**BETTER BREATHER ALERT**

**BLOWING DUST FORECASTED TO IMPACT THE NIPOMO AREA**

**WEDNESDAY, MAY 28 THROUGH SUNDAY, JUNE 1**

**SAN LUIS OBISPO, CALIFORNIA,** – The San Luis Obispo (SLO) County Air Pollution Control District (APCD) and County Public Health Department are advising the public of deteriorating air quality in the Oceano Dunes/Nipomo Mesa area due to blowing dust and sand from Wednesday, May 28, through Sunday, June 1. Blowing sand and dust is forecasted to occur from 11 am to 7 pm, with the dust forecasted to peak from 1 pm to 6 pm. Very sensitive individuals such as infants, as well as children and adults with existing respiratory or heart conditions may experience adverse health effects during blowing dust periods. Particulate matter concentrations are forecasted to be the highest on May 28, 30, 31 and June 1.

County officials recommend that the public reschedule outdoor activities to occur when there is no visible dust. If blowing dust and sand is visible in the air, County officials recommend all adults and children avoid strenuous outdoor activity, remain indoors as much as possible, and set any heating/air conditioning/ventilation systems to recirculation. The public is advised to consult your doctor if you are experiencing health problems in an area with blowing dust and sand. If staying indoors does not provide relief, temporarily leaving the area and going to a location where the sand is not blowing and dust is not visible, is advised.

County officials will continue to closely monitor air pollution levels throughout our region this week, as forecasts can change. The most current forecasted air quality index (AQI) is available on the website [http://www.slocleanair.org/air/AirForecasting\\_map3.php](http://www.slocleanair.org/air/AirForecasting_map3.php). The forecasted AQI is also available to the public via email. Sign up to receive the daily air quality forecast via email by visiting <http://www.slocleanair.org/air/AirForecasting.php>. A recorded message describing San Luis Obispo County air quality conditions is available by calling (805) 781-4390.
