Mobile Technologies Policy

Mobile technology devices may be a school owned/provided or privately owned smartphone, tablet, notebook / laptop or other technology that usually has the capability of utilising the school's wireless network. The device then has access to the wider internet which may include the school's learning platform and other cloud-based services such as email and data storage.

The absolute key to considering the use of mobile technologies is that the pupils / students, staff and wider school community understand that the primary purpose of having their personal device at school is educational and that this is irrespective of whether the device is school owned/provided or personally owned. The mobile technologies policy should sit alongside a range of policies including but not limited to the Safeguarding Policy, Bullying Policy, Acceptable Use Policy, policies around theft or malicious damage and the Behaviour Policy.

Potential Benefits of Mobile Technologies

Research has highlighted the widespread uptake of mobile technologies amongst adults and children of all ages. Web-based tools and resources have changed the landscape of learning. Students now have at their fingertips unlimited access to digital content, resources, experts, databases, and communities of interest. By effectively maximizing the use of such resources, schools not only have the opportunity to deepen student learning, but they can also develop digital literacy, fluency and citizenship in students that will prepare them for the high-tech world in which they will live, learn and work.

Considerations

There are a number of issues and risks to consider when implementing mobile technologies, these include; security risks in allowing connections to school network, filtering of personal

devices, breakages and insurance, access to devices for all students, avoiding potential classroom distraction, network connection speeds, types of devices, charging facilities, total cost of ownership

The use of mobile technologies brings both real benefits and challenges for the whole school community and the only effective way for a school to implement these successfully is to involve the whole school community from the outset.

- The school Acceptable Use Agreements for staff, pupils/students and parents/carers will give consideration to the use of mobile technologies
- The school allows:

	School Devices			Personal Devices		
	School owned and allocated to a single user	School owned for use by multiple users	Authorised device ¹	Pupil/Student owned	Staff owned	Visitor owned
Allowed in school	Yes	Yes	Yes	No	Yes	Yes
Full network access	Yes	Yes	Yes	No	No	No
No network access				Yes	Yes	No

- **The school has provided technical solutions for the safe use of mobile technology for school devices/personal devices:**
 - Appropriate access control is applied to all mobile devices according to the requirements of the user (e.g. Internet only access, network access allowed, shared folder network access)
 - For all mobile technologies, filtering will be applied to the internet connection and attempts to bypass this are not permitted
 - *All school devices are subject to routine monitoring*

Users are expected to act responsibly, safely and respectfully in line with current Acceptable Use Agreements, in addition;

- Visitors should be provided with information about how and when they are permitted to use mobile technology in line with local safeguarding arrangements
- Users are responsible for keeping their device up to date through software, security and app updates. The device is virus protected and should not be capable of passing on infections to the network
- Devices must be in silent mode on the school site
- School devices are provided to support learning
- The changing of settings (exceptions include personal settings such as font size, brightness, etc...) that would stop the device working as it was originally set up and intended to work is not permitted
- The software / apps originally installed by the school must remain on the school owned device in usable condition and be easily accessible at all times. From time to time the school may add software applications for use in a particular lesson. Periodic checks of devices will be made to ensure that users have not removed required apps
- The school will ensure that school devices contain the necessary apps for school work. Apps added by the school will remain the property of the school and will not be accessible to students on authorised devices once they leave the school roll
- Users should be mindful of the age limits for app purchases and use and should ensure they read the terms and conditions before use
- Users must only photograph people with their permission. Parental permission must be granted before photographing children. Users must only take pictures or videos that are required for a task or activity. All unnecessary images or videos will be deleted immediately
- Devices may be used in lessons in accordance with teacher direction
- **Staff owned devices should not be used for personal purposes during teaching sessions, unless in exceptional circumstances**
- Printing from personal devices will not be possible

When personal devices are permitted:

- *All personal devices are restricted through the implementation of technical solutions that provide appropriate levels of network access*
- *Personal devices are brought into the school entirely at the risk of the owner and the decision to bring the device in to the school lies with the user (and their parents/carers) as does the liability for any loss or damage resulting from the use of the device in school*
- *The school accepts no responsibility or liability in respect of lost, stolen or damaged devices while at school or on activities organised or undertaken by the school (the school recommends insurance is purchased to cover that device whilst out of the home)*
- *The school accepts no responsibility for any malfunction of a device due to changes made to the device while on the school network or whilst resolving any connectivity issues*
- *The school is not responsible for the day-to-day maintenance or upkeep of the users personal device such as the charging of any device, the installation of software updates or the resolution of hardware issues*

This policy was developed by the Acting Principal, in conjunction with all staff and the Board of Governors. It will be reviewed every two years or when necessary, considering any new legislation.

Agreed at the Governors Meeting dated 18th October 2023

Signed: Mrs Sharon Mc Gleave (Chair of Governors)
