

# FS2 MOUSE CLUB

Term 1 – Week 6 (2024-2025)

The children are enjoying learning about the changes that autumn is bringing to our daily lives and our outside area. 'Leaf Man' and 'Tree' were very popular books last week and this week we will be looking more closely at some of the animals that live in our woods and how they adapt to the changes across the seasons. We will be using words such as 'camouflage' and 'hibernate'.

## Book of the Week

Our feature book this week is 'Owl Babies' by Martin Waddell and Patrick Benson.

Please click [here](#) to follow it.

## Song of the Week

Our new song is called 'Ten Little Owls' and can be found by clicking this [link](#).

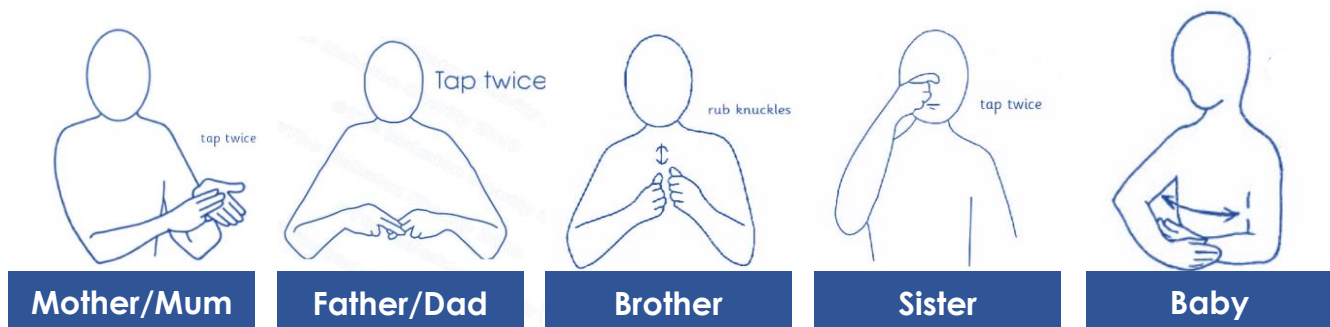

## Activities at Home

The activities to try at home follow on from last week's suggestions - and hopefully the weather will make it easier to get outside. You can try:

- taking your mouse outside on a leaf hunt
- talking about the shapes, colours and textures of the leaves that you find (are they soft or crunchy? etc.)
- investigating whether all the trees are losing their leaves or not – thinking about why
- using your leaves to create your very own leaf pictures, or make leaf rubbings
- counting the leaves you have collected and sorting them by size, colour, etc
- finding out about some of the animals that live in UK woodlands, with an adult, either in books you have at home, by visiting the library, or online. For example, owls, foxes, badgers, squirrels and hedgehogs (click [here](#))

## Makaton Signs this Week
