DEGIDI, ConoGrip Pliers // GLUCKMAN, PET Shields

18.06.2020

ConoGrip Pliers

Special pliers developed together with Dr. Marco Degidi for the Dentsply prosthetic system "Acuris".

This conometric fixing system needs special tools to remove crowns from the implant, as there is no screw or glue used to fix it to the abutment.

A unique shape, angulation and lever allows the efficient removal of the crowns.

Available in three different shapes.

Available from now on:

89-140-011 Upper

89-140-012 Lower

89-140-023 Upper/Lower

89-140-010 Silicone Inserts (10pcs.)

PET Shields

These tools are to be used as protective equipment for the gingiva, while preparing the buccal shield of the tooth during a Socket/PET surgery.

The shields will fit all standardized micro-blade holders.

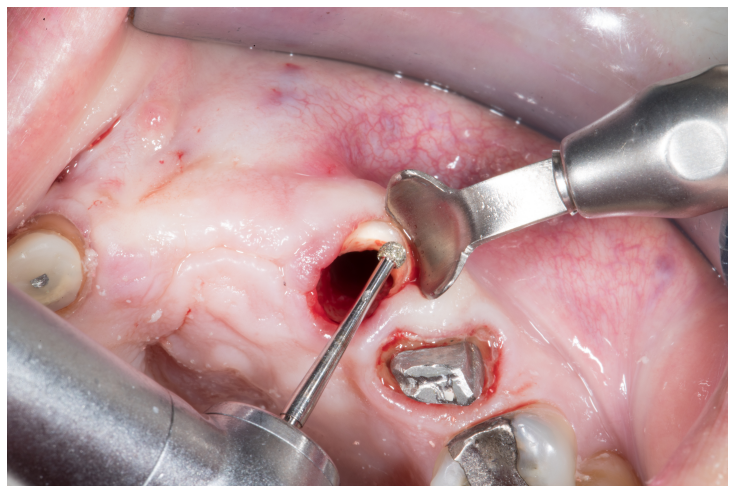

Developed with Dr. Howard Gluckman from South Africa.

Available from now on:

24-158-000 straight shield

24-158-001 right-angled shield

24-158-002 left-angled shield
