

HOLLYBANK PRIMARY SCHOOL

School Development Plan

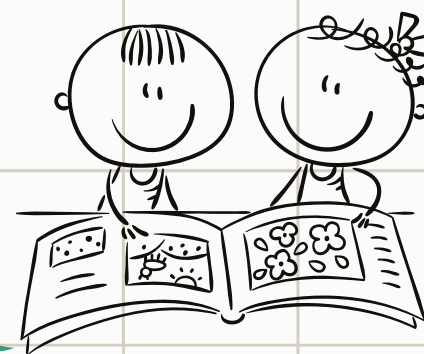

Together we can make our school better.

2025-2026

Literacy

Mrs O'Hara

What are we learning?

We're becoming better readers and writers through exciting new ways of learning that are just right for our age and stage.

Why is this important?

Reading and writing help us understand the world, share our ideas, and succeed in all our subjects. Good literacy skills help us learn everything else!

How can you help?

Pupils: Read every day, share your favourite books with friends, practise your writing, and don't be afraid to ask for help when you need it.
Parents: Read with your child daily, ask them about their books, encourage writing at home, and celebrate their progress.

What will success look like?

We'll all become confident readers who love books, strong writers who can share our ideas clearly, and we'll see reading and writing helping us in all our lessons.

Numeracy

What are we learning?

We're becoming confident mathematicians by practising our number skills every day and learning maths in exciting new ways that help us really understand.

Why is this important?

Strong maths skills help us solve problems, understand the world around us, and feel confident with numbers in everyday life.

How can you help?

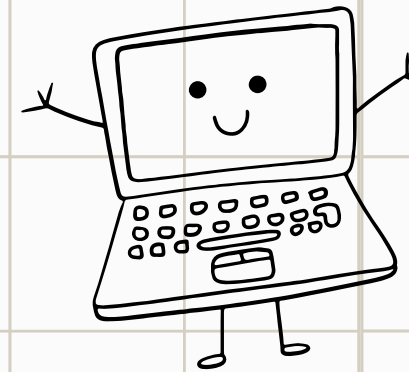

Pupils: Practise your number facts on 'Winning with Numbers' every day, ask questions when you're unsure, and help your friends with their learning.
Parents: Ensure your child completes 'Winning with Numbers' at home daily, point out maths in daily activities like cooking or shopping, and celebrate your child's mathematical thinking.

What will success look like?

We'll know our number facts quickly and confidently, understand how maths connects to real life, and feel excited about solving mathematical problems.

Digital Skills

Miss Taylor

What are we learning?

We're learning how to use technology safely and creatively to help with our learning across all subjects.

Why is this important?

Digital skills help us learn better, stay safe online, and prepare for our future. Technology is everywhere and we need to know how to use it well!

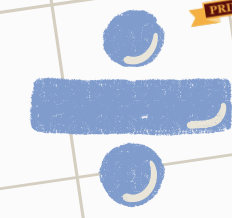

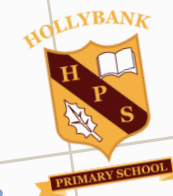

How can you help?

***Pupils:** Be curious about new technology, ask questions, help your friends, and always remember to be safe online.
***Parents:** Support your child's learning at home, ask them to show you what they've learned, and help them stay safe online.

What will success look like?

Our teachers will feel confident teaching us new digital skills, we'll have exciting new ways to learn, and we'll all become digital experts who can use technology safely and creatively.

Thank
You
