Service From Your Bryant® Dealer**

Top Reasons It Takes Bryant®

PASSIONATE SERVICE

Bryant® dealers do more than just provide quality home enhancements like Côt™ Home Automation. They also deliver knowledge, experience and Whatever It Takes® to get each job done right, the first time. You and your system will receive the attention to detail and professional service homeowners have come to expect from Bryant.

EXCEEDING EXPECTATIONS

With more than 100 years of experience, Bryant offers a full lineup of products designed with your whole home in mind. Through innovative design and rigorous testing, our products are built to exceed expectations. And today, with Côt™ Home Automation, we take it to the next level by giving you a powerfully simple solution for home comfort, control and security, all through your smart phone or tablet.

THE POWER OF COLLABORATION

Bryant, one of the most trusted names in home comfort, understands the power of collaboration. By working with Interlogix, the premier name in security... and Kidde, a leader in life safety... we can offer Côt™ Home Automation as a way to achieve high levels of safety and security in addition to controlled comfort and energy savings.

CUSTOMIZED SOLUTIONS

Côt™ Home Automation is not a one size fits all solution. Even our most basic package provides options for you to make it your own. Or, you can create a more sophisticated system complete with professional monitoring and security. From financing and rebates to reliable products professionally installed, Bryant provides options that help keep you and your wallet comfortable.

EFFICIENCY & SAVINGS

Côt™ Home Automation can reduce your carbon footprint by giving you control over heating and cooling costs and lighting, from wherever you are. By reducing monthly utility bills over the life of your system, you'll see how efficient equipment pays off.

Safer, Smarter More Connected

Perfect for your house, a vacation property or both, Bryant keeps you connected through your smart phone or iOS/Android web-enabled device. Monitor activities and conditions... make changes to lighting and temperature on your own or automatically... or receive alerts and take action in case of an emergency. You choose the options that make sense for you.

Getting close to home? **Geofencing** uses your smartphone to sense your approach, triggering a series of automations such as having the porch light to turn on and the front door to unlock.

Warranty Protection

Côt™ Home Automation warrants this product against failure due to defects in materials or workmanship under normal use and maintenance. This two-year parts-only limited warranty starts from the date of original installation for the original purchasing owner and subsequent owners. Full warranty information is available at www.corhomeautomation.com.

The Smart Way to Start

Our Standard Package

Our Smart Start Kit provides the hardware you need to create a safer, smarter, more secure home. The kit includes the home automation hub and hub stand, three door/window sensors, one motion sensor, one water sensor, and one light module. Professionally installed by your Bryant® dealer's certified technician, it only takes a few minutes to connect your smart phone and download our Côté™ Home Automation app.

Home Automation Hub

The home automation hub is the brains of the operation. Once it's installed and set up, you can control everything from your smart phone or tablet.

Motion Sensor

When movement is detected, it can turn on a light, send an alert or trigger a pre-assigned series of commands.

Hub Stand

Place the hub on a convenient desktop using the hub stand if you don't want it wall-mounted like a traditional security panel.

Water Sensor

Ideal for rooms susceptible to water damage or flooding, this sensor provides fast notification of water infiltration.

Door/Window Sensors

These sensors can send an alert or trigger a pre-assigned series of commands when a window or door is opened.

Light Module

Control lighting and small appliances automatically or manually, even when you are not home.

Connect with Your Comfort

No Bryant system would be complete without comfort. Any compatible Bryant thermostat will do, but to get the most out of your system, we recommend including the Housewise™ thermostat. When you select this option you can enjoy increased efficiency with an average savings of 20% on heating and cooling energy costs.* Not only that, you will enjoy the ability to set comfort schedules to match your lifestyle, track energy usage and more using this thermostat's intuitive, color touch screen.

*Based on a 2012 third party study comparing Bryant® Housewise™ technology to the estimated cost of a non-programmable thermostat set at 72° F at all times.

Options & Accessories: Add-Ons for Now... or Down the Road

Our current collection of modules, sensors and other components can help you make your system as comprehensive as you need. Whether you want it all now, or wish to add more features over time, your Bryant® dealer can help you plan a system that works with your budget.

Lifestyle/Convenience

Housewise™ Wi-Fi® Thermostat

T6-WEM01

Communicates with your home automation hub to provide remote access to your home's heating and cooling system.

Freeze Sensor

60-742-95R

Detects temperatures below 41° F and sends an alarm. Reverts to normal when temperature rises above 50° F.

Z-Wave® Wall Receptacle

IS-ZW-WR-1

Remotely turn power on or off to devices plugged into this outlet.

Water Sensor

60-744-95R

Provides timely notification of water leaks for quick response and damage control.

Z-Wave® Light Module

IS-ZW-LM-1

Plug this into your standard wall outlet for remote control over lighting. Allows you to turn on, off, or dim.

Key Fob

600-1064-95R

Perform basic security functions from nearly anywhere using this compact device.

Z-Wave® Light/Appliance Module

IS-ZW-AM-1

Plug this into your standard wall outlet for remote control over turning lights/appliances on or off.

Z-Wave® Wall Dimmer Switch

IS-ZW-DS-1

Control brightness manually using the wall dimmer switch remotely through your mobile device.

Z-Wave® Door Lock

B1L

Lock or unlock doors key-free. Illuminated keypad makes entry a breeze.

Wi-Fi® is a registered trademark of Wi-Fi Alliance Corporation.
Z-Wave® is a registered trademark of Sigma Designs, Inc.

Smart Start Kit

HA-6400-KIT-S

Before you add on, you'll need our standard starter package. Each kit is identical, but you can work with your contractor to customize a system that works for you.

Security

1.3 MPx Outdoor Camera

TVW-3120

Keep an eye on your home with this high-definition, Wi-Fi® camera. An integrated browser allows live remote viewing and listening, as well as playback of recorded audio and video.

1.3 MPx Indoor Camera

RS-3130

Keep watch inside your home with this high-definition, Wi-Fi® indoor camera. An integrated browser allows live video to a mobile device as well as clip recording for later viewing. Homeowners can set the camera to trigger via motion detection or by scheduled automations.

Motion Sensor

60-807-95R

Our motion sensor detects movement and includes special processing that prevents false alarms from small pets weighing up to 40 pounds.

Glass Break Sensor

60-873-95

Recognizes the sound of glass breaking and sends you or your monitoring company an alert.

Door/Window Sensor

TX-1012-01-1

Wireless module detects opening and closing of doors and windows.

Recessed Door Contact

TX-1510-01

Concealed inside the door frame for discreet sensing of when a door is opened or closed.

Garage Door Sensor

TX-E401

Provides peace of mind by letting you know when your garage door is up.

Other Peripheral Accessories Available (Not Shown):

Battery 6DC, 2.3A
Power Supply 9V, 2A

ZW-BAT21A
ZW-PS9V

Life Safety

Smoke Detector

TX-6010-01-1

Sounds an alarm when a high temperature (135° F) or a rapid rise in temperature is detected.

Carbon Monoxide (CO) Detector

TX-6310-01-1

Wireless CO alarm accurately and reliably alerts you about potentially dangerous levels of CO in the home.

Personal Panic Button

TX-4200-01-1

Water-resistant and wireless, when activated this device can send notification to your specified emergency contact or monitoring company.

Flexible, Customizable Peace of Mind

With Côt[™] Home Automation you can make the system your own. Our starter package covers the basics. Numerous add-ons allow you to make it as comprehensive as you want, and we even future-proofed the system for new technologies as they are introduced. The entire system is conformed to your specifications with options to self-monitor or to include a professional monitoring service – it's the ultimate combination of flexibility and peace of mind.

On the Go & In the Know

No matter where you are or how busy, keeping abreast of developments at home is easy and convenient. Using our mobile app on a web-enabled device, you'll always know when a door or window is opened or when motion is detected. You can receive alerts about smoke, carbon monoxide or water. You can keep an eye on children and valuables, dim the lights, turn on the TV and turn up the temperature. The system can automatically respond appropriately – like locking or unlocking a door, ringing a chime, or shutting down a video system when a child should be doing homework.

Let Côt[™] Home Automation Work for You

We can certainly suggest ways other homeowners have used Côt Home Automation. But one of its biggest assets is the ability to create a system that meets your needs.

Lake House – You can't be two places at once. Côt Home Automation lets you keep an eye on a vacation property when you aren't there. Monitor occupancy, control energy use with temperature and lighting control, and receive alerts in case of freezing, flooding or a glass break.

Elderly Loved Ones – Include a personal panic button to provide timely assistance to an elderly loved one, or use a motion sensor to check for activity.

Children/Care Givers – Keep tabs on activities at home while you are gone with an indoor camera, a door sensor on a cabinet or safe, or power down a computer system.

Côr™ Competency – A Simply Smarter Home

Light Module:
Lights can be turned on or off, or dimmed without getting up

Côr™ Hub:
Designed to be placed within easy reach (or out of sight)

Motion Sensor:
Cues lighting or simply alerts to movement within the home

Smoke Detector:
Provides life-saving smoke monitoring

Outdoor Camera:
Keeps a watchful eye over things while homeowners are gone

Housewise™ Wi-Fi® Thermostat:
Controls home climate anytime, remotely, from virtually anywhere

Door/Window Sensor:
Tells when a window is opened or left that way

Carbon Monoxide Detector:
Protects families from the invisible threat of carbon monoxide 24/7

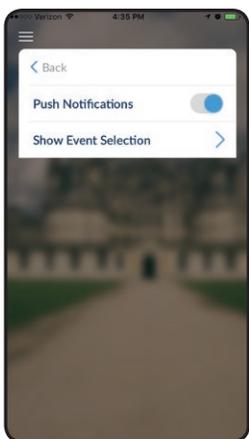

Glass-Break Sensor:
Instantly detects and sends a signal indicating broken glass

Door Lock:
Locks or unlocks doors key-free, from a foot or a continent away

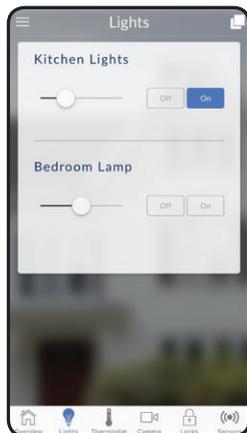

Water Sensor:
Alerts to water leakage problems before they become expensive ones

Best of all, homeowners can do it all from their smartphones or tablets

Wi-Fi® is a registered trademark of the Wi-Fi Alliance Corporation.

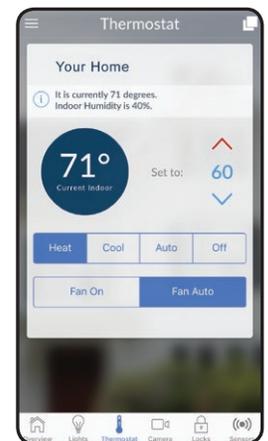

Automatic alerts on your mobile device keep you in the know when you are on the go.

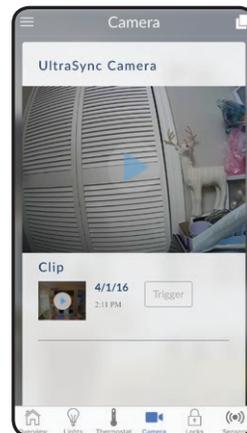

Z-Wave® technology helps control lights, unlock doors or turn on small appliances.

Take charge of your indoor comfort with a compatible Wi-Fi® thermostat.

Wi-Fi® is a registered trademark of the Wi-Fi Alliance Corporation.

Keep an eye on your home – inside and out – with remote camera viewing wherever you are.

For more than a century, homeowners have associated Bryant® heating and cooling products with the highest standards of indoor comfort and Bryant dealers as service leaders.
