

# LOGISTICS

## AGORIA SOLAR TEAM

### THE PROJECT

The main objective of the project is to **innovate** and **optimize** a solar car and participate in an international Solar Challenge. Your goal is to bring the solar car to the next level and make it even more competitive to win the world's most extreme solar car races and beat other solar car teams from all over the world. You will have to go through the process of **researching, designing, prototyping** and **testing** your systems together with a group of highly motivated, ambitious students. You will work together with numerous companies and a vast network of Solar team alumni to develop new innovations. This project will help you become a state of the art engineer!

### THE FUNCTION

It is quite a logistical challenge to get a solar car, a workshop and all the required materials through international customs. You are both technically aware of all the work and production equipment that is used, but also aware of the different camping equipment and utilities required during races. A structured approach during the preparations of a race and during the race itself will win a lot of time.

In addition, the Solar Team is often on the way to partners or events, this also involves a lot of logistics. In short, you are a central point of contact within the team to ensure that all kinds of things run smoothly, both technically as support-wise. This function can be combined with another position within the team.

### YOUR PROFILE

- Strong communication skills and entrepreneurial
- Creative, out-of-the-box mindset
- Motivated team player
- All-round interests, both technical and support-wise
- High degree of independence
- A bachelor or master degree in Engineering Science, Engineering Technology or Business Engineering
- Ready to put a lot of time and effort into this project!

### OUR OFFER

- Discover true engineering from concept to execution and measure up to the world class teams
- Graduate with more experience than any other engineering student
- Contact and collaborate with leading companies in the industry
- Broaden your professional network
- The experience of your lifetime and so much more!
