Bingli

Bingli helps doctors and patients to make consultations great again.

Bingli is an app that interviews the patient in preparation for the consultation and sends accurate information about the symptoms to the doctor. Thanks to Bingli, the patient is better prepared for the consultation and the doctor wins valuable time during the consultation.

Product: Bingli is a digital and smart medical interview with a specific solution for guard posts, especially for patients with new (or worse) complaints that are usually not known by the doctor (so there is no knowledge of antecedents, ...). Bingli helps the patient to fill in detailed information about the complaints as well as antecedents while waiting. This better information ensures that doctors, even if not present in the hospital (who can consult the information at home), can give faster and better care.

Looking to get in contact with hospitals with possible guard posts

Ectosense

Scalable solutions for the detection and treatment of sleep disorders

Product: We present the 'NightOwl', our diagnostic product to detect sleep apnea in a scalable way, but also treat it directly with positional therapy for the eligible patients. Within a Belgian context, the product - the size of a finger root and validated for its clinical accuracy - can also be used to monitor certain types of treatment for sleep apnea.

Looking to get in contact with institutes having a sleep labo

Epilog

Epilog's mission is to optimise patient diagnosis, support treatment decision and increase patient throughput by providing advanced and largely validated EEG diagnostic technology that is easily accessible to clinicians and hospitals.

Product: Epilog Diagnostic - Your assistant for efficient and consistent EEG diagnostics in epilepsy. Automated EEG analysis as a service to accelerate overnight and 24h EEG analysis.

Link website: <https://www.epilog.care/>

Looking to get in contact with hospitals performing overnight or 24h EEG analysis

Into.Care

into.care helps care organisations to improve the workflow, collaborate more effectively and connect more easily so you can focus on what really matters: qualitative patient care.

Product: into.care is a smart and mobile healthcare collaboration platform

Link website: <https://www.into.care/>

Looking to get in contact with residential care centers

Minze Health

Minze Health, located in Antwerp, develops medical equipment and services with a focus on urology. This is always based on comfort for the patient, user-friendliness for the doctor and a feasible / scalable business model.

Product: Minze proposes: an innovative and non-invasive method for the diagnosis and follow-up of urinary problems and incontinence. Minze Hospiflow, a uroflow meter for use on a normal toilet in a hospital or practice. Minze Homeflow, a uroflow meter with integrated plasma diary app for use at the patient's home. Both allow the patient to easily collect data about his urine behavior and the functioning of the pelvic floor in a familiar environment.

Looking to get in contact with hospitals having an urology, (uro-)gynecology or nephrology department.

NephroFlow

Optimize operational and medical processes of dialysis, for a better and more efficient patient care.

Product: NephroFlow's desktop and mobile work tools provide efficiency gains of up to 60 minutes per shift per nurse by eliminating the administrative burden, by promoting direct communication and by using real-time data. The platform also realizes proven gains in terms of patient safety, quality of care, cost reduction and job satisfaction.

Looking to get in contact with each institute looking for better data integration and visualization

Greygin (Play it Safe!)

GREYGIN enables people to learn procedures in a more fun, safer and more effective way through the use of games.

Product: Play it Safe is the standard when it comes to training safety and prevention procedures within the care-, production- and logistic sector through an accessible game-based learning platform which gives companies insight in their personnel's knowledge. Play It Safe! trains personnel 4x faster 30% better.
