Rabbits and Hares

How are they similar and different?

The gestation period for rabbits and hares is about a month. A litter has three to eight babies.

Baby rabbits are called leverets. Baby hares are called leverets.

A baby rabbit is born hairless and completely blind. A baby hare has fur and sight and can move on their own an hour after being born.

Hares are larger than rabbits and have long hind legs.

Both rabbits and hares have short tails.

A rabbit's fur stays the same color all year, while a hare's fur changes from brown or gray in the summer to white in the winter.

Rabbits and hares are herbivores. Rabbits are adapted to eat softer grasses and vegetables, while hares like to eat bark and twigs.

Rabbits live in burrows underground and have nests above ground.

Rabbits can be domesticated and kept as pets, while hares remain wild.

A DAB of GLUE will do 

Rabbits	SCIENCE
Monday	Rabbits and Hares -Read a nonfiction Rabbit book -Complete Rabbit and Hare PowerPoint -Make a Venn Diagram for rabbits and hares -Complete writing
Tuesday	Rabbits Can Have Are -Read a nonfiction Rabbit book -Introduce rabbits by completing Rabbit PowerPoint -As a class complete Can, Have, Are Craftivity
Wednesday	Parts of a Rabbit -Read a nonfiction Rabbit book -Using Parts of a Reindeer poster, discuss the different parts of a rabbit -Complete parts of a rabbit worksheet
Thursday	Omnivore, Herbivore, Carnivore Sort -Read a nonfiction Rabbit book -Using posters, talk about what it means to be an omnivore, herbivore, or a carnivore -Complete sort as a class or in small groups -Complete worksheet
Friday	Rabbit Fact Book -Read a nonfiction Rabbit book -Review rabbits by completing Rabbit PowerPoint again -Have students complete Rabbit Fact Book. You can either use the page that has facts written out OR have students write their own facts.

Domesticate

To keep a rabbit as a pet.

Bell Ears

Large, heavy-tipped ears that fall.

Buck

An adult male rabbit.

Doe

An adult female rabbit.

Kit

A baby rabbit.

Fleece

The wool of a rabbit.

Hind Leg

One of the two back legs.

Litter

A group of kits from the same doe.

Rabbitry

A place where rabbits are kept or raised.

Burrow

A hold or tunnel dug by a small animal as a home.

Herbivore

An animal that feeds on plants.

Rabbits and Hares

How are they similar and different?

The gestation period for rabbits and hares is about a month. Each litter has three to eight babies.

Baby rabbits are called kittens
or bunnies. Baby hares are
called leverets.

A baby rabbit is born hairless and completely blind. A baby hare has fur and sight and can move on their own an hour after being born.

Hares are larger than rabbits and have longer hind legs.

Both rabbits and hares
have short tails.

A rabbit's fur stays the same color all year, while a hare's fur changes from brown or gray in the summer to white in the winter.

Both rabbits and hares are herbivores.
Rabbits tend to eat softer grasses
and vegetables, while hares like to eat
harder bark and twigs.

Rabbits live in burrows underground and hares make nests above ground.

Rabbits can be domesticated
and kept as pets, while hares
remain wild.

Rabbits are social animals that live in groups called colonies. Hares spend the majority of their time alone.

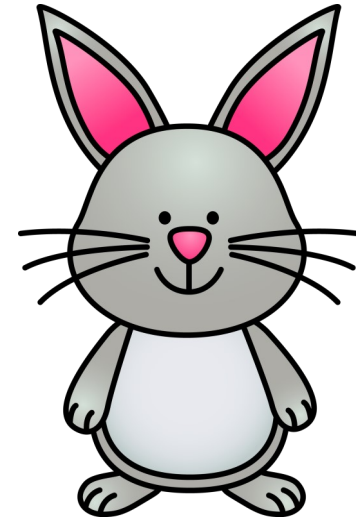

Rabbits escape danger by going underground. Hares escape danger by running fast.

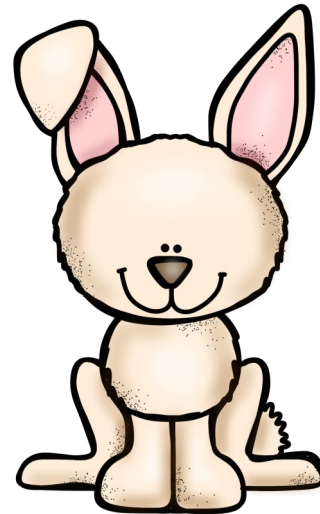

Both rabbits and hares are considered pests to farmers and gardeners because they can destroy crops and trees.

North America.

Rabbits live in meadows, woods,
forests, grasslands, deserts, and
wetlands.

Parts of a Rabbit

A female rabbit is called a doe and a male rabbit is called a buck. A baby rabbit is called a kit.

All rabbits except for cottontail rabbits live in underground burrows.

Rabbits live in groups called colonies.

Rabbits can weigh anywhere
from 2-24 pounds.

Rabbits have long ears that are about 4 inches long.

Rabbits have short tails.

Rabbits are herbivores. They eat grass, clovers, wild flowers, and farm crops.

Rabbits only sweat on the pads of their feet .

Rabbits are most active at dawn and dusk. They eat around dusk.

Rabbits have a lifespan of
around 10 years.

Rabbits have 2-3 litters per year. Each with 4-6 babies.

A rabbit has 28 teeth. They
never stop growing.

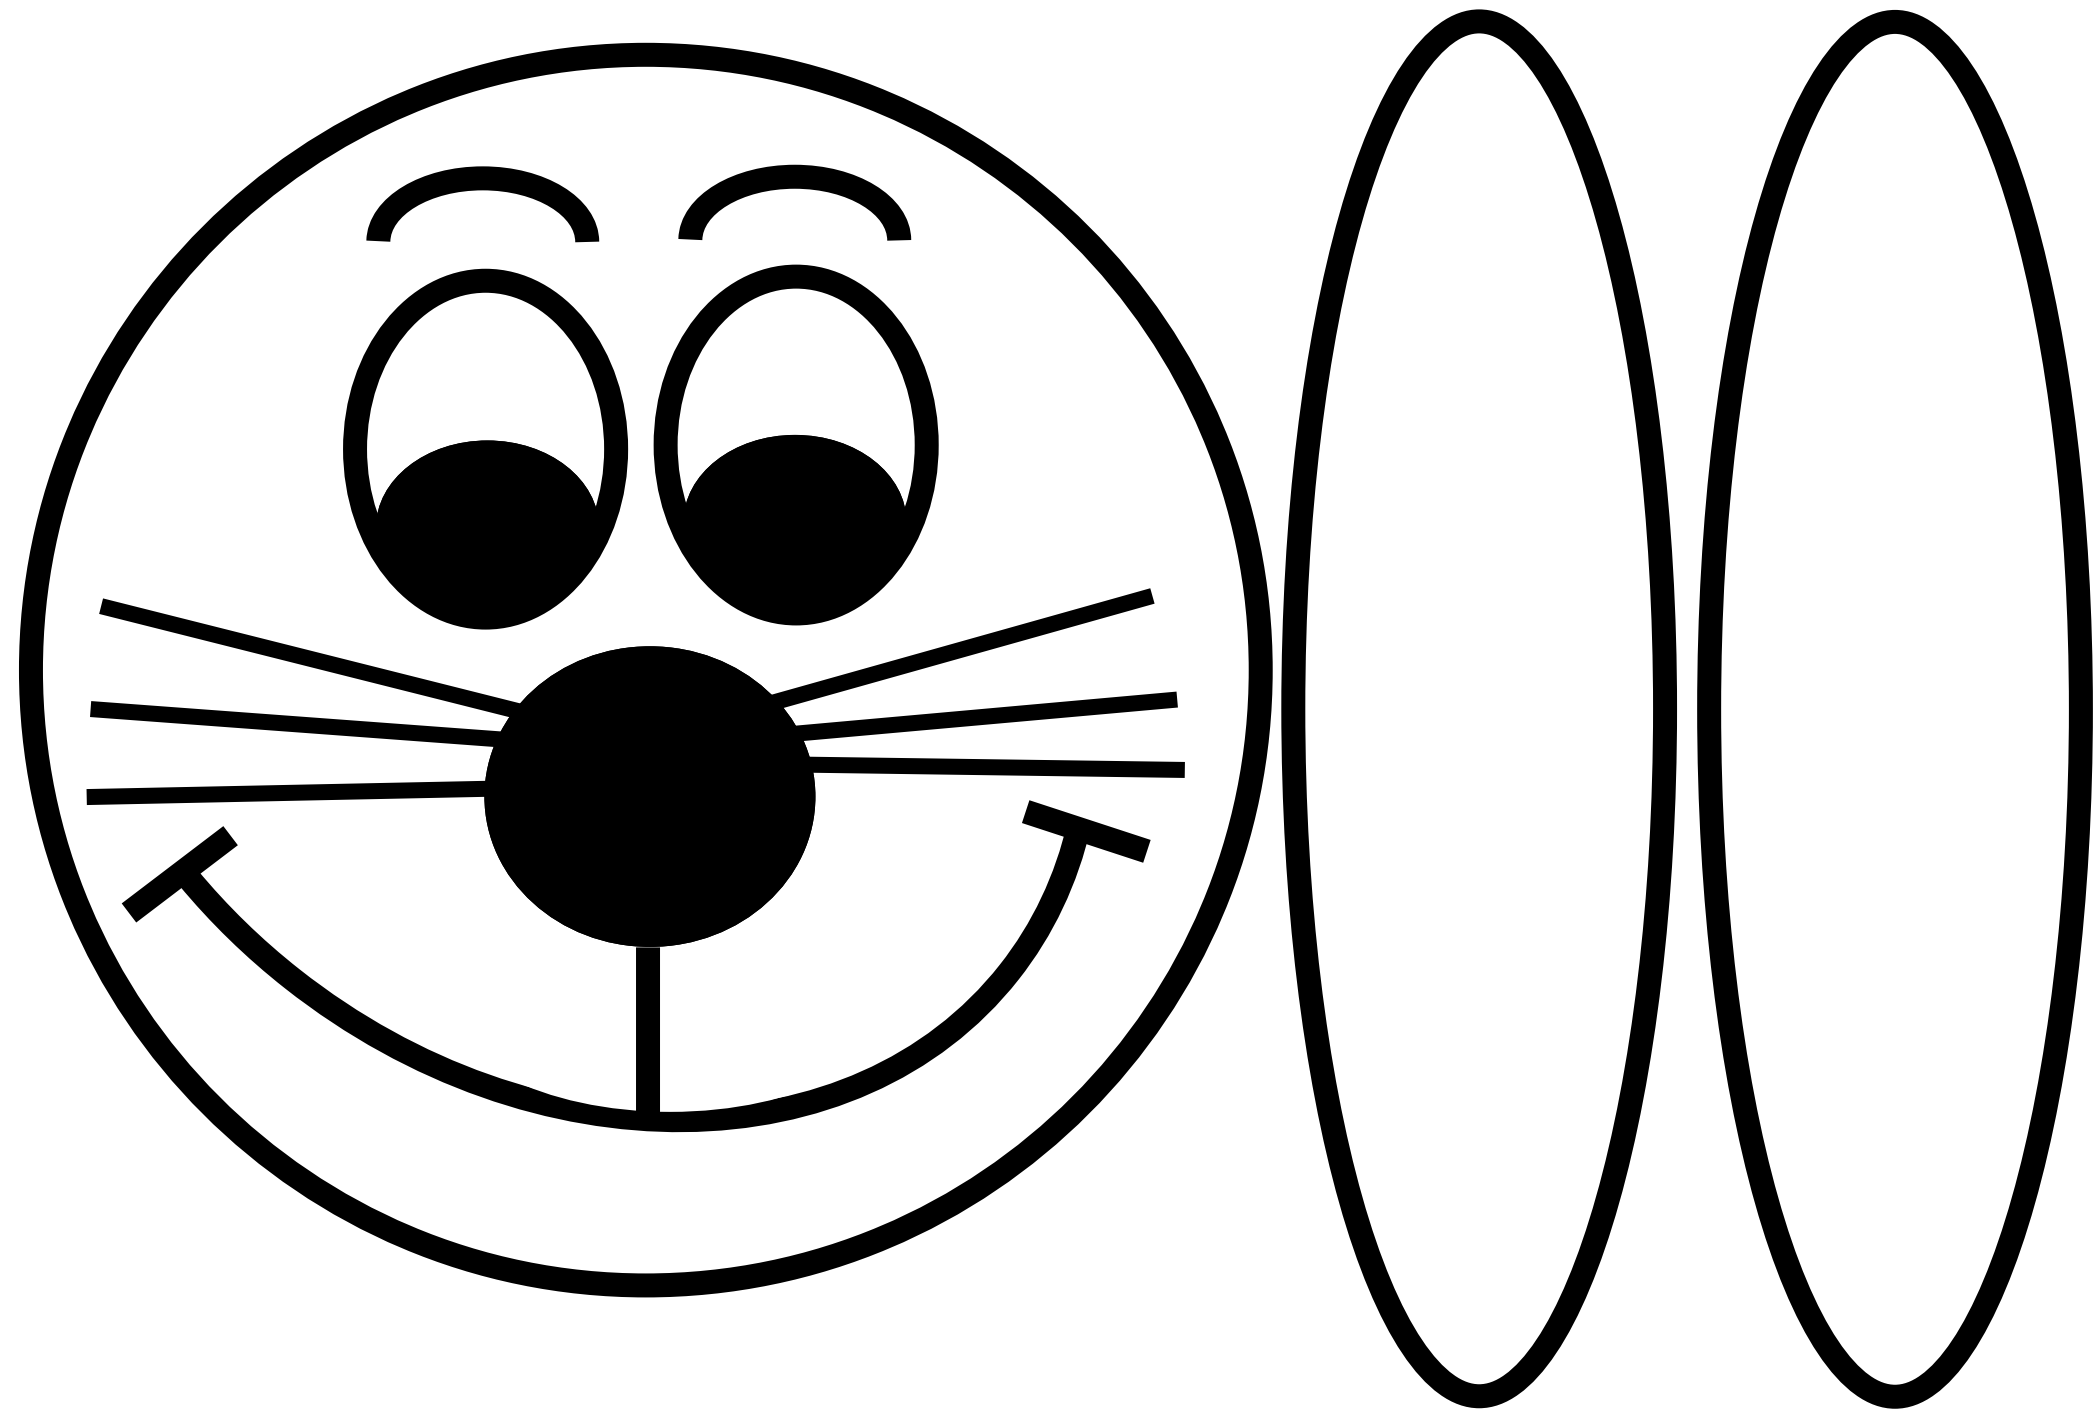

Many people have rabbits for
pets.

Foxes, bobcats, dogs, and
owls are predators of
rabbits.
