

## Welcome back to school!

Over the summer our new **School Zone** has been installed at the front of school. The School Zone is designed to:

- Improve front of school access and
- Reduce traffic at school gates which increases safety

The **School Zone** also aims to address safety concerns raised by parents in the SRTS survey conducted in 2021.

**94.3%** of respondents to the survey said they would support works at the front of school that improve student safety, putting pedestrians and cyclists first.

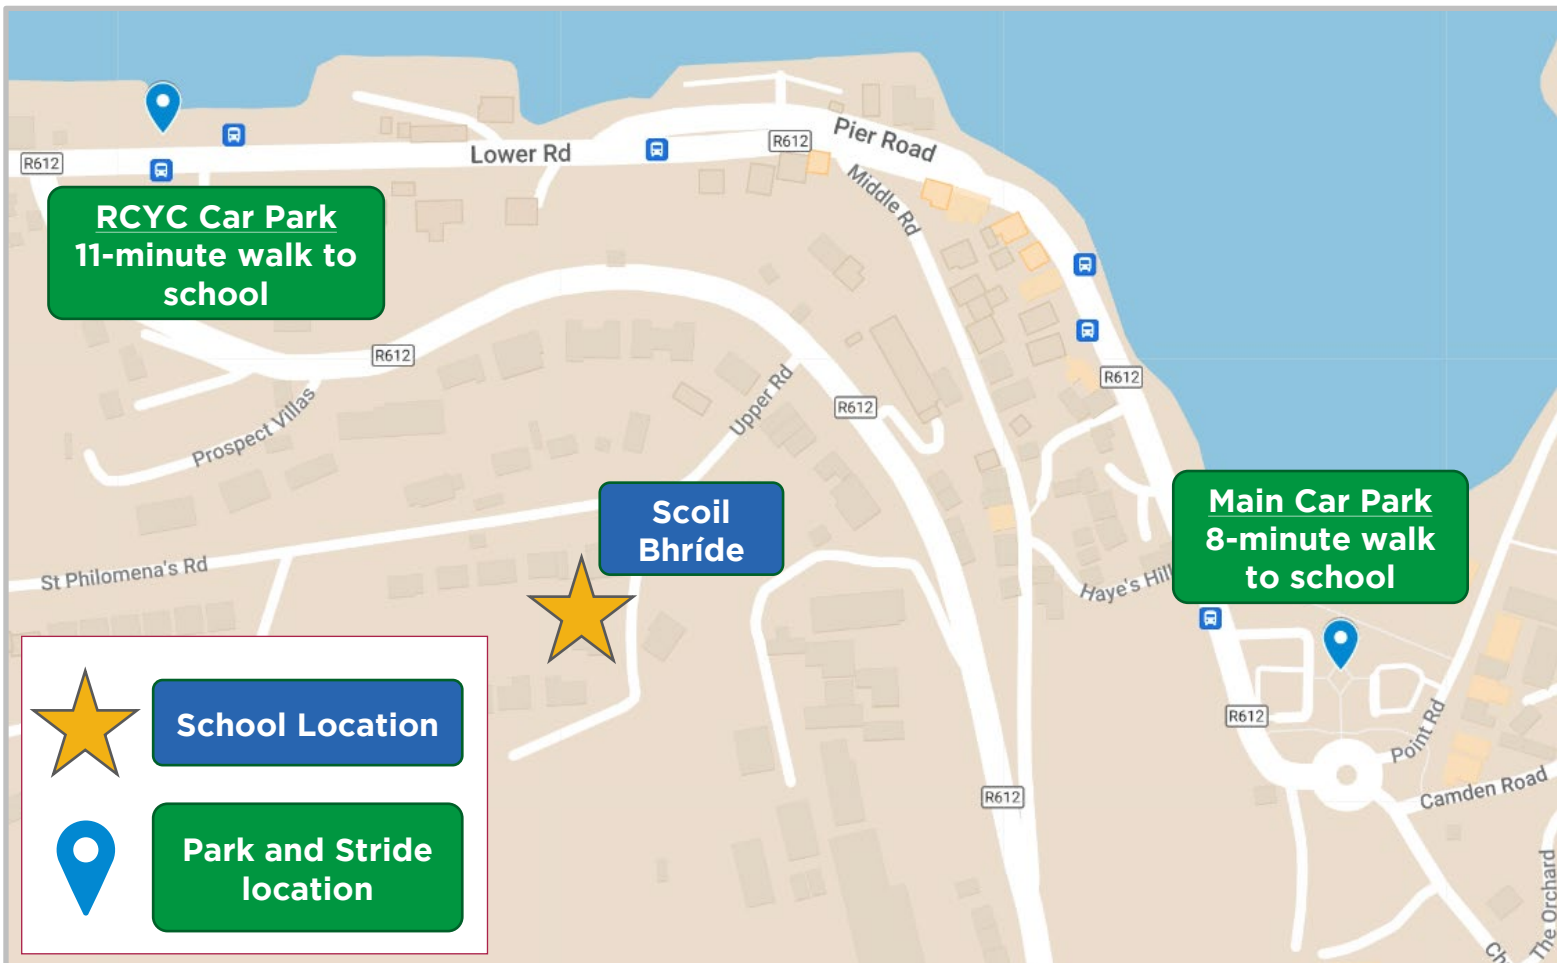

The School Zone includes colourful signage, pencil bollards, planters, and road markings to clearly mark the front of school area. Raised crossings and a bus bay have also been introduced. Improvements to routes along Hayes's Hill, Upper Road, and Middle Road, as well as improvements to pedestrian access entering the school will make the route to school safer and more pleasant.

Construction works underway in June 2024

## What can you do to help?

- Accompany and encourage the children to walk, scoot or cycle.
- Be extra vigilant of those walking, cycling and scooting to and from school.
- Adhere to the principle of the School Zone and minimise parking within it.
- Reduce your speed when passing through the School Zone.
- Use **Park and Stride** where possible.

Please make sure to **park respectfully, legally, and safely**, avoiding double yellow lines and being careful not to block footpaths, cycle lanes, or house entrances.
