

COVID-19

If you, your child or anyone living in your household have any of the following symptoms you should not come to school or come into the school building to tell us. Telephone instead.

- ✓ **The first signs of the coronavirus are a fever and a new, dry continuous cough – this means you've started coughing repeatedly**
- ✓ **The high temperature (fever) – you feel hot to touch on your chest or back**

After about a week, this develops into shortness of breath and breathing difficulties very like flu

If one person in your house has any of these symptoms, the whole family should stay home.

- 🌐 **Stay at home for 14 days if you have either.**
- 🌐 **Do not go to a GP surgery, pharmacy or hospital.**
- 🌐 **You do not need to contact 111 to tell them you're staying at home. Do contact emergency services if your condition deteriorates.**
- 🌐 **Testing for coronavirus is not needed if you're staying at home.**
