<b>VOCs TOTALS:</b>		Gas:				Light Liquid:				Heavy Liquid:			

<b>Gas Wt% methane/ethane:</b>		<b>Light Liquid API Gravity:</b>		<b>Heavy Liquid API Gravity:</b>	
--------------------------------	--	----------------------------------	--	----------------------------------	--

- (1) Hydrocarbon gas/vapor stream. Excludes gas purchased from Public Utility. Provide data verifying wt% methane/ethane. Form is not complete without this data.
- (2) Light oil stream with an API gravity equal to or greater than 20 at 60°F. Provide recent data verifying API gravity. Form is not complete without this data.
- (3) Heavy oil stream with an API gravity less than 20 at 60°F. Provide recent data verifying API gravity. Form is not complete without this data.
- (4) The count should be consistent with I&M plans or the Air Toxics Hot Spots program plan/report.
- (5) Total Hours for each applicable device and stream must equal 8760 hours/yr. No component is considered leak-free. Non-leaking hours of operation are to be included in < 10,000.
- (6) Emission factors are from: Cal. Implementation Guidelines for Est. Mass Emissions of Fug. Hydrocarbon Leaks at Petrol. Facilities, Feb 1999, Table IV-2a.
- (7) To estimate VOCs multiply the No. of devices x Hours x Emfac for both non-leaking and leaking devices. In this form VOCs do NOT include methane or ethane.
- (8) Include all threaded connectors and tubing fittings, regardless of size.
- (9) An open-ended line is the end of any valve that can be opened to the atmosphere.
