

**IN THE COMING WEEKS** the permanent perimeter fencing will be erected. Drainage works will continue as will the superstructure blockwork. Site ductwork will commence. Groundworks, including removal of waste soil, will continue from the site. The primary roof covering will also be installed.

## PROGRESS UPDATE

**OVER THE PAST MONTH** we completed the installation of a state of the art attenuation tank. All the subfloor drainage and make up has now been completed, and hollow core floor slabs positioned. The structural steelwork has been erected and the superstructure blockwork, and external foul and storm drainage have commenced.

## CHAMPIONING THE ENVIRONMENT

This project is registered with BREEAM, a scheme which independently measures sustainable performance, quality and environmental impact. It ensures and proves that the development meets the highest sustainability standards, responsibly and efficiently.

Martin and Hamilton continues to lead the construction industry in their commitment to the environment & battling climate change. One example is the purchase of electric vehicles. Pictured is our new ecofriendly Merlo eWorker 25.5 telehandler, offering a zero-emissions solution to work in confined spaces.

## HOW ARE WE DOING?
