Dear Hearing board members,

The proposed annual report and work plan is so vague and shows a real lack of action, direction and commitment.

There are no concrete deadlines and vagueness and the document is full of loopholes.

It is very disappointing that the 90 acres are not specified and nothing specific is laid out to the timely achievement of the SOA goals.

Again, as in many years that have passed it appears the damaging recreational vehicle activities

seem to take center stage while public health is still at stake.

It is time for specifics and deadlines about where the mitigation will take place and when?

Can be very soon. No more delays.

Regards,

Linda Reynolds
