

ENERGY STUDIES

ENERGY STUDIES

In energy monitoring we carry out projects in which monitoring and analysis of energy use is key. The goal of each project is to create awareness in energy use and to realize a sustainable energy transition.

PROFILE

Interested in:

- Sustainable building management
- Being a specialist in energy reduction
- Conducting energy audits
- Analyzing and visualizing energy data
- Building expertise in energy monitoring

EXAMPLES OF PROJECTS

- **Charging stations study:** impact study of e-mobility on energy consumption
- **Energield:** energy analysis of households in the city of Mechelen
- **Energij monitoring Mechelen:** energy measurements and analysis in Mechelen
- **Samsø in Eeklo:** feasibility study into the construction of a heat network in Eeklo
