To Whom It May Concern:

Unfortunately, I am unable to attend the October 14th meeting when the Hearing Board will receive the Oceano Dunes 2026 Annual Report and Work Plan. As a Nipomo resident, I would like to weigh in with what I've learned about the report.

1) I disagree with the plan to reduce the percentage of vegetation cover from 50% to 15%. Vegetation coverage is intended to mitigate particulate matter emissions which would hopefully improve our air quality.

2) I have learned that the CDF monitor has registered 31 state exceedances of clean air standards to date in 2026. Thirty-one exceedances are more than that experienced in 2023-25 and we're not even through the year yet. This doesn't seem like improvement to me and yet State Parks continues to slow down their efforts.

3) State Parks is not including the Oso Flaco monitor as part of their monitoring of particulate matter emitted per day. Oso Flaco has no riding in the vicinity so including it would seem to give a comparison which is needed to move State Parks to take more active action to mitigate particulate matter.

Thank you for forwarding my opinions to the Board,
Jean Baker
