Unit 4

Looking After Your Bike

A bike is a machine.

All machines need to be looked after carefully.

Tips for looking after your bike

Clean and dry your bike when it is wet or muddy. This will stop it getting rusty.

Ask someone to help you to check the brakes. The brakes are very important for your safety.

Be sure that there is enough air in the tyres. When the tyres are soft or flat it is more difficult to keep your balance.

Make sure the seat is at the correct height for you. You should be able to touch the ground with both feet. When you stop you don't want to topple over!

Always wear your helmet when you ride your bike. If you fall off your head must be protected.

Be proud of your bike, and be proud of the way you ride it!

Do you remember?

Copy these sentences.

Fill each gap.

2. Good brakes are important for your _____.
3. You might fall off if your tyres are _____.
4. You might topple over if you can't touch the _____.
5. You wear a helmet to protect your _____.

2. Why are brakes very important?
3. How can you tell if your seat is the correct height?
4. What might happen if your seat was too high?

One day Gran made a gingerbread man for the children. As she opened her oven, up jumped the gingerbread man and off he ran.

"Stop, stop," called the cat.

"Let's have a chat."

"Oh no, not me.

No one's eating me for tea," he shouted, and on he ran.

On and on ran the little man.

"Stop, stop," called the bird. "Let's have a word."

"Oh no, not me.

No one's eating me for tea," he shouted, and on he ran.

On and on ran the little man.

But then the gingerbread man came to a big, wide lake.

"I can help," said the old fox.

"I will carry you across the lake."

"Sit on my tail," said the old fox.

"Sit on my back," said the old fox.
