

Nestor Van den Abbeele about founding our third business unit

<tag>it is the new business unit within the Sildi & <tag> organization on providing IT services to companies on the benelux market. I had the chance to Interview Nestor who co-founded <tag>it together with our managing partners.

YOU CHOOSE, WE DELIVER

Why <tag>it as a third business unit from the Sildi & <tag> organization?

The third business unit <tag>it was recently established to meet the growing demand from our customers <tag> projects in business consulting, we are doing business analysis in close contact with IT, but currently we are not yet specialized in the development itself. In future projects we want to be able to deliver the full service to our customers in business consultancy and software development of IT related projects.

What is the exact scope of the projects of the new business unit, <tag>it?

<tag>it specializes in information technology consulting, providing support with technical challenges and innovations. We will deliver both business consultancy and software development.

- > Business consultancy: business analysis, functional analysis, change management, program management, technical writing.
- > Software development: software architecture, project management, technical analysis, software development, testing, system engineering.

Concerning the software environment we want to focus on the Microsoft .NET environment and Java/Oracle environment.

We also want to take the first step in fulfilling our dream to develop and commercialize our own applications. Things that are not included in the scope of our projects are helpdesk and hardware.

What is the market <tag>it is focusing on?

<tag>it is not focusing on a specific sector. The demand of IT services is reaching over all sectors so we will focus on several types of clients:

- > Small and medium enterprises
- > Governmental companies
- > Multinationals
- > ...

<tag>it is in a real start-up phase now, what are the challenges <tag>it is facing right now?

Finding the right people for the right job is one of our biggest challenges right now. The demand of IT-profiles is very high on the market. We are specifically searching for medior (2-3 years of experience) and senior (> 3 years of experience) profiles with an entrepreneurial spirit who want to help this business unit grow.

Communication in Dutch and/or French is a must at most of our clients, mastering both is an absolute plus. English is certainly always welcome.
