

PUNCH POWERTRAIN SOLAR TEAM

TEAM MANAGER

THE PROJECT:

The objective of the project is to build the eighth Belgian solar car and participate in the Bridgestone World Solar Challenge. You will have to build a competitive solar car to beat the best universities of technology in the world. You will go through the process of designing, building, testing and racing a race car together with a group of ambitious students. You will work together with numerous companies to develop new innovations. This project will help you become a state of the art engineer!

THE FUNCTION:

As Team Manager, your main focus is the group of people you work with. Their well-being and the atmosphere in your team is your responsibility. You will have to be both a people manager and a project manager.

As a people manager, you will establish a strong personal relationship with every team member and coach them to make sure they are comfortable and function maximally.

As a project manager, you will keep a general overview of the project and make sure that every decision is made to ensure a fantastic performance in Australia.

From start to finish you will face many challenges and will come across situations you have never encountered before. But together with your team, you will overcome them. You will need to be (come) a problem solver.

You will also be the main contact person for the KU Leuven and the organisation of the Bridgestone World Solar Challenge, meaning you always act professionally.

YOUR PROFILE:

Highly motivated teamplayer

Bachelor/master Engineering Technology or Bachelor/master of Engineering

Ability to work independently

OUR OFFER:

- Discover true engineering from concept to execution and measure up to the world class teams
- Graduate with more experience than any other engineering student
