[illegible]

Old Mother Hubbard

This is part of an old nursery rhyme which has been known for over two hundred years.

She went to the tailor's
To buy him a coat;
When she came back
He was riding a goat.

She went to the hatter's
To buy him a hat;
When she came back
He was feeding her cat.

She went to the barber's
To buy him a wig;
When she came back
He was dancing a jig.

She went to the cobbler's
To buy him some shoes;
When she came back
He was reading the news.

Old Mother Hubbard and her Dog is quite a long rhyme. In each verse the dog does more and more extraordinary things.

- 1 Why does Mother Hubbard go to the tailor's?
- 2 Why was Mother Hubbard surprised when she came back from the tailor?
- 3 How was the Dog helpful when Mother Hubbard went to the hatter's?
- 4 What was stuck in the Dog's hat?
- 5 What did Mother Hubbard buy at the barber's?
- 6 What does a cobbler sell?
- 7 Make a list of all the animals that appear in the pictures.

- 1 When he had his hat on, what did the Dog do to show he was happy?
- 2 a) What do you think was the most amazing thing the Dog did?
b) Why do you think this was the most amazing thing he did?
- 3 a) If you were Old Mother Hubbard, what would you buy the Dog next?
b) Why would you choose this particular thing for the Dog?
- 4 Describe how these old illustrations are different from pictures in books today.

1 Round to the nearest ten:

- (a) 157 (b) 214 (c) 386 (d) 93 (e) 485
(f) 78 (g) 541 (h) 909 (i) 496 (j) 202

Along the beach, there are
178 striped crabs and
54 spotted crabs.

178 is about 180.
54 is about 50.
 $180 - 50 = 130$,
so there are about 130
more striped crabs than
spotted crabs.

2 Estimate.

- (a) $163 - 47$ (b) $246 - 29$ (c) $377 - 32$
(d) $128 + 43$ (e) $71 + 109$ (f) $254 + 26$
(g) $189 - 61$ (h) $251 - 48$ (i) $167 + 33$

5

Verbs

Doing words are called **verbs**.

The tiger **hides** in the bushes.

Verbs tell us what someone or something is **doing**.

Practice

Write a sentence and say what the children are doing in each picture.

Use the verbs from the box to help.

eating jumping flying sleeping crying reading

Do it like this: 1. The boy is reading.

1.

2.

3.

4.

5.

6.

Making sure

Match up the nouns with the verbs to say how different animals move.

Do it like this: Fish swim.

Nouns

1. Fish
2. Birds
3. Snakes
4. Snails
5. Mice
6. Elephants
7. Horses
8. Lions

Verbs

- slither.
- scamper.
- gallop.
- swim.
- prowl.
- slide.
- fly.
- lumber.

Week 5
13th October

**shopping
scary**

Test Yourself

[illegible]

A night-time adventure

This is part of a picture story by Posy Simmonds, told through drawings and speech bubbles.

- 1 What sort of animal has the girl seen through the window?
- 2 Why does the animal look strange?
- 3 Why can't the little boy see this strange animal?
- 4 What do the children put on before they go downstairs?
- 5 What is the name of the cat?
- 6 What is the name of the cat's owner?
- 7 Why is the little boy surprised when he sees the cat?

- 1 a) What do you think is the little boy's favourite cuddly toy?
b) How can you tell this is his favourite toy?
- 2 What does the girl say that shows you she wants the boy to be quiet?
- 3 What do the two children do so that they don't make a noise?
- 4 Why do you think the children are being so quiet?
- 5 Why can the little boy see out into the garden when he is downstairs?
- 6 Why is the cat cross?
- 7 Why does the writer put some of the words in **CAPITAL** letters?

- 1 Round to the nearest hundred: (a) 360 (b) 236 (c) 145
(d) 858 (e) 450 (f) 948

There are 382 pistols and 131 muskets in the sunken galleon.

382 is about 400. 131 is about 100.
Altogether there are about 500 guns.

- 2 Estimate (a) $111 + 261$ (b) $130 + 319$ (c) $175 + 237$
(d) $422 + 190$ (e) $340 + 372$ (f) $306 + 296$

There are 412 swords and 187 daggers in the galleon.

412 is about 400. 187 is about 200.
There are about 200 more swords than daggers.

- 3 Estimate

- (a) $292 - 135$ (b) $717 - 575$ (c) $186 - 124$
(d) $650 - 410$ (e) $581 - 229$ (f) $999 - 878$

UNIT 4

Proper Nouns

Names of people are a special kind of noun.
They are called **proper nouns**.
Proper nouns always begin with a **capital letter**.

Practice

Write the names of these characters from famous stories. Begin each with a capital letter.

cinderella

goldilocks

paddington bear

little boy blue

red riding hood

jack

Making sure

The names of the days and months are also proper nouns. They begin with capital letters.

1. Write the names of the days correctly.
Put them in the right order.

monday thursday saturday
wednesday sunday friday tuesday

Here are the names of the first
six months of the year.

2. Write the names of these months
in the correct order.

March June January April February May

3. Now write the names of the last six months of the year
in the correct order.

[illegible]

Billy and Belle

This page from a picture story by Sarah Garland has some sentences of text as well as the pictures and speech bubbles.

Mum and Dad were going to the hospital.

Billy and Belle were going to school with Mrs Plum, the school secretary.

- 1 a) Where are Mum and Dad going?
b) How are Mum and Dad going to get there?
- 2 Why are they going there?
- 3 Where are Billy and Belle going?
- 4 a) What is the name of the woman who is taking Billy and Belle there?
b) What job does she do?

Look carefully at the pictures. Look at what the different people are doing.
Notice what the different people say to each other.

- 1 How can you tell that Mum will miss Belle?
- 2 How can you tell that Mum will be away from home for some time?
- 3 How can you tell that Dad is ready for a new baby in the house?
- 4 How can you tell that Billy is interested in the new baby?
- 5 How can you tell that Billy is a little bit worried about his mother?

1 Find the number which can be

(a) added to

46341.

(b) added to

318253.

to give

49341.

to give

718253.

(c) subtracted
from

58238.

(d) subtracted
from

752392.

to give

38238.

to give

712392.

2 (a) Which two of these numbers add to make 1 million?

100 550

397 450

601 550

102 550

398 450

(b) Which two of these numbers have the smallest difference?

UNIT 2

Asking Questions

A **question** is a special kind of sentence. We ask **questions** to find out things.

A question begins with a **capital letter** and ends with a **question mark**.

Practice

Write these questions correctly.

Put in the capital letters and question marks.

1. when is your birthday
2. where do you live
3. who is your teacher
4. what number comes before twenty
5. why do you go to school

Now write a sensible answer for each question.

Making sure

Write each question correctly.

1. what is Sam wearing
2. who is Sam with
3. where are the boys going
4. how did they get to the shop
5. what can they buy in the shop
6. when does the shop close

Use the picture to help you write an answer for each question.

Now make up two questions of your own about the picture.

Times Tables worksheet

Name: _____

$1 \times 3 = \underline{\quad}$

$1 \times 4 = \underline{\quad}$

$11 \times 3 = \underline{\quad}$

$1 \times 10 = \underline{\quad}$

$9 \times 2 = \underline{\quad}$

$2 \times 3 = \underline{\quad}$

$2 \times 2 = \underline{\quad}$

$7 \times 10 = \underline{\quad}$

$4 \times 5 = \underline{\quad}$

$9 \times 3 = \underline{\quad}$

$8 \times 3 = \underline{\quad}$

$5 \times 4 = \underline{\quad}$

$9 \times 2 = \underline{\quad}$

$10 \times 2 = \underline{\quad}$

$12 \times 10 = \underline{\quad}$

$5 \times 10 = \underline{\quad}$

$4 \times 4 = \underline{\quad}$

$6 \times 3 = \underline{\quad}$

$3 \times 5 = \underline{\quad}$

$11 \times 2 = \underline{\quad}$

$5 \times 2 = \underline{\quad}$

$11 \times 3 = \underline{\quad}$

$3 \times 4 = \underline{\quad}$

$1 \times 4 = \underline{\quad}$

$4 \times 4 = \underline{\quad}$

$3 \times 10 = \underline{\quad}$

$9 \times 4 = \underline{\quad}$

$2 \times 10 = \underline{\quad}$

$10 \times 3 = \underline{\quad}$

$8 \times 10 = \underline{\quad}$

$3 \times 4 = \underline{\quad}$

$9 \times 4 = \underline{\quad}$

$9 \times 10 = \underline{\quad}$

$10 \times 10 = \underline{\quad}$

$5 \times 5 = \underline{\quad}$

$5 \times 2 = \underline{\quad}$

$8 \times 4 = \underline{\quad}$

$12 \times 5 = \underline{\quad}$

$3 \times 5 = \underline{\quad}$

$2 \times 2 = \underline{\quad}$

$2 \times 5 = \underline{\quad}$

$12 \times 10 = \underline{\quad}$

$1 \times 2 = \underline{\quad}$

$1 \times 5 = \underline{\quad}$

$2 \times 3 = \underline{\quad}$

$4 \times 2 = \underline{\quad}$

$3 \times 3 = \underline{\quad}$

$11 \times 4 = \underline{\quad}$

$7 \times 3 = \underline{\quad}$

$7 \times 3 = \underline{\quad}$

$12 \times 5 = \underline{\quad}$

$4 \times 3 = \underline{\quad}$

$1 \times 3 = \underline{\quad}$

$6 \times 2 = \underline{\quad}$

$8 \times 5 = \underline{\quad}$

$12 \times 4 = \underline{\quad}$

$7 \times 5 = \underline{\quad}$

$9 \times 5 = \underline{\quad}$

$12 \times 4 = \underline{\quad}$

$3 \times 10 = \underline{\quad}$

$1 \times 5 = \underline{\quad}$

$3 \times 2 = \underline{\quad}$

$9 \times 5 = \underline{\quad}$

$8 \times 3 = \underline{\quad}$

$8 \times 4 = \underline{\quad}$

$4 \times 10 = \underline{\quad}$

$8 \times 10 = \underline{\quad}$

$4 \times 5 = \underline{\quad}$

$6 \times 5 = \underline{\quad}$

$12 \times 2 = \underline{\quad}$

$3 \times 3 = \underline{\quad}$

$5 \times 4 = \underline{\quad}$

$11 \times 10 = \underline{\quad}$

$10 \times 4 = \underline{\quad}$

$7 \times 4 = \underline{\quad}$

$10 \times 4 = \underline{\quad}$

$7 \times 10 = \underline{\quad}$

$6 \times 2 = \underline{\quad}$

$10 \times 5 = \underline{\quad}$

$10 \times 10 = \underline{\quad}$

$2 \times 5 = \underline{\quad}$

$4 \times 10 = \underline{\quad}$

$1 \times 2 = \underline{\quad}$

$6 \times 3 = \underline{\quad}$

$11 \times 5 = \underline{\quad}$

$5 \times 3 = \underline{\quad}$

$11 \times 5 = \underline{\quad}$

$7 \times 2 = \underline{\quad}$

$2 \times 4 = \underline{\quad}$

$12 \times 3 = \underline{\quad}$

$5 \times 10 = \underline{\quad}$

$6 \times 4 = \underline{\quad}$

$11 \times 4 = \underline{\quad}$

$8 \times 5 = \underline{\quad}$

$9 \times 3 = \underline{\quad}$

$8 \times 2 = \underline{\quad}$

$11 \times 2 = \underline{\quad}$

$7 \times 5 = \underline{\quad}$

$2 \times 4 = \underline{\quad}$

$4 \times 3 = \underline{\quad}$
