SOLAR TEAM

THE PROJECT

We contribute to the future of mobility. Innovation has always been our cornerstone to create the best solar car in the world. This year, we are looking for pioneers to challenge the status quo and bring our top-notch solar car to the next level. You will have to go through the process of researching, designing, prototyping and testing your systems together with a group of highly motivated, ambitious students. You will work together with your team members and numerous companies to develop new innovations.

After completing the improvements to the solar car, these will be put to the test in an international competition against other top teams from around the world. Past competitions have included one in Chile and one in South Africa. Improving a world record has also been achieved by one of the previous teams.

THE FUNCTION

It is quite a logistical challenge to get a solar car, a workshop and supporting equipment past the customs. You will be both technically aware of all the work and production equipment that will be used continuously, as well as camping equipment and utilities, among other things.

A structured approach is required and will save a lot of time during the race preparation phase. This is also a function not to be underestimated during the race itself! In addition, the Solar Team is often on the road visiting partners and organizing events. This also involves a lot of logistics. In short, you are a central point of contact within the team to make sure everything runs smoothly, both technically and in terms of support.

This position needs to be combined with an other position within the team. You have all-round skills and are involved in all activities of the Solar Team.

YOUR PROFILE

- * Communicatively strong, structured and entrepreneurial
- * Creative, out-of-the-box mindset
- * Motivated team player
- * All-round interests, both technical and supportive
- * High degree of independence
- * A bachelor or master degree in Engineering Science or Engineering Technology
- * Ready to put a lot of time and effort into this project

OUR OFFER

- * A project full of experiences you don't get in your normal studies
- * Experiencing a real engineering project and its different phases
- * Being in contact and cooperating with the largest companies in the industry
- * A group of friends and an international racing adventure to remember
- * The experience of a lifetime and so much more!
