

in partnership with
Calvert

Dear Teacher,

Welcome to 'Helimed Ed.', Air Ambulance NI's very own education resource designed for primary school children! Thank you very much for taking the time to learn about Air Ambulance NI in your own classroom through a range of cross-curricular activities, we hope you and your pupils enjoy it.

Helimed Ed., in partnership with Calvert, aims to inspire and raise awareness amongst children around Northern Ireland's helicopter emergency medical service (HEMS) through Literacy, Numeracy, World Around Us and PDMU activities. We hope the activities throughout this resource will create conversations in your classroom around the most recent emergency service in the region, how to stay safe and what any of us should do in an emergency if we were ever to find ourselves in that situation.

We also hope this resource will further supplement what the children are already learning in the classroom in areas such as language, literacy, numeracy and hopefully it may even inspire some to become a pilot, doctor, paramedic, engineer or even become a volunteer for a charity in the future!

We would really appreciate it if your school, school council or parent support group could support Air Ambulance NI charity at some point throughout the year - a non-uniform day, cake & bun sale or a daily mile challenge, it doesn't matter! Any support or funds you raise WILL keep the air ambulance flying another day, helping the sickest people in the region.

Air Ambulance NI relies on everyone's support to keep the medical team flying, saving lives, brains and limbs across the region. At a fundraising need of £6,850 per day, any support your school could offer the charity will make a difference.

If you have any queries about the resource, please feel free to contact me at any time.

Lastly, THANK YOU again for your support.

Kind regards,

Damien McAnespie
Air Ambulance NI
