NEUTRIK

Digital Audio Signal Generator

The Digirator DR2 is a reference grade digital audio signal generator with transformer balanced AES3, S/PDIF, TOS-Link and ADAT outputs. The generator offers a comprehensive set of audio test signals and surround sound test sequences for verification and adjustment of professional Dolby Digital, Dolby E and DTS installations. The internal low jitter clock generator can be synchronized to AES3, DARS, Word Clock and Video signals. Measurement of channel transparency, channel propagation delay and sample frequency is supported.

Features & Benefits

- ✓ Handheld digital source
- ✓ Improves surround sound
- ✓ Occupies broadcast lines
- ✓ Calibrated generator
- ✓ Free online updates
