

Commotion In The Ocean

By Giles Andreae &
David Wojtowycz

There is a curious
commotion
At the bottom of the Ocean
I thought we ought to take
a look.

You'll find every sort of
creature
That lives beneath the sea
Swimming through the pages
of this book.

But can you see beneath the
wrecks
And in-between the rocks?
Let's see if we can find
who's hiding there...

Crabs

The crab likes walking sideways
And I think the reason why,
Is to make himself look sneaky
And pretend that he's a spy

Turtles

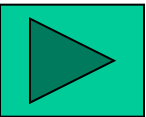

We crawl up the beach from
the water
To bury our eggs on dry land,
We lay a whole batch
And then when they hatch,
They scamper around on the
sand.

Angel fish

Hello, I'm the angel fish ,
darling,
The prettiest thing in the sea
What a shame there are no
other creatures

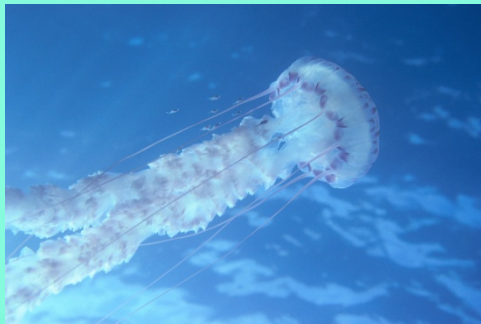

As gorgeous and lovely,
like me!

Wiggle!
Jiggle!

Jellyfish

The jellyfish just loves to jiggle
Which other fish think is quite dumb,
She knows that it's not all that
useful
But jigging's very good fun!

Shark

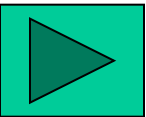

I swim with a grin to greet
you
See how my jaws open
wide,
Why don't you come a bit
closer?
Please take a good look
inside....

Yikes!!

Yikes!!

Octopus

Having eight arms could be
useful,
You may think that it looks a bit
funny,
But it helps me to hold all my
children
And tickle each one on the
tummy.

Lobster

Never shake hands with a
lobster
It isn't a wise thing to do,
With a clippety-clap
And a snippety snap
He would snip all your fingers
in two.

Deep Sea

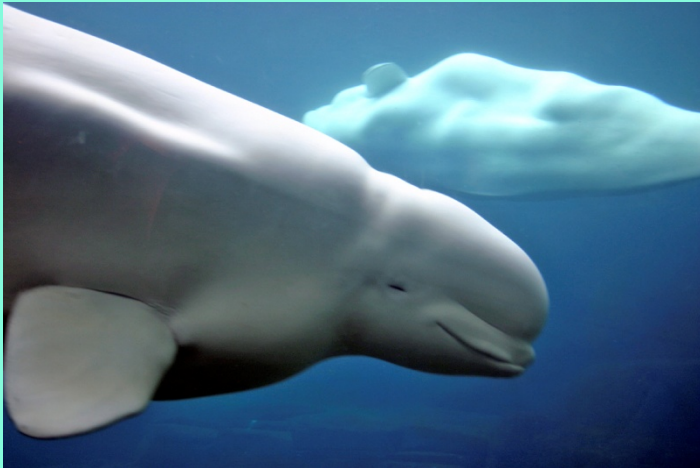

Miles below the surface
Where the water is dark and deep,
Live the most amazing creatures
That you could ever meet.

There are fish of all descriptions,
Of every shape and size,
Some have very pointy teeth
And great big bulbous eyes.

Some of them can walk around
And balance on their fins,
But the strangest fish of all
Have glowing whiskers on their chins!

Blue Whale

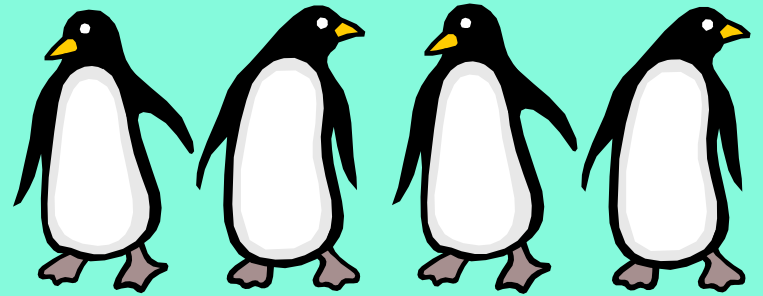

There's no other
beast on the planet
As big as the giant
blue whale,
He measures a
massive one hundred
feet long
From his head to the
tip of his tail.

Penguins

**We waddle about on
our ice bergs,
Which makes our
feet slither and
slide,
And when we get
close to the water
We leap with a
splosh off the side.**

What a lot of creatures
We have seen beneath
the sea,
What a lot of funny
things they do.

Some of them might lick
their lips,
And eat you in one bite,
And some might want to
swim
around with you.

The dolphin's very friendly
And the lobster's very
fierce
But the shark is the most
Dangerous by far.

Can you name the other
friends
We've met along the way,
See if you can tell me who
they are?
