

Look and remember game. Collect the items - they do not have to be exact matches: any key, any peg etc. Start with the 2 item pages. Cut and show one strip e.g. key/peg. Point to the green line and say *this is first*. If you name both items in order slowly, this is the easiest way. Then you can try just by pointing to the items in order left-right. Hide the card. Child must line up the items for you. Show the card and give a counter if correct. You get the counter if there's a mistake. It is important to find the first one first! Cut this page into cards with 2 items per card (with the green line on the left). Let the child tell you later - check he/she begins listing the items from the left!

Cut off empty column. Cut into rows of 3 items.

Cut into rows of 4 items.
