I would like to provide my support of the board's closure of the dunes to off road vehicles .

The natural winds alone creates havoc on respiratory systems of residents in general . Add to that the pollution of controllable forces, off road vehicles, the situation intensifies. Affecting young developing lungs of children and worsening the those already at risk . The habitat of wildlife has also taken a toll .

This is not new information.Studies have proven the disadvantages to the public.

It's time for the local government to take care of the physical conditions of our residents here and stop favoring the out of towners who do minimal if anything to add to our well being.

Thank you in advance.

Sheila Consoli
