

TEAM MANAGER

AGORIA SOLAR TEAM

THE PROJECT

The main objective of the project is to **innovate** and **optimize** a solar car and participate in an international Solar Challenge. Your goal is to bring the solar car to the next level and make it even more competitive to win the world's most extreme solar car races and beat other solar car teams from all over the world. You will have to go through the process of **researching, designing, prototyping** and **testing** your systems together with a group of highly motivated, ambitious students. You will work together with numerous companies and a vast network of Solar team alumni to develop new innovations. This project will help you become a state of the art engineer!

THE FUNCTION

As team manager, your main responsibility is the **well-being of the team and each team member**. You guard the structure of the project for effective and efficient operation, within which each individual's qualities can be used in the best possible way.

The role of team manager is extremely **varied**: every day, new challenges show up that you will conquer together with the rest of the team. You are the face of the team for the outside world and also the point of contact for the organisation of the race and some strategic partners.

You will (technically) **keep an overview**, helping where your team needs you the most and making well-considered decisions in line with the vision of the entire organisation.

YOUR PROFILE

- Motivated team player with strong communication skills
- Listening ear that can make the right decisions with the input of a large team
- An extrovert, enterprising attitude
- A creative, out-of-the-box mindset
- A good negotiator
- A strong technical interest and sufficient practical insight
- A bachelor or master degree in Engineering Science, Engineering Technology or Business Engineering
- Ready to put a lot of time and effort into this project

OUR OFFER

- Discover true engineering from concept to execution and measure up to the world class teams
- Graduate with more experience than any other engineering student
- Contact and collaborate with leading companies in the industry
- Broaden your professional network
- The experience of your lifetime and so much more!
