PeeringDB
Call for Committee Members

Patrick Gilmore

PeeringDB is Volunteer Run

PeeringDB is run by volunteers from the community.

Without support from the community, PeeringDB would not exist!

PeeringDB needs additional volunteers for a few committees. If you have time and motivation, we would love some help making PeeringDB the best resource for peering and interconnection on the Internet.

Admin Committee

The Admin Committee answers the tickets entered by community members.

We are trying to automate ourselves out of a job. However, there will likely always be requests from the community which require a human.

We are especially interested in volunteers who speak languages other than English.

Outreach Committee

The Outreach Committee coordinates outreach and evangelism in the community.

We're not only looking for peering coridinators, or network engineers - folks with marketing experience more than welcome

If this is of interest to you, we would love to have the help.

Operations Committee

The Operations Committee runs the PeeringDB infrastructure.

This committee is small and highly trusted, but every member is important because the community depends on PeeringDB.

Experience with containers is a plus, but not required.

Please understand that not every volunteer can be given a slot.

Volunteer!

If you want to volunteer, please email:

stewards@lists.peeringdb.com

And thank you for volunteering!
