

Sensory Rooms

This very special resource helps support children with specific sensory needs, or children who require quiet time to help them calm their emotions.

However, all of our children have access to our sensory rooms for purposeful sensory exploration.

Our sensory rooms are also used during story time to help provide children with greater sensory experiences.

Extra resources have been developed with specific stories in mind.

Stories can be brought to life by creating a certain atmosphere, through lighting, scents, music and other sensory items available in the room.
