“Both SAP Business One and Vigor are important business partners. They are in our daily lives, we discuss every change with Vigor, and SAP Business One has become a cornerstone of our organization.”

Koen De Potter – CFO at Afix Group

Building on success with SAP Business One and Vigor

Scaffolding specialists Afix put their success down to Vigor and SAP Business One. Providing companywide visibility, better insights and processes that visibly benefit their customers' profits, Afix are scaling up across their industry.

OBJECTIVES

- Afix was experiencing a delay in reporting, with low visibility on stock levels.
- Every transaction was accruing high costs due to poor control.
- Afix required software that could consolidate data, enabling faster responses to their customers.

WHY SAP AND VIGOR

- SAP Business One integrates with multiple business processes, offering an all-in-one solution.
- Vigor has been an accelerator to Afix' success by implementing SAP Business One seamlessly across all countries.

BENEFITS

- Afix now use the same processes within all their offices, enabling them to work more efficiently and gain better insights across their entire operation.
- Stock levels are accurately reported.
- All data is stored in one centralized location, which Afix can share with their customers so they too can view all of their transactions, helping with profit margins.
- Afix's customer service and retention has gone from strength to strength.

**50% OF BUSINESS IS RENTAL
and SAP Business One tracks
every single transaction.**
