RD Line

RD Line

In the pharmaceutical industry, R&D and QC laboratories often need to handle substances that, by their nature, require a high degree of safety and containment. For these needs we have designed and built the RD line

R&D Laboratory

QC Laboratory

Small Productions

Other applications

The "RD" line includes a series of Isolators made with a monolithic structure in AISI 316L stainless steel that guarantee a high degree of containment and high safety for the operator and the environment

Caratteristiche Tecniche

RD Line

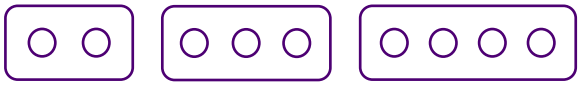

Technical features

- Wide working chamber with a sloping front wall that can be opened upwards
- Prismatic Air Lock
- Static seals
  Centrifugal exhauster with inverter
- Hepa (H14) input filtering unit
- Double Hepa (H14) output filtering unit
- Filtered safety valve
- Pressure gauges
- Pressure transmitters for low pressure and filter efficiency control
- Fluid and cable passages
- HMI touch screen
- Acoustic and optical alarms for depressure failure and output filter inefficiency
- Safety sequence for depression decrease

Opzional accessories

- Automatic inerting system
- Continuous liner for solid waste removal with hatch
- Manual washing kit with spray gun e liquid bottom drain in the working chamber

A model for every need.....

WORKING CHAMBER					AIRLOCK		
Model	Gloves (n.)	Width (mm)	Depth (mm)	Heigh (mm)	Width (mm)	Dept (mm)	Heigh (mm)
RD602	2	900	700	900	500	550	600
RD603	3	1400	700	900	500	550	600
RD604	4	1800	700	900	500	550	600

Le glove boxes di questa linea sono conformi alle norme:

ISO 10648-1, ISO 10648-2, ISO 14644-7 Criteri di progettazione, costruzione e test di contenimento/tenuta glove boxes e isolatori. Direttiva 2006/42/CE Sicurezza macchine
