and liquidity include:

#### Increased loss-absorbing capacity for ADIs

Under their loss-absorbing capacity framework, APRA has required domestic systemically important banks (D-SIBs) to hold incremental Total capital equal to 3% of RWA since 1 January 2024. The requirement increases by 1.5% (to a total of 4.5%) of RWA on 1 January 2026. The 3% of RWA Total capital requirement has been met.

#### Additional Tier 1 capital changes

In December 2024, APRA confirmed it will phase out the use of Additional Tier 1 capital from 1 January 2027. Under APRA's approach, large, internationally active banks including NAB will replace 1.5% Additional Tier 1 capital with 0.25% Common Equity Tier 1 (CET1) capital and 1.25% Tier 2 capital. Until 2032, existing Additional Tier 1 capital instruments will be eligible to be included as Tier 2 capital until an instrument's first call date. This change is intended to ensure that the capital strength of the Australian banking system operates more effectively in a stress scenario. APRA plans to finalise amendments to prudential standards to reflect the change by the end of 2025.

#### Revisions to the capital framework

APRA's revisions to APS 117 *Capital Adequacy: Interest Rate Risk in the Banking Book* will come into effect on 1 October 2025. Internal models used in the calculation of IRRBB capital will require re-accreditation by APRA.

APRA expects Australian banks to continue building preparedness for the BCBS' Fundamental Review of the Trading Book regulatory standards ahead of the release of draft standards. There is no timeline provided for when these draft standards will be released.

#### Reserve Bank of New Zealand capital review

In December 2019, the RBNZ finalised its review of the capital adequacy framework. The RBNZ amendments included an increase in the Tier 1 capital requirement to 16% of RWA, and an increase in the Total capital requirement to 18% of RWA, to be phased in by 2028.

In March 2025, the RBNZ announced its intention to conduct a review of key capital settings.

#### Liquidity requirements

APRA will conduct a comprehensive review of APS 210 *Liquidity*, with industry engagement expected to commence this calendar year.

# Overview of key metrics and RWA

## KM1: Key metrics

The following table provides an overview of prudential regulatory metrics as at 31 March 2025 and for the four previous quarter-end periods.

Commentary on significant changes in these metrics is in the relevant sections of this report.

		31 Mar 25	31 Dec 24	As at 30 Sep 24	30 Jun 24	31 Mar 24
<b>Available capital (amounts)</b>						
1	CET1	51,236	49,977	51,139	53,686	52,543
2	Tier 1	60,826	59,567	60,728	63,276	61,133
3	Total capital	89,622	86,823	86,602	89,696	87,667
<b>RWA (amounts)</b>						
4	Total RWA	426,445	429,128	413,946	425,543	432,553
4a	Total RWA (pre-floor) <sup>(1)</sup>	425,189	429,128	413,946	425,543	432,553
<b>Risk-based capital ratios as a percentage of RWA (Level 2 Group)</b>						
5	CET1 capital ratio (%)	12.01	11.65	12.35	12.62	12.15
5b	CET1 capital ratio (%) (pre-floor ratio) <sup>(1)</sup>	12.05	11.65	12.35	12.62	12.15
6	Tier 1 capital ratio (%)	14.26	13.88	14.67	14.87	14.13
6b	Tier 1 capital ratio (%) (pre-floor ratio) <sup>(1)</sup>	14.31	13.88	14.67	14.87	14.13
7	Total capital ratio (%)	21.02	20.23	20.92	21.08	20.27
7b	Total capital ratio (%) (pre-floor ratio) <sup>(1)</sup>	21.08	20.23	20.92	21.08	20.27
<b>Risk-based capital ratios as a percentage of RWA (Level 1 Group)</b>						
-	CET1 capital ratio (%)	11.84	11.42	12.08	12.54	11.85
-	Tier 1 capital ratio (%)	14.33	13.89	14.65	15.03	14.05
-	Total capital ratio (%)	21.74	20.81	21.49	21.80	20.76
<b>Additional CET1 buffer requirements as a percentage of RWA</b>						
8	Capital conservation buffer requirement (%)	4.75	4.75	4.75	4.75	4.75
9	Countercyclical capital buffer requirement (%)	0.85	0.85	0.85	0.85	0.84
10	Bank global systemically important bank (G-SIB) and/or D-SIB additional requirements (%)	-	-	-	-	-
11	Total of bank CET1 specific buffer requirements (%) (row 8 + row 9 + row 10)	5.60	5.60	5.60	5.60	5.59
12	CET1 available after meeting the bank's minimum capital requirements (%) <sup>(2)</sup>	7.51	7.15	7.85	8.12	7.65
<b>Leverage ratio</b>						
13	Total leverage ratio exposure measure	1,210,737	1,231,826	1,191,855	1,188,241	1,198,406
14c	Leverage ratio (%) (including the impact of any applicable temporary exemption of central bank reserves) incorporating mean values for securities financing transaction (SFT) assets	5.02	4.84	5.10	5.33	5.10
<b>Liquidity coverage ratio (LCR)</b>						
15	Total high-quality liquid assets (HQLA) <sup>(3)</sup>	212,309	213,659	214,662	207,855	207,086
16	Total net cash outflows <sup>(3)</sup>	152,496	154,236	156,717	151,357	149,313
17	LCR (%) <sup>(3)</sup>	139	139	137	137	139
<b>Net stable funding ratio (NSFR)</b>						
18	Total available stable funding (ASF)	703,467	695,170	677,657	673,113	671,023
19	Total required stable funding (RSF)	592,468	589,750	577,568	579,086	568,002
20	NSFR (%)	119	118	117	116	118

(1) The capital floor applies at the aggregate RWA level and requires IRB ADIs to apply the higher of RWA prior to application of the floor modelled under approval from APRA and 72.5% of RWA calculated under the full standardised approach.

(2) CET1 capital less the ratio of RWA of any CET1 capital used to meet minimum CET1, Tier 1 and Total capital requirements of 4.5%, 6% and 8%, respectively, as outlined in APS 110 *Capital Adequacy* paragraph 24.

(3) Simple average of daily outcomes, excluding non-business days, during the quarter.

## Overview of key metrics and RWA (cont.)

### OV1: Overview of RWA

The following table provides RWA for each risk type and approach as at 31 March 2025 and for the two previous quarter-end periods.

#### March 2025 v September 2024

Total RWA increased by \$12.5 billion or 3.0%. The most significant driver was a \$9.2 billion or 2.8% increase in credit RWA (excluding counterparty credit risk), mainly due to lending growth, mostly in corporate (including small and medium-sized enterprises (SME)) and residential mortgages. In addition:

- There was a \$1.9 billion or 5.2% increase in operational risk RWA, following update of the business indicator component of operational risk capital as part of 31 December reporting following finalisation of the year-end financial report. Further detail is provided in Section 9 *Operational risk*.
- A floor adjustment of \$1.3 billion was applied as at 31 March 2025 following a 4.5% increase in RWA under the full standardised approach compared to a 2.7% increase in RWA prior to application of the floor. Refer to CMS1: *Comparison of modelled and standardised RWA at risk level* for further detail.

#### March 2025 v December 2024

Total RWA decreased by \$2.7 billion or 0.6%. A decrease in the exposure at default (EaD) for derivatives, in particular foreign exchange derivatives, was the main driver of both a \$2.1 billion or 14.7% decrease in RWA for counterparty credit risk and a \$1.7 billion or 27.7% decrease in RWA for the credit valuation adjustment. These decreases were partially offset by the application of a \$1.3 billion floor adjustment as at 31 March 2025.

		As at			
		31 Mar 25	31 Dec 24	30 Sep 24	31 Mar 25
		RWA	RWA	RWA	Minimum capital requirements <sup>(1)</sup>
		\$m	\$m	\$m	\$m
1	Credit risk (excluding counterparty credit risk (CCR))	338,419	338,184	329,177	27,153
2	of which: standardised approach (SA)	21,488	22,971	23,163	1,724
3	of which: F-IRB approach	34,749	34,953	33,091	2,788
4	of which: supervisory slotting approach	9,477	9,265	9,556	760
5	of which: A-IRB approach	272,705	270,995	263,367	21,881
6	Counterparty credit risk	11,953	14,015	11,291	960
7	of which: standardised approach for CCR	9,954	11,559	9,534	799
9	of which: other CCR <sup>(2)</sup>	1,999	2,456	1,757	161
10	Credit valuation adjustment	4,570	6,318	5,054	367
15	Settlement risk	-	-	-	-
16	Securitisation exposures in banking book	5,544	5,596	5,369	445
18	of which: securitisation external ratings-based approach (SEC-ERBA)	1,495	1,605	1,706	120
19	of which: securitisation supervisory formula approach	4,049	3,991	3,663	325
20	Market risk	12,094	12,863	11,427	970
21	of which: standard method	776	618	733	62
22	of which: IMA	11,318	12,245	10,694	908
24	Operational risk	37,985	37,985	36,102	3,048
-	Interest rate risk in the banking book	14,624	14,167	15,526	1,173
26	Output floor applied	72.5%	72.5%	72.5%	
27	Floor adjustment <sup>(3)</sup>	1,256	-	-	
<b>29</b>	<b>Total</b>	<b>426,445</b>	<b>429,128</b>	<b>413,946</b>	<b>34,116</b>

(1) The total is calculated as total RWA multiplied by the minimum prudential capital requirement for a Total capital ratio of 8.0% outlined in APS 110 paragraph 24, and is attributed to the RWA categories on a pro-rata basis.

(2) CCR not subject to the standardised approach comprises SFTs, BNZ derivatives under the current exposure method and central counterparty (CCP) margin and default fund contributions.

(3) The description of row 27 has been modified from that set out in the BCBS *Disclosure Requirements* standard as APRA's capital floor requirement does not have a transitional cap.

## Overview of key metrics and RWA (cont.)

### Overview of exposure at default and RWA by asset class

The table on the following page provides a summary of EaD and RWA by asset class. Amounts have been broken down into those subject to the credit risk and counterparty credit risk frameworks. The nature of exposures in each asset class is outlined below. This disclosure has been included in this report to provide a breakdown of total EaD, as EaD disclosures in the BCBS *Disclosure Requirements* standard are presented across a number of tables and not aggregated in a single disclosure.

Asset class	Description
<b>Subject to the A-IRB approach</b>	
Corporate (including SME)	Corporations, partnerships, proprietorships, public sector entities and any other credit exposure not elsewhere classified.
Retail SME	Non-complex exposures to small-business customers managed as part of a portfolio for risk management purposes where: <ul style="list-style-type: none"> <li>the consolidated annual revenue of the borrower is less than \$75 million, and</li> <li>the total small-business-related exposure to the borrower is less than \$1.5 million.</li> </ul>
Residential mortgage	Exposures that are partially or fully secured by residential properties, managed in a similar manner to other retail exposures, and not for business purposes. This excludes non-standard mortgages.
Qualifying revolving retail	Revolving exposures to individuals less than \$100,000, which are unsecured, unconditionally cancellable and are not for business purposes.
Other retail	Retail exposures other than residential mortgage and qualifying revolving retail, including personal loan products, overdrafts and overdrawn transaction account exposures.
<b>Subject to the F-IRB approach</b>	
Corporate	Corporations, partnerships, proprietorships and public sector entities with consolidated annual revenue greater than \$750 million.
Sovereign	<ul style="list-style-type: none"> <li>Australian and overseas central and subnational governments. A subnational government is a government of a geographically defined part of a state which has powers to raise revenue and borrow money.</li> <li>The Reserve Bank of Australia (RBA) and overseas central banks.</li> <li>Multilateral development banks or institutions eligible for a zero per cent risk-weight.</li> </ul>
Financial institution	Entities whose main business includes management of financial assets, lending, factoring, leasing, provision of credit enhancements, securitisation (excluding securitisation exposures subject to the requirements of APS 120), investments, financial custody, CCP services (excluding qualifying central counterparty (QCCP) exposures) and proprietary trading.
<b>Specialised lending</b>	Project finance exposures, in which revenues generated by a single project are both the primary source of repayment and security for the exposure.
<b>Subject to the standardised approach</b>	
Corporate (including SME)	Regulatory prescribed portfolios, such as QCCPs and margin lending, and corporate exposures in portfolios where the standardised approach is applied.
Residential mortgage	Non-standard mortgages and residential mortgages in portfolios where the standardised approach is applied, such as the Citi consumer business.
Other retail	Regulatory prescribed portfolios, such as margin lending, and other retail exposures in portfolios where the standardised approach is applied, such as the Citi consumer business.
Other	Cash items in the process of collection, investment in premises and other fixed assets, and all other exposures.
<b>RBNZ regulated banking subsidiary</b>	BNZ exposures calculated using RBNZ prudential requirements, with the exception of scaling factors which are applied under APRA requirements. APS 330 requires these exposures to be disclosed separately as an asset class.

## Overview of key metrics and RWA (cont.)

### CMS1: Comparison of modelled and standardised RWA at risk level

The following table provides a comparison at risk level of RWA prior to application of the floor modelled under approval from APRA, and RWA calculated under the full standardised approach.

March 2025 v September 2024

RWA prior to application of the floor increased by \$11.2 billion or 2.7% as outlined in OV1: *Overview of RWA*, whereas RWA under the full standardised approach increased by \$25.3 billion or 4.5%. These movements resulted in a floor adjustment of \$1.3 billion as at 31 March 2025.

The increase in RWA under the full standardised approach was \$14.1 billion more than the increase in pre-floor RWA, mainly related to credit RWA (excluding counterparty credit risk), which is broken down by asset class in CMS2: *Comparison of modelled and standardised RWA for credit risk at asset class level*.

Lending growth, mostly in corporate (including SME), resulted in a greater increase in full standardised credit RWA (excluding counterparty credit risk) compared to pre-floor RWA due to higher risk-weights under the standardised approach. In addition, data and methodology refinements resulted in an increase in credit RWA under the full standardised approach, while the release of certain RWA overlay adjustments resulted in a decrease in pre-floor RWA.

		As at 31 Mar 25			
		RWA for modelled approaches that have supervisory approval to be used	RWA for portfolios where standardised approaches are used	Pre-floor RWA	RWA calculated using full standardised approach

## Overview of key metrics and RWA (cont.)

### CMS2: Comparison of modelled and standardised RWA for credit risk at asset class level

The following table provides a comparison at asset class level of RWA for credit risk (excluding counterparty credit risk) modelled under approval from APRA and under the full standardised approach. The table provides a breakdown by asset class of amounts in row 1 of CMS1: *Comparison of modelled and standardised RWA at risk level*. Note that:

- Columns (a) and (b) represent RWA for exposures subject to the A-IRB, F-IRB and supervisory slotting approaches.
- Columns (c) and (d) also include RWA for exposures subject to the standardised approach.

# Capital

## 3.1 Composition of capital

### CC1: Composition of regulatory capital

The following table provides the breakdown of regulatory capital.

March 2025 v September 2024

CET1 capital increased by \$97 million or 0.2%. Retained profits (reflected in row 2) increased by \$865 million, mainly from statutory net profit attributable to owners of the Company, net of the final 2024 dividend. This was largely offset by a \$616 million decrease in contributed equity from the on-market buy-back and a \$177m increase in the deduction for other intangibles (reflected in row 9), mainly related to capitalised software. On 12 March 2025, the Group completed the on-market buy-back that was announced on 15 August 2023 and subsequently increased on 2 May 2024 to \$3.0 billion.

Additional Tier 1 capital was unchanged from 30 September 2024. Tier 2 capital (reflected in row 58) increased by \$2.9 billion or 11.3% due to new issuances and favorable foreign exchange translation impacts.

As outlined in OV1: *Overview of RWA*, RWA increased by \$12.5 billion or 3.0%

National RMBS Trust 2018-2	Securitisation	339	(1)
National RMBS Trust 2022-1	Securitisation	703	1
National RMBS Trust 2024-1	Securitisation	1,554	(4)

## 3.2 Countercyclical capital buffer

### CCyB1: Geographical distribution of credit exposures used in the calculation of the bank-specific countercyclical capital buffer requirement

The CCyB requirement is calculated as the weighted average of CCyB requirements that apply in jurisdictions in which private sector exposures are held.

The following table provides details of the geographical breakdown of the risk-weighted amount of private sector credit exposures relevant for the calculation of the CCyB, based on the jurisdiction of residence of the immediate counterparty.

March 2025 v September 2024

The CCyB requirement remained consistent at 0.85%. Whilst the risk-weighted amount of Australian private sector exposures increased by \$7.5 billion or 2.8%, this had minimal impact to the weighted average with the risk-weighted amount of Australian private sector exposures representing a similar proportion of the risk-weighted amount of total private sector exposures.

Geographical breakdown	As at 31 Mar 25				As at 30 Sep 24			
	CCyB rate	RWA used in the computation of the CCyB	Bank-specific CCyB rate	CCyB amount <sup>(1)</sup>	CCyB rate	RWA used in the computation of the CCyB	Bank-specific CCyB rate	CCyB amount <sup>(1)</sup>
	%	\$m	%	\$m	%	\$m	%	\$m
Australia	1.00	271,959			1.00	264,442		
France	1.00	1,930			1.00	1,215		
Germany	0.75	1,163			0.75	1,035		
Hong Kong	0.50	655			1.00	783		
Ireland	1.50	297			1.50	293		
Luxembourg	0.50	776			0.50	873		
Netherlands	2.00	1,115			2.00	1,347		
Norway	2.50	299			2.50	333		
Sweden	2.00	381			2.00	433		
United Kingdom	2.00	9,888			2.00	9,566		
Other	0.50 - 2.50	443			0.50 - 2.50	491		
<b>Sum<sup>(2)</sup></b>		<b>288,906</b>				<b>280,811</b>		
<b>Total<sup>(3)</sup></b>		<b>353,118</b>	<b>0.85</b>	<b>3,625</b>		<b>344,777</b>	<b>0.85</b>	<b>3,510</b>

(1) Amount of CET1 capital held to meet the CCyB requirement, computed as total RWA multiplied by the bank-specific CCyB rate.

(2) Sum of the risk-weighted amount of private sector credit exposures in jurisdictions with a non-zero CCyB rate.

(3) Total of the risk-weighted amount of private sector credit exposures across all jurisdictions, including jurisdictions with no CCyB rate or a CCyB rate set at zero.

For personal use only

## 3.3 Leverage ratio

The leverage ratio is a non-risk-based measure that uses exposures to supplement the RWA-based capital requirements. It is calculated in accordance with APS 110.

### LR1: Summary comparison of accounting assets vs leverage ratio exposure measure

The following table provides a reconciliation of total assets for the Group with the leverage ratio exposure measure.

Key differences between total assets for the Group, as reported in the financial statements, and amounts included in the leverage ratio exposure measure are:

- the inclusion of off-balance sheet credit commitments using prescribed credit conversion factors in leverage ratio exposures,
- SFT exposures in the leverage ratio being based on the average of month-end balances during the quarter, compared to the amount as at the reporting date in the balance sheet, and the inclusion of additional counterparty credit risk measures in the leverage ratio exposure measure, and
- measurement of derivative exposures under the modified standardised approach for measuring counterparty credit risk exposures (SA-CCR) for the purposes of the leverage ratio, compared to the measurement of derivative assets and collateral balances under accounting standards and interpretations issued by the Australian Accounting Standards Board.

		As at	
		31 Mar 25	30 Sep 24
		\$m	\$m
1	Total consolidated assets as per published financial statements	1,095,639	1,080,248
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	29	25
3	Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference	(2,849)	(3,190)
7	Adjustments for eligible cash pooling transactions	-	-
8	Adjustments for derivative financial instruments	4,941	362
9	Adjustment for SFTs (i.e. repurchase agreements and similar secured lending)	476	2,946
10	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)	123,202	121,905
11	Adjustments for prudent valuation adjustments and provisions which have reduced Tier 1 capital	-	-
12	Other adjustments	(10,701)	(10,441)
<b>13</b>	<b>Leverage ratio exposure measure</b>	<b>1,210,737</b>	<b>1,191,855</b>

### LR2: Leverage ratio common disclosure template

The leverage ratio calculation is presented on the following page.

All amounts in the leverage ratio calculation are measured as at the reporting date, with the exception of SFT exposures, which are based on a simple average of month-end balances during the quarter.

#### March 2025 v September 2024

The leverage ratio decreased by 8 basis points, mainly due to an \$18.9 billion or 1.6% increase in total exposures. SFT exposures increased by \$11.9 billion from increased reverse repurchase agreement activity. In addition, on-balance sheet exposures increased by \$5.9 billion, mainly related to increases in loans and advances and debt securities, partially offset by decreases in deposits with central banks. Although total derivative exposures were largely unchanged, the notional amount of written credit derivatives reduced due to trade compression (reflected in row 11), which was offset by corresponding reductions to notional amounts of purchased credit protection (reflected in row 12).

#### March 2025 v December 2024

The leverage ratio increased by 18 basis points, from both a \$1.3 billion or 2.1% increase in Tier 1 capital and a \$21.1 billion or 1.7% decrease in total exposures. The increase in Tier 1 capital was mainly due to an increase in retained profits, partially offset by a decrease in contributed equity from the on-market buy-back. The decrease in on-balance sheet exposures of \$13.7 billion was the most significant driver of the decrease in total exposures, mainly related to decreases in deposits with central banks, partially offset by increases in loans and advances and debt securities. In addition, derivative exposures decreased by \$9.3 billion, in particular foreign exchange derivatives.

(1) The provision for credit impairment attributed to on- and off-balance sheet exposures is required to be disclosed separately under the revised APS 330. This differs from presentation in the September 2024 Pillar 3 Report where this amount formed part of on-balance sheet exposures.

(2) SFT exposures are the average of month-end balances during the quarter.

# Links between financial statements and regulatory exposures

## LI1: Differences between accounting and regulatory scopes of consolidation and mapping of financial statement categories with regulatory risk categories

The following disclosure shows how the carrying value of assets and liabilities reported in the Group's balance sheet correspond to regulatory risk categories for exposures other than off-balance sheet items. Where an exposure attracts capital charges according to more than one risk category framework, the carrying value is reported in all columns that attract a capital charge, such that the sum of amounts in columns (c) to (g) does not equal to column (b). This is the case for derivatives, repurchase agreements and collateral associated with these products.

CC2: *Reconciliation of regulatory capital to balance sheet* expands on the differences between the scope of accounting consolidation and regulatory consolidation shown in columns (a) and (b).

This annual template has been included in this report to facilitate understanding of how carrying values in other disclosures, in particular in the credit risk section, correspond to amounts on the Group's balance sheet.

# Credit risk

This section excludes credit risk information in respect of exposures subject to a counterparty credit risk charge within the scope of APS 180 *Capital Adequacy: Counterparty Credit Risk* and securitisation exposures within the scope of APS 120, which have separate disclosures in Section 6 *Counterparty credit risk* and Section 7 *Securitisation*, respectively.

## 5.1 General information about credit risk

### CR1: Credit quality of assets

The following table provides information on the credit quality of assets and off-balance sheet exposures.

The gross carrying value of loans and debt securities in column (a) is the accounting value of these assets before the provision for credit impairment. The gross carrying value of off-balance sheet exposures in column (a) is the amount that has been committed to be lent, and the maximum amount that could be paid under guarantees granted, before the provision for credit impairment. As APRA requirements include arrangements that can be unconditionally cancelled by the ADI as commitments, off-balance sheet exposures for the Level 2 Group include revocable loan commitments.

The amounts in columns (d)/(e) and (f) show the total provision for credit impairment in column (c) held against exposures under the standardised and IRB approaches.

March 2025 v September 2024

Non-performing exposures increased by \$1,031 million or 10.1%. This mainly reflects broad-based deterioration in the Business and Private Banking business lending portfolio, and to a lesser extent, higher arrears for the Australian mortgage portfolio.

## General information about credit risk (cont.)

### Exposure at default, non-performing exposures and related provisions by industry

The following table provides a breakdown by industry, based on ANZSIC Level 1 classifications, of:

- EaD subject to the credit risk and counterparty credit risk frameworks, which excludes securitisation exposures subject to the requirements of APS 120,
- non-performing exposures, and
- the provision for credit impairment for non-performing exposures, including the provision for non-performing exposures which are individually assessed.

This information forms part of the annual template CRB: *Additional disclosure related to credit quality of assets*, which has been included in this report as additional information.

Industry sector	As at 31 Mar 25			
	EaD post-CCF and post-CRM	Non-performing exposures	Provision for non-performing exposures <sup>(1)</sup>	Of which individually assessed provision for credit impairment
	\$m	\$m	\$m	\$m
Accommodation and hospitality	13,382	234	66	21
Agriculture, forestry, fishing and mining	68,684	1,267	227	100
Business services and property services	25,011	493	166	113

Total provision for credit impairment

5,921

(1) Provision for non-performing exposures represents Stage 3 expected credit losses, which are individually and collectively assessed.

(2) Other includes health and community services, and education.

(3) Provision for performing exposures represents Stage 1 and Stage 2 expected credit losses, which are collectively assessed.

### CR2: Changes in stock of non-performing loans and debt securities

The following table provides details of the movement in non-performing exposures, including off-balance sheet exposures, over the reporting period.

	6 months ended	
	31 Mar 25	30 Sep 24
	\$m	\$m
<b>1 Non-performing loans and debt securities at end of the previous reporting period</b>	<b>10,230</b>	<b>8,691</b>
2 Loans and debt securities that have defaulted since the last reporting period	4,383	4,270
3 Returned to performing status	(1,723)	(1,551)
4 Amounts written off	(251)	(273)
5 Other changes <sup>(1)</sup>	(1,378)	(907)
<b>6 Non-performing loans and debt securities at end of the reporting period</b>	<b>11,261</b>	<b>10,230</b>

(1) Non-performing exposures that have been repaid, and other exposure changes.

For personal use only

## 5.2 Credit risk mitigation

### CR3: Credit risk mitigation techniques – overview

The following table provides details of credit risk mitigation based on the carrying value of loans and advances and debt securities. Amounts are net of the provision for credit impairment, with non-performing exposures in row 4 net of Stage 3 expected credit losses.

The carrying value in column (a) is exposures that do not benefit from credit risk mitigation. This includes fully unsecured exposures and the unsecured portion of partially secured exposures.

The carrying value in column (b) is exposures that have at least one credit risk mitigation mechanism, excluding any over collateralisation. This includes the secured portion of partially secured exposures.

The carrying value of secured exposures in column (b) is broken down by nature of the credit risk mitigation in columns (c), (d) and (e). The carrying value of exposures secured by collateral in column (c) is based on bank extended value, which is calculated at a discount to market value based on the nature of the underlying security.

		As at 31 Mar 25				
		<i>a</i>	<i>b</i>	<i>c</i>	<i>d</i>	<i>e</i>
		Carrying value of:				
		Exposures unsecured	Exposures to be secured	Exposures secured by collateral	Exposures secured by financial guarantees	Exposures secured by credit derivatives
		\$m	\$m	\$m	\$m	\$m
1	Loans	75,327	649,210	647,536	1,674	-
2	Debt securities	73,780	5,087	5,087	-	-
<b>3</b>	<b>Total</b>	<b>149,107</b>	<b>654,297</b>	<b>652,623</b>	<b>1,674</b>	<b>-</b>
4	of which: non-performing	245	8,446	8,446	-	-

## 5.3 Credit risk under standardised approach

Asset classes for the Level 2 Group excluding BNZ have been determined with reference to APS 112 *Capital Adequacy: Standardised Approach to Credit Risk*, as required by APS 330.

### CR4: Standardised approach – credit risk exposure and credit risk mitigation effects

The following table provides details of EaD and RWA for exposures subject to the standardised approach. It presents on- and off-balance sheet EaD before CCF and CRM in columns (a) and (b), and after CCF and CRM in columns (c) and (d). RWA density in column (f) is RWA over EaD after CCF and CRM.

EaD post-CCF and post-CRM is derived by applying relevant CCFs to committed but undrawn exposures. The value of this on-balance sheet equivalent amount is reduced by any provisions for non-performing exposures before credit risk mitigation is taken into account.

March 2025 v September 2024

Credit RWA under the standardised approach decreased by \$1.7 billion or 7.2% mainly due to the application of a lower risk-weight to certain corporate SME exposures. Refer to CR5: *Standardised approach – exposures by asset classes and risk-weights* for further detail of standardised exposures by risk-weight and risk-weight bands.

Asset classes	As at 31 Mar 25											
	a		b		c		d		e		f	
	EaD pre-CCF and pre-CRM		EaD post-CCF and post-CRM		RWA		RWA density					
	On-balance sheet	Off-balance sheet	On-balance sheet	Off-balance sheet								
	\$m	\$m	\$m	\$m	\$m	\$m	%					
Corporate (including SME)	6,384	6,930	6,330	2,477	6,351	72%						
Residential mortgage	6,011	1,585	6,002	636	2,826	43%						
Other retail	5,215	8,681	5,188	3,288	6,009	71%						
Other <sup>(1)</sup>	5,350	-	5,350	-	4,117	77%						
RBNZ regulated banking subsidiary	13,906	1,037	13,492	550	2,185	16%						
<b>Total</b>	<b>36,866</b>	<b>18,233</b>	<b>36,362</b>	<b>6,951</b>	<b>21,488</b>	<b>50%</b>						

(1) Consists of cash items in the process of collection, investment in premises and other fixed assets, and all other exposures.

### CR5: Standardised approach – exposures by asset classes and risk-weights

#### CR5(i): Standardised approach – exposure at default by asset class and risk-weight

The following table provides a breakdown of credit risk exposures subject to the standardised approach by asset class and risk-weight.

Risk-weight	As at 31 Mar 25													EaD post-CCF and post-CRM \$m
	0%	20%	25%	30%	35%	40%	45%	50%	75%	85%	100%	110%	Other	
Asset classes	\$m	\$m	\$m	\$m	\$m	\$m	\$m	\$m	\$m	\$m	\$m	\$m	\$m	\$m
Corporate (including SME)	-	2,152	-	-	-	-	-	-	18	5,625	102	852	58	8,807
Residential mortgage	-	667	1,179	1,321	840	767	667	158	-	20	772	17	230	6,638
Other retail	-	1,139	-	-	-	-	-	-	6,373	-	890	-	74	8,476
Other <sup>(1)</sup>	1,009	353	-	-	-	-	-	-	-	-	3,949	-	39	5,350
RBNZ regulated banking subsidiary	8,359	3,888	-	-	-	1	-	772	-	-	1,022	-	-	14,042
<b>Total</b>	<b>9,368</b>	<b>8,199</b>	<b>1,179</b>	<b>1,321</b>	<b>840</b>	<b>768</b>	<b>667</b>	<b>930</b>	<b>6,391</b>	<b>5,645</b>	<b>6,735</b>	<b>869</b>	<b>401</b>	<b>43,313</b>

(1) Consists of cash items in the process of collection, investment in premises and other fixed assets, and all other exposures.

## Credit risk under standardised approach (cont.)

### CR5(ii): Standardised approach – exposure at default by risk-weight band

The following table provides a breakdown of on- and off-balance sheet credit risk exposures subject to the standardised approach by risk-weight band.

		As at 31 Mar 25			
Risk-weight		On-balance sheet EaD (pre-CRM)	Off-balance sheet EaD (pre-CCF and pre-CRM)	Weighted average CCF <sup>(1)</sup>	EaD post-CCF and post-CRM
		\$m	\$m	%	\$m
1	Less than 40%	19,419	6,600	23%	20,907
2	40 - 70%	2,192	622	45%	2,469
3	75%	3,559	7,082	40%	6,391
4	85% <sup>(2)</sup>	4,473	2,504	47%	5,653
5	90 - 100%	6,500	658	36%	6,739
6	105 - 130%	533	743	57%	960
7	150%	151	24	15%	155
8	250%	39	-	-	39
<b>11</b>	<b>Total</b>	<b>36,866</b>	<b>18,233</b>	<b>35%</b>	<b>43,313</b>

(1) Weighting is based on off-balance sheet exposure (pre-CCF).

(2) Row 4 includes exposures with an 80% risk-weight.

For personal use only

## 5.4 Credit risk under internal-based approaches

### CR6: IRB – credit risk exposures by portfolio and probability of default range

In the tables below of credit risk exposures by asset class and probability of default (PD) band:

- The number of borrowers in column (f) is based on:
  - the number of counterparties within each asset class for the corporate (including SME), retail SME, sovereign and financial institution asset classes,
  - the number of agreements within each asset class for the residential mortgage, qualifying revolving retail and other retail asset classes, and
  - the number of counterparties or agreements following the approach outlined above for BNZ's underlying asset classes for the RBNZ regulated banking subsidiary's number of borrowers.
- Average maturity in column (h) is only disclosed for asset classes where it is used for the RWA calculation, consistent with the disclosure template prescribed by APS 330.
- RWA in column (i) and RWA density in column (j) exclude RWA overlay adjustments.
- Provision for credit impairment in column (l) represents the total provision for credit impairment, and is disclosed for each asset class and not by PD band, consistent with the disclosure template prescribed by APS 330.

### Credit risk exposures subject to the A-IRB approach by asset class and PD band

The following table provides key parameters used in the calculation of capital requirements for credit risk exposures under the A-IRB approach by asset class and PD band.

## Credit risk under internal-based approaches (cont.)

### CR8: RWA flow statements of credit risk exposures under IRB

The following table attributes the change in total credit RWA over the quarter to key drivers, where:

- column (a) aligns to the requirements of CR8 in the BCBS *Disclosure Requirements* standard, and attributes the change in RWA for credit risk exposures subject to the A-IRB and F-IRB approaches to key drivers, and
- column (b) attributes the change in other credit RWA, including credit risk exposures under the supervisory slotting and standardised approaches, and RWA for counterparty credit risk and securitisation exposures to key drivers.

Total credit RWA in column (c) aligns to that shown in the *Overview of exposure at default and RWA by asset class* disclosure in Section 2 *Overview of key metrics and RWA*.

#### March 2025 v December 2024

RWA for credit risk exposures subject to the A-IRB and F-IRB approaches increased by \$1.5 billion or 0.5% in the three months to 31 March 2025 from lending growth, mostly in corporate (including SME) and residential mortgages (reflected in row 2). This was partially offset by the release of certain RWA overlay adjustments (reflected in row 4), and changes in asset quality and portfolio mix, including data refinements (reflected in row 3).

Other credit RWA decreased by \$5.1 billion or 8.8% in the three months to March 2025, mostly due to:

- a decrease in the EaD for derivatives, in particular foreign exchange derivatives (reflected in row 8), and
- the release of an RWA overlay adjustment for exposures under the standardised approach (reflected in row 4).

		3 months ended 31 Mar 25		
		a	b	c
		RWA under A-IRB and F-IRB approaches	Other credit RWA	Total credit RWA
		\$m	\$m	\$m
1	<b>RWA as at end of previous reporting period</b>	305,948	58,165	364,113
2	Asset size <sup>(1)</sup>	2,957	276	3,233
3	Asset quality <sup>(2)</sup>	(641)	(382)	(1,023)
4	Model updates	(1,093)	(1,409)	(2,502)
5	Methodology and policy	-	-	-
7	Foreign exchange movements	283	163	446
8	Other <sup>(3)</sup>		(3,781)	(3,781)
9	<b>RWA as at end of reporting period</b>	<b>307,454</b>	<b>53,032</b>	<b>360,486</b>

(1) Change in RWA attributed to changes in exposure size, including origination of new exposures and maturing exposures, and excluding changes related to acquisitions and disposals.

(2) Change in RWA attributed to the assessed quality of assets due to changes in borrower risk. This includes change in RWA related to portfolio mix at the end of the reporting period compared to the beginning of the reporting period.

(3) Other comprises the change in RWA for counterparty credit risk exposures (including credit valuation adjustment), excluding foreign exchange movements, which is not readily attributable to individual drivers.

## Credit risk under internal-based approaches (cont.)

### CR10: IRB - specialised lending under the slotting approach

#### Supervisory slotting portfolios

The following table provides specialised lending exposures subject to supervisory slotting by risk-weight.

Risk-weights in column (c) exclude APRA's 1.1 scaling factor for specialised lending exposures of the RBNZ regulated banking subsidiary, whereas RWA in column (g) is after application of this scaling factor.

March 2025 v September 2024

Credit RWA under the slotting approach increased by \$564 million or 6.3% mainly due to an increase in project finance and BNZ income-producing real estate exposures in the slotting category of strong.

Regulatory category	As at 31 Mar 25							
	<i>a</i>	<i>b</i>	<i>c</i>	<i>d</i>		<i>f</i>	<i>g</i>	<i>h</i>
	On- balance sheet EaD	Off- balance sheet EaD pre- CCF	Risk- weight	EaD post-CCF and post-CRM		Total	RWA	Expected loss
	\$m	\$m	%	Project finance	RBNZ regulated banking subsidiary	\$m	\$m	\$m
Strong	3,371	1,763	70%	3,219	1,546	4,765	3,444	19
Good	4,688	614	90%	707	4,287	4,994	4,880	40
Satisfactory	536	127	115%	29	533	562	708	16
Weak	157	9	250%	4	158	162	445	13
Default <sup>(1)</sup>	36	-	n/a	17	19	36	-	18
<b>Total</b>	<b>8,788</b>	<b>2,513</b>		<b>3,976</b>	<b>6,543</b>	<b>10,519</b>	<b>9,477</b>	<b>106</b>

(1) RWA for non-performing exposures is zero under the supervisory slotting approach.

For personal use only

# Counterparty credit risk

Counterparty credit risk is the risk that the counterparty to a transaction could default before the final settlement of the transaction's cash flows. An economic loss would occur if the transaction or portfolio of transactions with the counterparty has a positive economic value at the time of default.

Counterparty credit risk requirements set out in APS 180 are applied to derivative transactions, long settlement transactions and SFTs held in both the banking and trading book.

## CCR1: Analysis of CCR exposures by approach

The following table provides the capital requirement for counterparty credit risk exposures by approach, including components of EaD. This table excludes exposures cleared through CCPs, which are disclosed separately in CCR8: *Exposures to central counterparties*.

		As at 31 Mar 25				
		Replacement cost	Potential future exposure	Alpha used for computing regulatory EaD	EaD post-CRM	RWA
		\$m	\$m		\$m	\$m
1	SA-CCR (for derivatives) <sup>(1)</sup>	7,353	10,230	1.4	24,529	9,879
-	Current exposure method (for derivatives) <sup>(2)</sup>				1,485	701
4	Comprehensive approach for CRM (for SFTs)				8,304	1,014
<b>6</b>	<b>Total</b>				<b>34,318</b>	<b>11,594</b>

(1) SA-CCR is used under APRA requirements to measure the EaD of derivatives for the Level 2 Group excluding BNZ.

(2) Current exposure method is used under RBNZ requirements to measure the EaD of derivatives for BNZ.

## CCR3: Standardised approach – CCR exposures by regulatory portfolio and risk-weights

The following table provides a breakdown of counterparty credit risk exposures subject to the standardised approach by asset class and risk-weight. This table excludes exposures cleared through CCPs, which are disclosed separately in CCR8: *Exposures to central counterparties*.

		As at 31 Mar 25					
Risk-weight		0%	20%	50%	85%	Other	EaD post-CRM
Asset class		\$m	\$m	\$m	\$m	\$m	\$m
Corporate (including SME)		-	24	-	73	1	98
RBNZ regulated banking subsidiary		1,606	224	35	-	-	1,865
<b>Total</b>		<b>1,606</b>	<b>248</b>	<b>35</b>	<b>73</b>	<b>1</b>	<b>1,963</b>

For personal use only

## Counterparty credit risk (cont.)

### CCR4: IRB – CCR exposures by portfolio and probability of default scale

The tables below of counterparty credit risk exposures by PD band exclude exposures cleared through CCPs, which are disclosed separately in CCR8: *Exposures to central counterparties*.

#### Counterparty credit risk exposures subject to the A-IRB approach by asset class and PD band

The following table provides key parameters used in the calculation of capital requirements for counterparty credit risk exposures under the A-IRB approach by asset class and PD band.

### CCR5: Composition of collateral for CCR exposures

The following table provides details of collateral received and posted to reduce or support counterparty credit risk exposures related to derivative transactions and SFTs, including transactions cleared through CCPs. In the disclosure of collateral for counterparty credit risk exposures:

- Only collateral that impacts the calculation of EaD is included. Amounts reflect the fair value of collateral received and posted and are reported after considering any applicable haircuts. Application of a haircut has the effect of reducing the fair value of collateral received and increasing the value of collateral posted.
- Segregated collateral in derivative transactions refers to collateral which is held in a bankruptcy-remote manner.

	As at 31 Mar 25					
	Collateral used in derivative transactions				Collateral used in SFTs	
	Fair value of collateral received		Fair value of collateral posted		Fair value of collateral received	Fair value of collateral posted
	Segregated	Unsegregated	Segregated	Unsegregated

# Securitisation

SEC1: *Securitisation exposures in the banking book* and SEC2: *Securitisation exposures in the trading book* provide a comprehensive view of the Level 2 Group's securitisation activities, and include securitisation exposures of the RBNZ regulated banking subsidiary that are subject to RBNZ's credit risk framework. Securitisation exposures of the RBNZ regulated banking subsidiary are also disclosed in the credit risk and counterparty credit risk sections of this report, as applicable.

In contrast, securitisation exposures and associated regulatory capital requirements in SEC3 and SEC4 provide those securitisation exposures within the scope of APS 120.

In these disclosures:

- Bank acts as originator refers to where the Group originates underlying exposures in the pool, is the managing ADI for the securitisation or provides a facility (other than a derivatives transaction) or credit enhancement to an asset-backed commercial paper securitisation. Group originated exposures comprise:
  - Capital relief – significant risk transfer of the underlying exposure is achieved for regulatory purposes.
  - Funding only – significant risk transfer is not achieved.
  - Internal residential mortgage-backed securities – securities are issued and held internally for contingent liquidity purposes (also known as self-securitisation).
- Bank acts as investor refers to where the Level 2 Group holds investments in third-party securitisation exposures.
- Traditional securitisation refers to where a pool of underlying exposures is transferred or assigned to and held by a special purpose vehicle. The Level 2 Group does not have any synthetic securitisation exposures.

## SEC1: Securitisation exposures in the banking book

The following table provides the carrying value of securitisation exposures in the banking book. In addition to these carrying values, the EaD of derivatives provided to securitisation vehicles where the Level 2 Group acts as the originator was \$23 million (30 September 2024: \$34 million).

March 2025 v September 2024

Securitisation exposures in the banking book originated by the Level 2 Group decreased by \$502 million or 0.4% due to repayment of the underlying securitised mortgages, as well as foreign exchange translation impacts.

	As at 31 Mar 25		As at 30 Sep 24	
	Bank acts as originator	Bank acts as investor	Bank acts as originator	Bank acts as investor
	Traditional	Traditional	Traditional	Traditional
	\$m	\$m	\$m	\$m
<b>1 Retail (total)</b>	<b>142,888</b>	<b>19,292</b>	<b>143,390</b>	<b>20,712</b>

## Securitisation (cont.)

### SEC4: Securitisation exposures in the banking book and associated capital requirements – bank acting as investor

The following table provides securitisation exposures in the banking book where the bank acts as investor, and the associated RWA.

March 2025 v September 2024

Securitisation exposure investments in the banking book decreased by \$797 million or 2.5%, primarily driven by lower securities holdings. The \$3.5 billion increase in securitisation exposures in the >20-50% risk-weight band is due to a slight decline in credit quality of a small number of warehouse exposures.

		As at 31 Mar 25								
		EaD (by risk-weight bands)			EaD (by regulatory approach)		RWA (by regulatory approach)		Capital charge after cap <sup>(1)</sup>

# Market risk

## Market risk risk-weighted assets

The following table provides a breakdown of market risk RWA by approach.

	As at	
	31 Mar 25	30 Sep 24
	\$m	\$m
<b>Market risk RWA under the internal model approach</b>	<b>11,318</b>	<b>10,694</b>
<b>Market risk RWA under the standard method</b>		
Interest rate risk	768	729
Equity position risk	8	4
<b>Total market risk RWA under the standard method</b>	<b>776</b>	<b>733</b>
<b>Total</b>	<b>12,094</b>	<b>11,427</b>

## Internal model approach value at risk and stressed value at risk

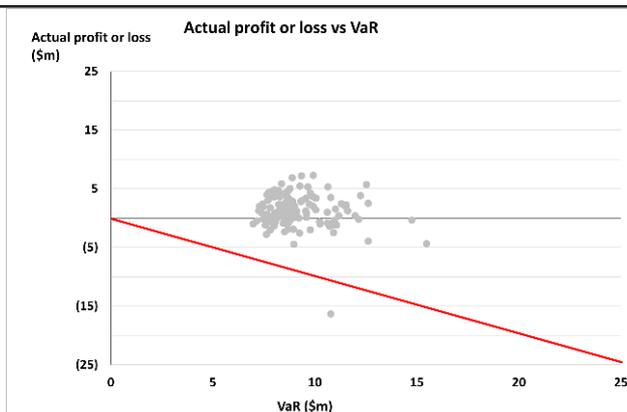

The following table provides information on the mean, minimum and maximum value at risk (VaR) and stressed VaR over the reporting period and at period end. VaR and stressed VaR provided are based on a 10-day holding period.

	6 months ended 31 Mar 25			As at
	Mean value	Minimum value	Maximum value	31 Mar 25
	\$m	\$m	\$m	\$m
<b>At a 99% confidence level</b>				
VaR	27.4	15.1	50.6	25.9
Stressed VaR	130.1	77.2	257.4	106.6
	6 months ended 30 Sep 24			As at
	Mean value	Minimum value	Maximum value	30 Sep 24
	\$m	\$m	\$m	\$m
<b>At a 99% confidence level</b>				
VaR	33.7	22.7	67.5	29.9
Stressed VaR	133.9	81.6	216.5	160.4

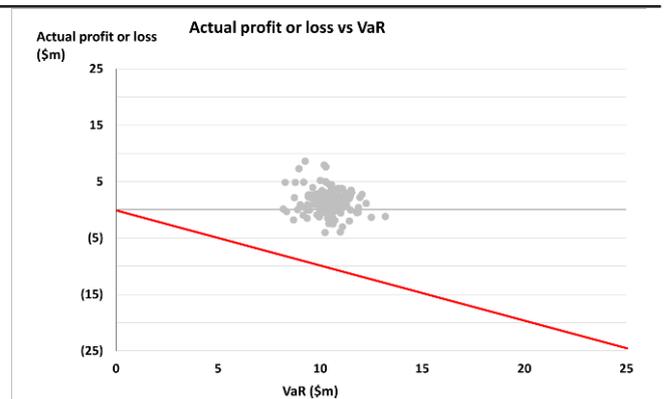

## Back-testing results

The following graphs compare the Group's daily VaR estimates against actual profit or loss. Actual trading outcomes are adjusted to remove the impact of intra-day trading and factors other than market movements alone. The red line represents a one-to-one relationship between negative actual profit or loss and VaR, which is an indicator of the VaR model's performance.

Results for the six months ended 31 March 2025

Results for the six months ended 30 September 2024

Back-testing, carried out by comparing the Group's daily VaR estimate against actual profit or loss, identified one exception during the six months ended 31 March 2025 (nil for the six months ended 30 September 2024). This exception occurred in December 2024 with actual profit or loss of \$16 million measured against a VaR estimate of \$11 million. This remains within the model parameters and indicates acceptable operation of the VaR model within APRA's guidelines.

For personal use only

# Operational risk

Under APS 115 *Capital Adequacy: Standardised Measurement Approach to Operational Risk*, operational risk capital is derived from the business indicator, a financial statement proxy of operational risk exposure. The business indicator is based on the average of the most recent three years of audited year-end financial reports, updated as part of 31 December reporting each year following finalisation of the year-end financial report.

The annual templates OR2: *Business indicator and subcomponents* and OR3: *Minimum required operational risk capital* have been included in this report to provide information on a more timely basis.

March 2025 v September 2024

Operational risk RWA increased by \$1.9 billion or 5.2%. This was mainly due to an increase in the interest, lease and dividend component of the business indicator due to higher net interest and lease income in the 2024 financial year compared to the 2021 financial year which is no longer in the three-year average. Net interest and lease income (row 1a less row 1b in OR2) increased from \$14.0 billion in the 2021 financial year to \$16.4 billion in the 2024 financial year due to lending growth and a higher interest rate environment.

## OR2: Business indicator and subcomponents

The following table provides the business indicator and its subcomponents, which informed the operational risk capital from 31 December 2024 to 31 March 2025, as set out in OR3: *Minimum required operational risk capital*.

		For the year ended 30 September		
		2024	2023	2022
		\$m	\$m	\$m
<b>Business indicator and its subcomponents</b>				
<b>1</b>	<b>Interest, lease and dividend component<sup>(1)(2)</sup></b>	<b>15,960</b>		
1a	Interest and lease income	58,303	48,078	22,853
1b	Interest and lease expense	41,867	31,623	7,988
1c	Interest earning assets <sup>(3)</sup>	985,457	963,355	938,351
1d	Dividend income	16	15	93
<b>2</b>	<b>Services component<sup>(1)(4)</sup></b>	<b>2,503</b>		
2a	Fee and commission income	2,221	2,210	2,210
2b	Fee and commission expense	23	46	54
2c	Other operating income	443	117	306
2d	Other operating expense	212	105	112
<b>3</b>	<b>Financial component<sup>(1)(5)</sup></b>	<b>1,325</b>		
3a	Net profit or loss on the trading book	657	783	424
3b	Net profit or loss on the banking book	526	747	839
<b>4</b>	<b>Business indicator<sup>(1)</sup></b>	<b>19,788</b>		
5	Business indicator component <sup>(1)(6)</sup>	2,923		

(1) The business indicator and its components, representing averages of the most recent three financial years, are presented in the column for the most recent financial year, consistent with the disclosure template prescribed by APS 330.

(2) The interest, lease and dividend component is calculated as the lesser of the average of net interest and lease income and 2.25% of interest earning assets, plus the average of dividend income.

(3) Interest earning assets as at the end of each financial year.

(4) The services component is calculated as the higher of the average of fee and commission income and expense, plus the higher of the average of other operating income and expense.

(5) The financial component is calculated as the sum of the average of net profit or loss on the trading and banking book.

(6) Calculated as the business indicator multiplied by 12%, plus 3% of the amount by which the business indicator exceeds \$1.5 billion.

For personal use only

## Operational risk (cont.)

The following table provides the business indicator and its subcomponents, which informed the operational risk capital from 31 December 2023 to 30 September 2024, as set out in OR3: *Minimum required operational risk capital*.

	For the year ended 30 September		
	2023	2022	2021
	\$m	\$m	\$m
<b>Business indicator and its subcomponents</b>			
<b>1 Interest, lease and dividend component<sup>(1)(2)</sup></b>	<b>15,153</b>		
1a Interest and lease income	48,078	22,853	18,696
1b Interest and lease expense	31,623	7,988	4,706
1c Interest earning assets <sup>(3)</sup>	963,355	938,351	860,428
1d Dividend income	15	93	40
<b>2 Services component<sup>(1)(4)</sup></b>	<b>2,408</b>		
2a Fee and commission income	2,210	2,210	2,281
2b Fee and commission expense	46	54	111
2c Other operating income	117	306	99
2d Other operating expense	105	112	118
<b>3 Financial component<sup>(1)(5)</sup></b>	<b>1,175</b>		
3a Net profit or loss on the trading book	783	424	423
3b Net profit or loss on the banking book	747	839	310
<b>4 Business indicator<sup>(1)</sup></b>	<b>18,736</b>		
5 Business indicator component <sup>(1)(6)</sup>	2,765		

(1) The business indicator and its components, representing averages of the most recent three financial years, are presented in the column for the most recent financial year, consistent with the disclosure template prescribed by APS 330.

(2) The interest, lease and dividend component is calculated as the lesser of the average of net interest and lease income and 2.25% of interest earning assets, plus the average of dividend income.

(3) Interest earning assets as at the end of each financial year.

(4) The services component is calculated as the higher of the average of fee and commission income and expense, plus the higher of the average of other operating income and expense.

(5) The financial component is calculated as the sum of the average of net profit or loss on the trading and banking book.

(6) Calculated as the business indicator multiplied by 12%, plus 3% of the amount by which the business indicator exceeds \$1.5 billion.

## OR3: Minimum required operational risk capital

The following table presents the operational risk regulatory capital requirements.

	As at	
	31 Mar 25	30 Sep 24
	\$m	\$m
1 Business indicator component	2,923	2,765
2 Internal loss multiplier <sup>(1)</sup>	1.0	1.0
- Other regulatory capital charges	116	123
3 Minimum required operational risk capital <sup>(2)</sup>	3,039	2,888
4 Operational risk RWA <sup>(3)</sup>	37,985	36,102

(1) APS 115 does not include an internal loss multiplier, which is a scaling factor based on average historical losses, in the calculation of operational risk capital.

(2) Calculated as the business indicator component, multiplied by the internal loss multiplier, plus other regulatory capital charges.

(3) Operational risk RWA is operational risk capital multiplied by 12.5.

For personal use only

# Liquidity

## 10.1 Liquidity coverage ratio

The LCR measures the adequacy of HQLA available to meet net cash outflows over a 30-day period during a severe liquidity stress scenario. The Board sets LCR targets above regulatory minimums and the Group manages its LCR position daily across the legal entity structure, major currencies and jurisdictions in which business activities are undertaken. The APRA minimum LCR is 100%.

A prudent funding strategy seeks to ensure appropriate diversification and limits maturity concentrations. This approach is designed to provide a relatively stable LCR profile over time.

The Group's mix of liquid assets primarily consists of HQLA, such as cash, deposits with central banks, Australian government and semi-government securities and securities issued by foreign sovereigns. The currency mix of these holdings is set with reference to the currency of the underlying liquidity risk to support all regulatory and internal requirements being met. Liquid assets surplus to APRA minimums in New Zealand dollars are not included in LCR for the Level 2 Group, reflecting constraints on transferability. The currency mismatch of liquidity risk is managed through the LCR, as well as via other internal metrics, and informs the currency, composition, and location of HQLA held.

The LCR for the three months ended 31 March 2025 and 31 December 2024 are presented in LIQ1: *Liquidity coverage ratio*, and are based on a simple average of daily LCR outcomes excluding non-business days. There were 61 daily LCR data points used in calculating the average for the most recent quarter and 64 observations in the previous quarter.

### March 2025 v December 2024

Average LCR for the three months ended 31 March 2025 remained unchanged at 139%, with a \$1.4 billion or 0.6% decrease in average liquid assets, and a \$1.7 billion or 1.1% decrease in average weighted net cash outflows. Average liquid assets decreased as a result of a reduction in wholesale funding, partially offset by growth in customer deposits. The decrease in average net cash outflows was largely due to a modelling change in derivative collateral requirements, partially offset by an increase in average cash outflows from wholesale deposits and unsecured wholesale funding in the 30-day stress period reflecting variability in the Group's refinancing profile.

## 10.2 Net stable funding ratio

The NSFR measures the extent to which assets are funded with stable sources of funding in order to mitigate the risk of future funding stress. ASF is calculated by applying weightings to capital and liabilities to reflect the portion that is expected to be available over a one-year time horizon. The maturity of funding is taken as being the earliest date at which the funding can be withdrawn. RSF reflects the liquidity characteristics of the assets and the expectation that these assets and off-balance sheet exposures will require funding over the next year. The maturity of assets is taken as being the latest possible date at which the asset may mature. The APRA minimum NSFR is 100%.

The NSFR as at 31 March 2025 and 31 December 2024 are presented in LIQ2: *Net stable funding ratio*, and are based on spot balances.

### March 2025 v December 2024

The NSFR increased to 119%, with an \$8.3 billion or 1.2% increase in ASF, partially offset by a \$2.7 billion or 0.5% increase in RSF. The increase in ASF was driven by deposit growth, mostly across retail and small business customers, combined with an increase in regulatory capital. The increase in RSF was primarily due to higher RSF required on lending and reverse repurchase exposures, partially offset by lower derivative exposures.

For personal use only

## Net stable funding ratio (cont.)

As at 31 Dec 24

ASF item	Unweighted value by residual maturity				Weighted value \$m
	No maturity	< 6 months	6 months to < 1 year	≥ 1 year	
	\$m	\$m	\$m	\$m	
1 Capital, comprising:	62,606	-	-	32,797	95,403
2 Regulatory capital	62,606	-	-	32,797	95,403
3 Other capital instruments	-	-	-	-	-
4 Retail deposits and deposits from small business customers, comprising:	275,305	91,121	638	18	337,584
5 Stable deposits	126,863	17,279	-	-	136,935
6 Less stable deposits	148,442	73,842	638	18	200,649
7 Wholesale funding, comprising:	126,979	299,839	55,394	123,727	257,363
8 Operational deposits	89,839	-	-	-	44,919
9 Other wholesale funding	37,140	299,839	55,394	123,727	212,444
10 Liabilities with matching interdependent assets	-	-	-	-	-
11 Other liabilities, comprising:	-	17,801	-	4,820	4,820
12 NSFR derivative liabilities <sup>(1)</sup>			7,328		
13 All other liabilities and equity not included in the above categories	-	10,473	-	4,820	4,820
<b>14 Total ASF</b>					<b>695,170</b>
<b>RSF item</b>					
15 Total NSFR HQLA					5,376
- of which: alternative liquid assets					275
- of which: RBNZ eligible securities					275
16 Deposits held at other financial institutions for operational purposes	-	-	-	-	-
17 Performing loans and securities, comprising:	31,681	187,899	68,625	561,357	533,235
18 Performing loans to financial institutions secured by Level 1 HQLA	-	70,172	2,970	-	8,502
19 Performing loans to financial institutions secured by non-Level 1 HQLA and unsecured performing loans to financial institutions	1,069	45,166	13,838	20,258	35,021
20 Performing loans to non-financial corporate clients, loans to retail and small business customers, and loans to sovereigns, central banks and public sector entities	20,509	63,816	46,627	141,234	188,050
21 of which: with a risk-weight of less than or equal to 35% under APS 112 <sup>(2)</sup>	-	6,368	3,177	7,742	9,805
22 Performing residential mortgages	8,831	4,357	4,576	395,384	293,178
- of which: standard loans to individuals with a loan-to-valuation ratio of 80% or below <sup>(3)</sup>	6,104	-	-	271,585	180,497
24 Securities that are not in default and do not qualify as HQLA, including exchange-traded equities	1,272	4,388	614	4,481	8,484
25 Assets with matching interdependent liabilities	-	-	-	-	-
26 Other assets, comprising:	14,224	3,670	80	43,390	40,271
27 Physical traded commodities, including gold	316				268
28 Assets posted as initial margin for derivative contracts and contributions to default funds of CCPs <sup>(1)</sup>			2,841		2,415
29 NSFR derivative assets <sup>(1)</sup>			11,117		3,789
30 NSFR derivative liabilities before deduction of variation margin posted <sup>(1)</sup>			16,295		3,259
31 All other assets not included in the above categories	13,908	3,670	80	13,137	30,540
32 Off-balance sheet items <sup>(1)</sup>			218,855		10,868
<b>33 Total RSF</b>					<b>589,750</b>
<b>34 NSFR (%)</b>					<b>118%</b>

(1) Disclosed in total and not by maturity bucket, consistent with the disclosure template prescribed by APS 330.

(2) The description of row 21 has been modified from that set out in the BCBS *Disclosure Requirements* standard to align with APS 210.

(3) Comprises performing, unencumbered standard residential property loans to individuals with a residual maturity of one year or more, or no defined maturity, and a LVR of 80% or below, as defined under APS 112.

For personal use only

# Asset encumbrance

## ENC: Asset encumbrance

The table below provides the carrying value of encumbered and unencumbered assets of the Group. The difference between assets of the Group and the Level 2 Group is set out in CC2: *Reconciliation of regulatory capital to balance sheet*, and mainly relates to securitisation special purpose vehicles to which residential mortgages have been transferred in accordance with the requirements for regulatory capital relief in APS 120.

For the purposes of this disclosure, encumbered assets are assets that the Group is restricted or prevented from liquidating, selling, transferring or assigning due to legal, regulatory, contractual or other limitations. This definition differs to that used for the purposes of the LCR.

Assets are encumbered to access funding via repurchase agreements and covered bonds, and to meet collateral obligations under derivative transactions and repurchase agreements. Where assets held are pledged under derivative transactions or repurchase agreements, the Group retains substantially all of the risks and rewards of ownership of the assets and consequently the assets are not derecognised from the balance sheet.

### March 2025 v September 2024

Encumbered assets decreased by \$3.2 billion or 2.7% primarily due to a decrease in cash collateral placed under derivative transactions, combined with a decrease in encumbered residential mortgages. This was partially offset by an increase in regulatory minimum deposits with certain central and other banks.

Encumbered trading assets and debt instruments were largely unchanged with a reduction in encumbered physical securities largely offset by an increase in pledges of securities received under reverse repurchase agreements.

Assets	As at 31 Mar 25		Total \$m
	Encumbered assets \$m	Unencumbered assets \$m	
Cash and liquid assets	-	1,433	1,433
Due from other banks <sup>(1)</sup>	3,854	91,011	94,865
Collateral placed <sup>(2)</sup>	6,971	-	6,971
Trading assets and debt instruments <sup>(3)</sup>	62,044	136,500	198,544
of which: government and semi-government bonds, notes and securities	5,065	75,812	80,877
of which: other debt and equity securities	2,454	9,728	12,182
of which: reverse repurchase agreements	54,525	50,145	104,670
Derivative assets	-	24,243	24,243
Other financial assets	-	764	764
Loans and advances	41,300	709,521	750,821
of which: residential mortgages (gross of provision for credit impairment) <sup>(4)(5)</sup>	41,300	384,977	426,277
All other assets	-	17,998	17,998
<b>Total assets</b>	<b>114,169</b>	<b>981,470</b>	<b>1,095,639</b>

(1) Encumbered amounts due from other banks comprise regulatory minimum deposits placed with certain central and other banks. Unencumbered amounts due from other banks include exchange settlement accounts with the RBA and RBNZ.

(2) Encumbered collateral placed comprises initial and variation margin posted in the form of cash, primarily under derivative margining agreements.

(3) Encumbered trading assets and debt instruments primarily comprise debt securities encumbered under repurchase agreements for trading or short-term funding and liquidity purposes. Debt securities are also pledged under derivative margining agreements.

(4) Encumbered assets include \$35.0 billion of residential mortgages encumbered under NAB and BNZ covered bond programmes, where Group-originated residential mortgages are allocated to the cover asset pool as remote specific securities backing covered bond issuances.

(5) Unencumbered assets include repo-eligible residential mortgage-backed securities. Under APG 210 *Liquidity*, the Level 2 Group holds self-securitised assets free from encumbrance to a minimum of 30% of Australian dollar net cash outflows in the LCR as contingency for periods of stress.

## Asset encumbrance (cont.)

Assets	As at 30 Sep 24		
	Encumbered assets	Unencumbered assets	Total
	\$m	\$m	\$m
Cash and liquid assets	-	2,499	2,499
Due from other banks <sup>(1)</sup>	2,580	107,858	110,438
Collateral placed <sup>(2)</sup>	9,633	-	9,633
Trading assets and debt instruments <sup>(3)</sup>	61,922	113,683	175,605
of which: government and semi-government bonds, notes and securities	12,638	60,302	72,940
of which: other debt and equity securities	2,168	12,609	14,777
of which: reverse repurchase agreements	47,116	40,699	87,815
Derivative assets	-	28,766	28,766
Other financial assets	-	769	769
Loans and advances	43,257	689,435	732,692
of which: residential mortgages (gross of provision for credit impairment) <sup>(4)(5)</sup>	43,257	373,501	416,758
All other assets	-	19,846	19,846
<b>Total assets</b>	<b>117,392</b>	<b>962,856</b>	<b>1,080,248</b>

(1) Encumbered amounts due from other banks comprise regulatory minimum deposits placed with certain central and other banks. Unencumbered amounts due from other banks include exchange settlement accounts with the RBA and RBNZ.

(2) Encumbered collateral placed comprises initial and variation margin posted in the form of cash, primarily under derivative margining agreements.

(3) Encumbered trading assets and debt instruments primarily comprise debt securities encumbered under repurchase agreements for trading or short-term funding and liquidity purposes. Debt securities are also pledged under derivative margining agreements.

(4) Encumbered assets include \$35.5 billion of residential mortgages encumbered under NAB and BNZ covered bond programmes, where Group originated residential mortgages are allocated to the cover asset pool as remote specific securities backing covered bond issuances.

(5) Unencumbered assets include repo-eligible residential mortgage-backed securities. Under APG 210, the Level 2 Group holds self-securitised assets free from encumbrance to a minimum of 30% of Australian dollar net cash outflows in the LCR as contingency for periods of stress.

# Disclosure requirements index

The following table sets out the disclosure requirements of the BCBS *Disclosure Requirements* standard, including the reporting frequency, and where the disclosure is made if included in this report.

BCBS <i>Disclosure Requirements</i> standard tables and templates			Reporting frequency	Pillar 3 Report section, or comment
DIS20: Overview of risk management, key prudential metrics and risk-weighted assets (RWA)	KM1	Key metrics (at consolidated group level)	Quarterly	Section 2 <i>Overview of key metrics and RWA</i>
	KM2	Key metrics - total loss-absorbing capacity (TLAC) requirements (at resolution group level)	N/A as only required for global systemically important banks (G-SIBs)	
	OVA	Bank risk management approach	Annual	-
	OV1	Overview of RWA	Quarterly	Section 2 <i>Overview of key metrics and RWA</i>
DIS21: Comparison of modelled and standardised RWA	CMS1	Comparison of modelled and standardised RWA at risk level	Quarterly	Section 2 <i>Overview of key metrics and RWA</i>
	CMS2	Comparison of modelled and standardised RWA for credit risk at asset class level	Semi-annual	Section 2 <i>Overview of key metrics and RWA</i>
DIS25: Composition of capital and TLAC	CCA	Main features of regulatory capital instruments and of other TLAC-eligible instruments	Semi-annual <sup>(1)</sup>	Available at <a href="http://nab.com.au/about-us/shareholder-centre/regulatory-disclosures">nab.com.au/about-us/shareholder-centre/regulatory-disclosures</a>
	CC1	Composition of regulatory capital	Semi-annual	Section 3 <i>Capital</i>
	CC2	Reconciliation of regulatory capital to balance sheet	Semi-annual	Section 3 <i>Capital</i>
	TLAC1	TLAC composition for G-SIBs (at resolution group level)	N/A as only required for G-SIBs	
	TLAC2	Material subgroup entity - creditor ranking at legal entity level	N/A as only required for G-SIBs	
	TLAC3	Resolution entity - creditor ranking at legal entity level	N/A as only required for G-SIBs	
DIS26: Capital distribution constraints	CDC	Capital distribution constraints	APRA has not required this disclosure which is at the discretion of national supervisors	
DIS30: Links between financial statements and regulatory exposures	LIA	Explanations of differences between accounting and regulatory exposure amounts	Annual	-
	LI1	Differences between accounting and regulatory scopes of consolidation and mapping of financial statement categories with regulatory risk categories	Annual <sup>(2)</sup>	Section 4 <i>Links between financial statements and regulatory exposures</i>
	LI2	Main sources of differences between regulatory exposure amounts and carrying values in financial statements	Annual	-
	PV1	Prudent valuation adjustments (PVAs)	Not required under APS 330	
DIS31: Asset encumbrance	ENC	Asset encumbrance	Semi-annual	Section 11 <i>Asset encumbrance</i>
DIS35: Remuneration <sup>(3)</sup>	REMA	Remuneration policy	Not required under APS 330	
	REM1	Remuneration awarded during financial year	Not required under APS 330	
	REM2	Special payments	Not required under APS 330	
	REM3	Deferred remuneration	Not required under APS 330	
DIS40: Credit risk	CRA	General qualitative information about credit risk	Annual	-
	CR1	Credit quality of assets	Semi-annual	Section 5 <i>Credit risk</i>
	CR2	Changes in stock of defaulted loans and debt securities	Semi-annual	Section 5 <i>Credit risk</i>
	CRB	Additional disclosure related to the credit quality of assets	Annual	-
	CRB-A	Additional disclosure related to prudential treatment of problem assets	APRA has not required this disclosure which is at the discretion of national supervisors	
	CRC	Qualitative disclosure related to credit risk mitigation (CRM) techniques	Annual	-
	CR3	CRM techniques - overview	Semi-annual	Section 5 <i>Credit risk</i>
	CRD	Qualitative disclosure on banks' use of external credit ratings under the standardised approach for credit risk	Annual	-
	CR4	Standardised approach - credit risk exposure and CRM effects	Semi-annual	Section 5 <i>Credit risk</i>
	CR5	Standardised approach - exposures by asset classes and risk-weights	Semi-annual	Section 5 <i>Credit risk</i>

(1) Disclosed quarterly to provide information on a more timely basis.

(2) Disclosed as additional information semi-annually to facilitate understanding of how carrying values in other disclosures correspond to amounts on the Group's balance sheet.

(3) Disclosure is made separately of the requirements set out in Prudential Standard CPS 511 *Remuneration* on an annual basis.

## Disclosure requirements index (cont.)

BCBS Disclosure Requirements standard tables and templates			Reporting frequency	Pillar 3 report section, or comment
DIS40: Credit risk	CRE	Qualitative disclosure related to internal ratings-based (IRB) models	Annual	-
	CR6	IRB - credit risk exposures by portfolio and probability of default (PD) range	Semi-annual	Section 5 <i>Credit risk</i>
	CR7	IRB - effect on RWA of credit derivatives used as CRM techniques	Semi-annual	No credit derivatives are held for credit mitigation purposes at the end of the current or previous reporting period
	CR8	RWA flow statements of credit risk exposures under IRB	Quarterly	Section 5 <i>Credit risk</i>
	CR9	IRB - backtesting of PD per portfolio	Annual	-
	CR10	IRB - specialised lending under the slotting approach	Semi-annual	Section 5 <i>Credit risk</i>
	DIS42: Counterparty credit risk (CCR)	CCRA	Qualitative disclosure related to CCR	Annual
CCR1		Analysis of CCR exposures by approach	Semi-annual	Section 6 <i>Counterparty credit risk</i>
CCR3		Standardised approach - CCR exposures by regulatory portfolio and risk-weights	Semi-annual	Section 6 <i>Counterparty credit risk</i>
CCR4		IRB - CCR exposures by portfolio and PD scale	Semi-annual	Section 6 <i>Counterparty credit risk</i>
CCR5		Composition of collateral for CCR exposure	Semi-annual	Section 6 <i>Counterparty credit risk</i>
CCR6		Credit derivatives exposures	Semi-annual	Section 6 <i>Counterparty credit risk</i>
CCR7		RWA flow statements of CCR exposures under internal model method (IMM)		Not required under APS 330
CCR8		Exposures to central counterparties	Semi-annual	Section 6 <i>Counterparty credit risk</i>
DIS43: Securitisation	SECA	Qualitative disclosure requirements related to securitisation exposures	Annual	-
	SEC1	Securitisation exposures in the banking book	Semi-annual	Section 7 <i>Securitisation</i>
	SEC2	Securitisation exposures in the trading book	Semi-annual	Section 7 <i>Securitisation</i>
	SEC3	Securitisation exposures in the banking book and associated regulatory capital requirements - bank acting as originator or as sponsor	Semi-annual	Section 7 <i>Securitisation</i>
	SEC4	Securitisation exposures in the banking book and associated capital requirements - bank acting as investor	Semi-annual	Section 7 <i>Securitisation</i>
DIS45: Sovereign exposures	SOV1	Exposures to sovereign entities - country		APRA has not required this disclosure which is at the discretion of national supervisors
	SOV2	Exposures to sovereign entities - currency denomination breakdown		APRA has not required this disclosure which is at the discretion of national supervisors
	SOV3	Exposures to sovereign entities - accounting classification breakdown		APRA has not required this disclosure which is at the discretion of national supervisors
DIS50: Market risk <sup>(1)</sup>	MRA	General qualitative disclosure requirements related to market risk		Not required under APS 330
	MR1	Market risk under the standardised approach		Not required under APS 330
	MRB	Qualitative disclosures for banks using the internal models approach (IMA)		Not required under APS 330
	MR2	Market risk for banks using the IMA		Not required under APS 330
	MR3	Market risk under the simplified standardised approach		Not required under APS 330
DIS51: Credit valuation adjustment (CVA) risk	CVAA	General qualitative disclosure requirements related to CVA	Annual	-
	CVA1	The reduced basic approach for CVA (BA-CVA)		Not required under APS 330
	CVA2	The full BA-CVA		Not required under APS 330
	CVAB	Qualitative disclosures for banks using the standardised approach (SA-CVA)	Annual	-
	CVA3	The SA-CVA		Not required under APS 330
	CVA4	RWA flow statements of CVA risk exposures under SA-CVA		Not required under APS 330

(1) Disclosure is made of the quantitative requirements set out in APS 330 Attachment A paragraph 32 on a semi-annual basis in section 8 *Market risk*.

## Disclosure requirements index (cont.)

BCBS <i>Disclosure Requirements</i> standard tables and templates			Reporting frequency	Pillar 3 report section, or comment

	LIQ2	Net stable funding ratio (NSFR)	Semi-annual	Section 10 <i>Liquidity</i>

(1) Disclosed as additional information in this first report prepared under the revised APS 330 to provide information on a more timely basis. Going forward, these templates will be disclosed as additional information in the 31 December report, in which period operational risk capital is updated under the SMA.

For personal use only

# Glossary

For personal use only

## Accountable Person

An accountable person for the purposes of the Banking Act 1959 (Cth).

## Additional Tier 1 capital

Comprises high quality components of capital that provide a permanent and unrestricted commitment of funds, are freely available to absorb losses, rank behind the claims of depositors and other more senior creditors in the event of winding up of the issuer, and provide for fully discretionary capital distributions.

## ADI

Authorised deposit-taking institution

## Advanced internal ratings-based (A-IRB) approach

The approach used by the Group, under approval from APRA, to calculate the capital requirement for credit risk, which utilises the outputs of internally developed models for probability of default, loss given default and exposure at default.

## ANZSIC

Australian and New Zealand Standard Industrial Classification

## APRA

Australian Prudential Regulation Authority

## APS

Prudential Standards issued by APRA applicable to ADIs.

## Available stable funding (ASF)

The portion of an ADI's capital and liabilities expected to be reliably provided over a one-year time horizon.

## Banking book

Exposures not contained in the trading book.

## BCBS

Basel Committee on Banking Supervision

## BNZ

Bank of New Zealand, a banking subsidiary regulated by the Reserve Bank of New Zealand.

## Carrying value

The value of assets and liabilities reported on the balance sheet under accounting standards and interpretations issued by the Australian Accounting Standards Board. Accounting policy information on how the requirements of the Australian Accounting Standards Board have been applied is contained in the 2024 Annual Report.

## CCF

Credit conversion factor

## CCR

Counterparty credit risk

## CCyB

Countercyclical capital buffer

## Central counterparty (CCP)

A clearing house which interposes itself, directly or indirectly, between counterparties to contracts traded in one or more financial markets, thereby insuring the future performance of open contracts.

## Citi consumer business

Citigroup's Australian consumer business, acquired by the Group in June 2022.

## Citigroup

Citigroup Pty Limited and Citigroup Overseas Investment Corporation.

## Common Equity Tier 1 (CET1) capital

The highest quality component of capital. CET1 capital is subordinated to all other elements of funding, absorbs losses as and when they occur, has full flexibility of dividend payments and has no maturity date. CET1 capital consists of paid-up ordinary share capital, retained profits and certain other items as defined in APS 111 'Capital Adequacy: Measurement of Capital'.

## Common Equity Tier 1 capital ratio

Common Equity Tier 1 capital divided by risk-weighted assets.

## Company

National Australia Bank Limited ABN 12 004 044 937

## CPS

Prudential Standards issued by APRA applicable to regulated entities, including ADIs.

## Credit valuation adjustment

A capital charge to reflect potential mark-to-market losses due to counterparty migration risk for bilateral over-the-counter derivative contracts.

## CRM

Credit risk mitigation

## D-SIB

Domestic systemically important bank

## Default

Default occurs when a loan obligation is contractually 90 days or more past due, or when it is considered unlikely that the credit obligation to the Group will be paid in full without remedial action, such as realisation of security.

## Default fund

Clearing members' funded or unfunded contributions towards, or underwriting of, a central counterparty's mutualised loss sharing arrangements.

## Expected loss

A calculation of the estimated loss that may be experienced over the next 12 months. Expected loss calculations are based on the probability of default, loss given default and exposure at default values of the portfolio at the time of the estimate which includes stressed loss given default for economic conditions.

## Exposure at default (EaD)

An estimate of the credit exposure amount outstanding if a customer defaults.

## Extended Licensed Entity

The ADI and any APRA approved subsidiaries assessed as effectively part of a single 'stand-alone' entity, as defined in APS 222 'Associations with Related Entities'.

## Foundation internal ratings-based (F-IRB) approach

An approach to calculate the capital requirement for credit risk, which utilises the outputs of internally developed models for probability of default, and supervisory estimates for loss given default and exposure at default.

## G-SIB

Global systemically important bank

## Group

NAB and its controlled entities.

## High-quality liquid assets (HQLA)

Consists primarily of cash, deposits with central banks, Australian government and semi-government securities and securities issued by foreign sovereigns as defined in APS 210 'Liquidity'.

## Individually assessed provision for credit impairment

The provision assessed on an individual basis in accordance with Australian Accounting Standard AASB 9 'Financial Instruments'.

## Internal model approach (IMA) - non-traded market risk

The approach used by the Group, under approval from APRA, to calculate the capital requirement for non-traded market risk. The IMA is used to calculate interest rate risk in the banking book for transactions in the banking book.

## Internal model approach (IMA) - traded market risk

The approach used by the Group, under approval from APRA, to calculate the capital requirement for traded market risk. The IMA is used to calculate general market risk for transactions in the trading book, other than those covered by the standard method.

## Leverage ratio

Tier 1 capital divided by exposures as defined by APS 110 'Capital Adequacy'. Exposures include on-balance sheet exposures, derivative exposures, securities financing transaction exposures and other off-balance sheet exposures.

## Liquidity coverage ratio (LCR)

A metric that measures the adequacy of high-quality liquid assets available to meet net cash outflows over a 30-day period during a severe liquidity stress scenario.

## Loss given default (LGD)

An estimate of the expected severity of loss for a credit exposure following a default event. Regulatory LGDs reflect a stressed economic condition at the time of default.

## NAB

National Australia Bank Limited ABN 12 004 044 937

## Net stable funding ratio (NSFR)

A ratio of the amount of available stable funding to the amount of required stable funding.

## Non-performing exposures

Exposures which are in default aligned to the definition in APS 220 'Credit Risk Management'.

## Probability of default (PD)

An estimate of the likelihood of a customer defaulting or not repaying their borrowings and other obligations in the next 12 months.

## Qualifying central counterparty (QCCP)

An entity licensed to operate as a central counterparty, and permitted by its regulator or overseer to operate as such with respect to products offered. The entity must be based and prudentially supervised in a jurisdiction where the relevant regulator or overseer has established, and publicly indicated that it applies domestic rules and regulations consistent with the 'Principles for Financial Market Infrastructures' issued by the Committee on Payments and Market Infrastructures and International Organization of Securities Commissions.

## RBA

Reserve Bank of Australia

## RBNZ

Reserve Bank of New Zealand

## Required stable funding (RSF)

The amount of stable funding an ADI is required to hold measured as a function of the liquidity characteristics and residual maturities of the various assets held by an ADI, including off-balance sheet exposures.

## Risk-weighted assets (RWA)

A quantitative measure of risk required by the APRA risk-based capital adequacy framework, covering credit risk for on- and off-balance sheet exposures, market risk, operational risk and interest rate risk in the banking book.

## SA-CCR

Standardised approach for measuring counterparty credit risk exposures

## Securities financing transaction (SFT)

A transaction such as a repurchase agreement, reverse repurchase agreement or a securities lending and borrowing transaction where the value of the transaction depends on the market valuation of securities and the transaction is typically subject to margin agreements.

## SME

Small and medium-sized enterprises

**Standard method**

An alternative approach used to calculate the capital requirement for traded market risk, which applies supervisory risk-weights to positions arising from trading activities.

**Standardised approach (SA)**

An alternative approach used to calculate the capital requirement for credit risk, which utilises regulatory prescribed risk-weights based on external ratings and/or the application of specific regulator defined metrics to determine risk-weighted assets.

**Standardised measurement approach (SMA)**

An approach used to calculate the capital requirement for operational risk based on a business indicator, a financial statement proxy of operational risk exposure.

**Tier 1 capital**

Common Equity Tier 1 capital plus Additional Tier 1 capital.

**Tier 1 capital ratio**

Tier 1 capital divided by risk-weighted assets.

**Tier 2 capital**

Includes other components of capital that, to varying degrees, fall short of the quality of Tier 1 capital but nonetheless contribute to the overall strength of an ADI and its capacity to absorb losses.

**Total capital**

Tier 1 capital plus Tier 2 capital.

**Total capital ratio**

Total capital divided by risk-weighted assets.

**Trading book**

Positions in financial instruments, including derivatives and other off-balance sheet instruments, that are held either with a trading intent or to hedge other elements of the trading book.

**Value at risk (VaR)**

A mathematical technique that uses statistical analysis of historical data to estimate the likelihood that a given portfolio's losses will exceed a certain amount.

For personal use only
