

Week Beginning:
6th February 2023

Home Learning Ideas

Personal, Social + Emotional

*This week 6-10th February is Place2Be's Children's Mental Health Week 2022.

The theme this year is "Let's Connect."

-See Activities throughout the week

Physical Development

* Blowing bubbles has so many benefits for young children; they are great for developing fine motor skills, gross motor skills and for visual tracking.

-You could twist a pipe cleaner into a heart wand and add a little red food colouring to washing up liquid for the bubble mixture.

Language Development

* "Guess How Much I Love You," is one of our favourite stories in Nursery. Click the link below to watch beautifully animated versions of the story on YouTube. Discuss the events in the story with your child.

Mathematical Experiences

* We are exploring lots of Valentine's Day colours this week-red, pink, and purple. You could ask your child to build towers with these colours using Lego or blocks. Ask questions-Can you build a tall red tower? Can you build a short purple tower? Or you could create patterns using the blocks. Red, pink, red, pink.... what comes next?

The Arts

* The children love sensory play and it holds their attention for a long time. You could make some red jelly slime. The children love being part of the making process.

-See Jelly Slime Recipe

The World Around Us

*Talk to your child about Valentine's Day and family traditions. It is a day to show the people in our life that we love them.

-See the picture cards and discuss together.
