

EUROPE'S LEADER IN THERMOPLASTIC COMPOSITE PANELS, REVOLUTIONIZING INDUSTRIES THROUGH SUSTAINABLE INNOVATION

A Giant Leap into the future. Join and pioneer in the thermoplastic revolution.

ABOUT US

We operate as an international thermoplastic sandwich panel manufacturer while nurturing a close-knit family business ethos, allowing short communication lines. Our objective is to lower our customers **Total Cost of Ownership** by delivering lightweight, long-lasting, strong, and sustainable panel solutions.

2-3X LIGHTER

2-3 times lighter than the same thickness plywood.

10 YEAR LIFESPAN

Easy to maintain, handle, repair. Exceptional moisture, mold, UV, and chemical resistance.

IMPACT RESISTANCE

Extreme impact resistance by adding several high fiber layers.

MORE INFO

OUR APPLICATIONS

CONSTRUCTION AND INFRASTRUCTURE

From formworks and scaffolding, to prefab housing, our panels provide robust, durable, and lightweight solutions for all your construction needs.

TRANSPORTATION AND AEROSPACE

Optimizing weight to increase payload. For example, commercial vehicles, trailers, shipping containers, airfreight containers, horse vans, caravans, and more.

OTHER POSSIBLE APPLICATIONS

Tiny houses, solar panel back sheets, furniture panels, bicycle lanes, stage and tent floors, hockey boarding, and any other application that brings your creative visions to life.
