Bike Parts Treasure Hunt

CLICK [HERE](#) TO WATCH THE VIDEO INTRODUCTION FOR THESE ACTIVITIES

Aim: Have a treasure hunt in your home and learn to identify 13 different parts of a bicycle.

Instructions:

1. The 13 bike parts are all shown on **Page 2**. If you have access to a printer, print them out and carefully cut around each one. Ask an adult to help you with this if you need to. If you don't have a printer, no problem! Just write the bike parts out on a blank page, making sure you mark the **red letter** on each one and leaving space between them so you can carefully cut these out.
2. Ask somebody to **hide the clues** for you all around your home. This could be your parent or carer, or an older sibling. Make sure you ask them to hide them in really good spots, the trickier the hiding places, the more fun it is to hunt for them.
3. Before you set off on your treasure hunt, **print off (or draw out)** the answer sheet on **Page 3**. This is where you will record the information from the clues you find.
4. **Get set, go!** Hunt around your house to find the bike parts. Remember, there are 13 in total. You can hunt for them all in one go and collect them all up. Or bring them back to your answer sheet one at a time. Choose whichever option sounds **the most fun** to you.
5. On your answer sheet, see if you can correctly identify the parts of the bike. If some of them look like parts you've never heard of before, start with the ones you know for sure and build up to the more difficult ones. Write the **red letter** in the **red letter box** as you go along.
6. Once you have successfully labelled the bike, look at your **red letter box** and see if you can unscramble the message that fits in the space underneath the bike.
7. Finally, check your answers against the answer sheet on **Page 4**. Did you learn anything new about bicycles today?
