## Personal, Social and Emotional Development

We want the children at our nursery to be safe and happy and to develop independence and confidence in their own abilities. We hope that during this year, the children will learn to:-

Come into the nursery school happily and remain settled all session.

Share the equipment fairly.

Play co-operatively with others.

Learn to play games and take turns.

Improve their concentration levels and learn to persevere when acquiring a new skill.

Work and play as part of a class and be ready to start primary school in the following year.

## Outdoor Classroom

We had had a huge focus on developing our outdoor classroom for the last number of years including developing a new 'Secret Garden' for the children to learn in. Our staff and children have taken part in a Forest School program which has enhanced our outdoor provision and led to a great deal of learning happening outside.
