As a concerned senior citizen in the Trilogy Monarch Dunea community my wife and I are appealing to you to help stop any further development of the Oceanic Dunes to accommodate off road recreational vehicles. Not only would additional ATV activity threaten our air quality it would also endanger the precious wildlife that DESERVES to be protected. It is the morally right thing to do!!! Please make the correct decision and STOP any further development of the Dunes. The health of our current population and future generations thank you!

Respectfully,
Craig & Linda Walker
