Dear Hearing Board Members,

As I am sitting at my computer, I am coughing ...

I live on the Nipomo Mesa and am truly astounded that public health concerns are continually ignored by State Parks. And it is completely astonishing that officials who can do something about resolving this unique public health issue caused by the off-road riding in Oceano Dunes are sitting by letting pleasure and big corporate money take precedent over health. Additionally, regulatory mandates are being totally disregarded.

This. Can. Be. Resolved.

But the real health issue is being ignored by State Parks. Unfortunately, and most sadly, all evidence shows your Stipulated Order of Abatement continues to be given lip service by State Parks and is virtually being ignored. Input from the Scientific Advisory Group has been excluded. There is absolutely no rational thought that can even hint that State Parks has any intention of doing anything but obstruct, ignore, delay.

Therefore, I ask of you that you exercise your authority to hold State Parks accountable. ***Please take action on November 18*** that will finally bring State Parks into alignment, without question, such that the 500 acres deemed to be the minimum acreage necessary to resolve the dangerous air pollution will be remediated! In order to truly get them on board; to get their attention for real, please discontinue motor vehicle activity on the La Grande Tract, the source of most of the dangerous pollution, until such time as State Parks installs sufficient mitigation in the most emissive areas identified by the California Air Resources modeling to rectify its ongoing assault on public health and safety.

Respectfully submitted,

Dorothy Hines, Nipomo
