This dining table defies structural boundaries and symmetrical balances. The Finnish concept "Sisu" fits like a glove to this table description: determination and bravery even when success is against the odds.

A "U" shape holds this table together forming a dynamic and asymmetrical piece. Each pair of legs is different, giving the table a different look on each side.

LAGOM Dining Table

LAGOM Dining Table

This dining table was inspired by the New Nordic Movement that is bound by a set of principles that stress sustainability, locality and respect for the natural world.

Lagom was created from two pure shapes that met in perfect balance. The circular top is enriched by the materiality of the grain that is flowing on the surface. The base is a rhythmic sequence of vertical solids and voids, that express a feeling of lightness.

Lagom is a Swedish quality that describes something "in just the right amount". This design represents perfectly that concept balancing pure forms and high color contrasts.
