

Our new fabric walling system provides a lightweight, durable, and professional solution for event and pit environments. The system is made from 40mm aluminum, providing a strong yet lightweight structure, and features sleek, tensioned fabric for a clean look and long-lasting durability. It is fully customizable with colors, logos, and high-resolution graphics for branding, making it perfect for various events like pit garages and expos. Easy assembly and disassembly make it quick and efficient for teams, while the lightweight and low packing volume facilitate transport.

### Easy Assembly and Disassembly

The panels are connected with magnets allowing for quick and efficient setup and teardown..

### Lightweight and Durable

The aluminium framework and tensioned fabric panels are designed with weight reduction in mind, making it easy to transport and set.

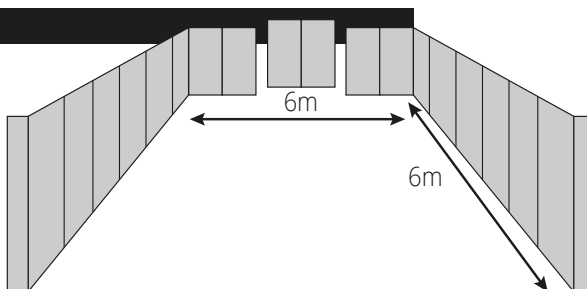

### Flat Screen Mounting option

Universal support for flatscreen (flatscreen not included)
