BETTER BREATHER ALERT

BLOWING DUST IS IMPACTING THE NIPOMO, PASO ROBLES AND ATASCADERO AREAS

FRIDAY, SEPTEMBER 6, 2020

SAN LUIS OBISPO, CALIFORNIA – The San Luis Obispo (SLO) County Air Pollution Control District (APCD) is advising the public of deteriorating air quality in the Oceano Dunes/Nipomo Mesa, Paso Robles and Atascadero areas due to blowing dust on Friday, November 6, 2020. Blowing dust is forecasted to occur from noon to 7 p.m., with the dust forecasted to peak from 1 p.m. to 6 p.m. Very sensitive individuals such as infants, as well as children and adults with existing respiratory or heart conditions, may experience adverse health effects during blowing dust periods.

SLO County APCD recommends that the public reschedule outdoor activities to occur when there is no visible dust. If blowing dust is visible in the air, SLO County APCD recommends all adults and children avoid strenuous outdoor activity, remain indoors as much as possible, and set any heating/air conditioning/ventilation systems to recirculation. The public is advised to consult their doctor if they are experiencing health problems in an area with blowing dust and sand.

SLO County APCD will continue to closely monitor air pollution levels throughout our region, as forecasts can change. Visit the APCD website slocleanair.org/air-quality/air-forecasting-map.php to see current air quality conditions and forecasts for SLO County. Sign up to receive the daily air quality forecast via email by visiting slocleanair.org/air-quality/forecasting.php.
