

Build a Sentence

Reading Puzzles

Build a Sentence

For this activity, you will need paper cups and markers.

Write the words of a sentence on the cups. One word per cup. This could be a sentence you have thought of or a sentence from a book or story.

Now, mix the cups so that they are out of order and stack them.

Then ask your child to take the stack and line up the cups in order to build a sentence. They will probably have to try

multiple times to rearrange the cups, but that's where all of the reading practice comes in. Once they have solved the sentence, they can mix them up and stack the cups again. You can replay this game many times and of course create new sentences or add to existing stacks.
