MELIÁ CASTILLA HOTEL & CONVENTION CENTRE,
MADRID, SPAIN
1.30 - 3.30 PM
TAPICE 2, LOWER FLOOR

NEW APPROACHES TO THE UNDERSTANDING AND TREATMENT OF DENTINE HYPERSENSITIVITY

Thursday 19th September
1.30 - 3.30 PM, Tapice 2, Lower Floor

A CLINICAL PERSPECTIVE ON DENTINE HYPERSENSITIVITY: THE ROOT OF THE PROBLEM

Professor Nicola X. West

BDS, FDS, RCS (Eng), PhD, FDS (Rest Dent), FHEA
*Professor and Head of Restorative Dentistry and Periodontology,
University of Bristol, United Kingdom*

Dentine Hypersensitivity is a common condition which is increasing in prevalence. This talk will discuss the condition's aetiology before advising clinicians on how to accurately diagnose dentine hypersensitivity and guide their patients on appropriate treatment options.

DENTINE HYPERSENSITIVITY AND ITS IMPACT ON THE QUALITY OF LIFE

Prof Filippo Graziani

DDS, MClintDent(Perio), PhD
University of Pisa, Italy

The association of dentine hypersensitivity (DH) and Oral Health Related Quality of Life (OHRQoL) will be discussed. A patient-centred care approach will be introduced and why treatment of DH encompasses much more than the mechanical procedures available in daily dental practice.

THE PREVALENCE OF DENTINE HYPERSENSITIVITY IN EUROPE AND ITS IMPACT ON PERIODONTAL AND DENTAL HEALTH

Prof Virginie Monnet-Corti

DDS, PhD
Professor and Head of Periodontology Aix Marseille University, France

This talk will highlight the long impact of dentine hypersensitivity (DH) on patients daily hygiene practices, periodontal health, quality of life and aesthetics. DH prevention and treatment are key-factors for long-term good periodontal health.

PANEL DISCUSSION CHAIRED & MODERATED BY:

Prof Marjolaine Gosset

DMD, PhD
Professor of Periodontology, University Paris Descartes, France
