

Week Beginning:

27th March 2023

Home Learning Ideas

Personal, Social + Emotional

*We are learning about New Life in Spring and how animals and insects grow and change e.g. caterpillars turn into butterflies. You could look at some baby photographs with your child. Discuss how they have changed since they were born.

Ask questions:

What can you do now that you could not when you were born?

Physical Development

* Children love to mark make with a wide range of materials. You could encourage your child to mark make/write with the "Easter Bunny's Pen." All you need is carrots and some orange paint. Model how to make different marks on paper with the carrots.

Language Development

* We are learning all about signs of Spring. Here is a link to a lovely Spring story.

Click Link: [Guess How Much I Love You: Short Cut "Scents of Spring"](#)

Mathematical Experiences

* You could cut out some paper 2d shapes in different colours. Discuss the different shapes with your child. Encourage your child to create a Spring Flower shape picture. Can they name any of the shapes they used to create their picture?

The Arts

*You could use kitchen items (corn, oats) and small world farm figures to make your own sensory tray. This is a great way to encourage imaginative play, promote language skills and develop vocabulary linked to the Farm topic.

-See the Farm Sensory Bin sheet for ideas

The World Around Us

*We are learning about the signs of Spring in Nursery. You could look for signs in the garden or go on a Spring Walk with your child.

-See the Spring Hunt Checklist.
