

Perfect Solutions for Cleaner, Fresher Indoor Air

# Bryant Does Whatever It Takes

## A Tradition of Setting Standards

Did you know that indoor air can be as much as five times more polluted than outdoor air? In fact, viruses, bacteria, mold spores, pollen and animal dander can circulate throughout the air in your home. Let Bryant Perfect Home Solutions come to your rescue with a collection of indoor air purification and filtration products that effectively remove and kill these potentially harmful airborne pollutants.

Perfect Home Solution products include:

- Air purifiers
- UV germicidal lamps
- Fresh air ventilators
- Humidifiers & Dehumidifiers
- Media Filters
- The Evolution® System

## High-Efficiency Air Purification

### The Perfect Way to Clear the Air

Bryant's Perfect Air™ Purifier and Preferred™ Series Air Purifier provide extremely high air filtration efficiency and patented germicidal technology so effective they even capture and kill airborne bacteria, viruses and mold spores. And, they couldn't be easier to use because there's no cleaning required - just periodically replace a removable media cartridge and you can enjoy cleaner, fresher air.

**CAPTURES & KILLS**

## How Does it Work?

Truly a whole-home solution, the Perfect Air™ Purifier and Preferred™ Series Air Purifier treat 100% of the air flowing through your home comfort system using a unique three-step process. Here's how it works:

### Step 1:

The Perfect Air Purifier and Preferred Series Air Purifier use precision point ionization to charge particles as they enter the purifier.

### Step 2:

A specially designed, continuously charged media captures airborne particles.

### Step 3:

Patented, state-of-the-art technology kills captured viruses, bacteria, mold spores and other allergens.

**Fan Coil Model**

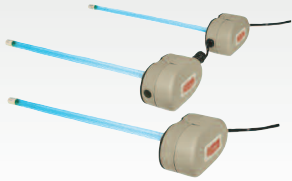

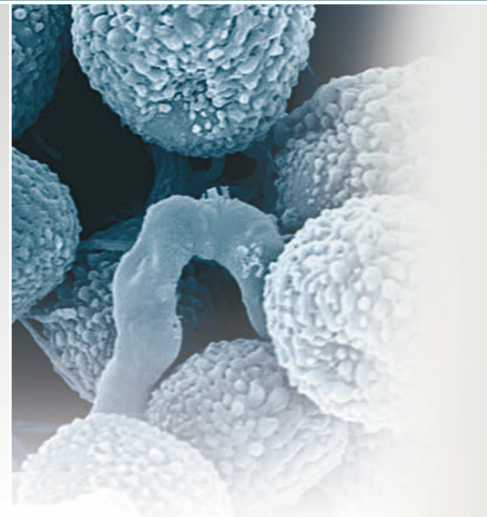

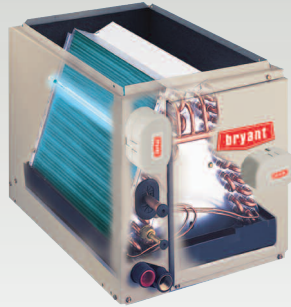

# Takes to Protect the Air You Breathe.

## Ultraviolet Germicidal Lamps (UV Lights)

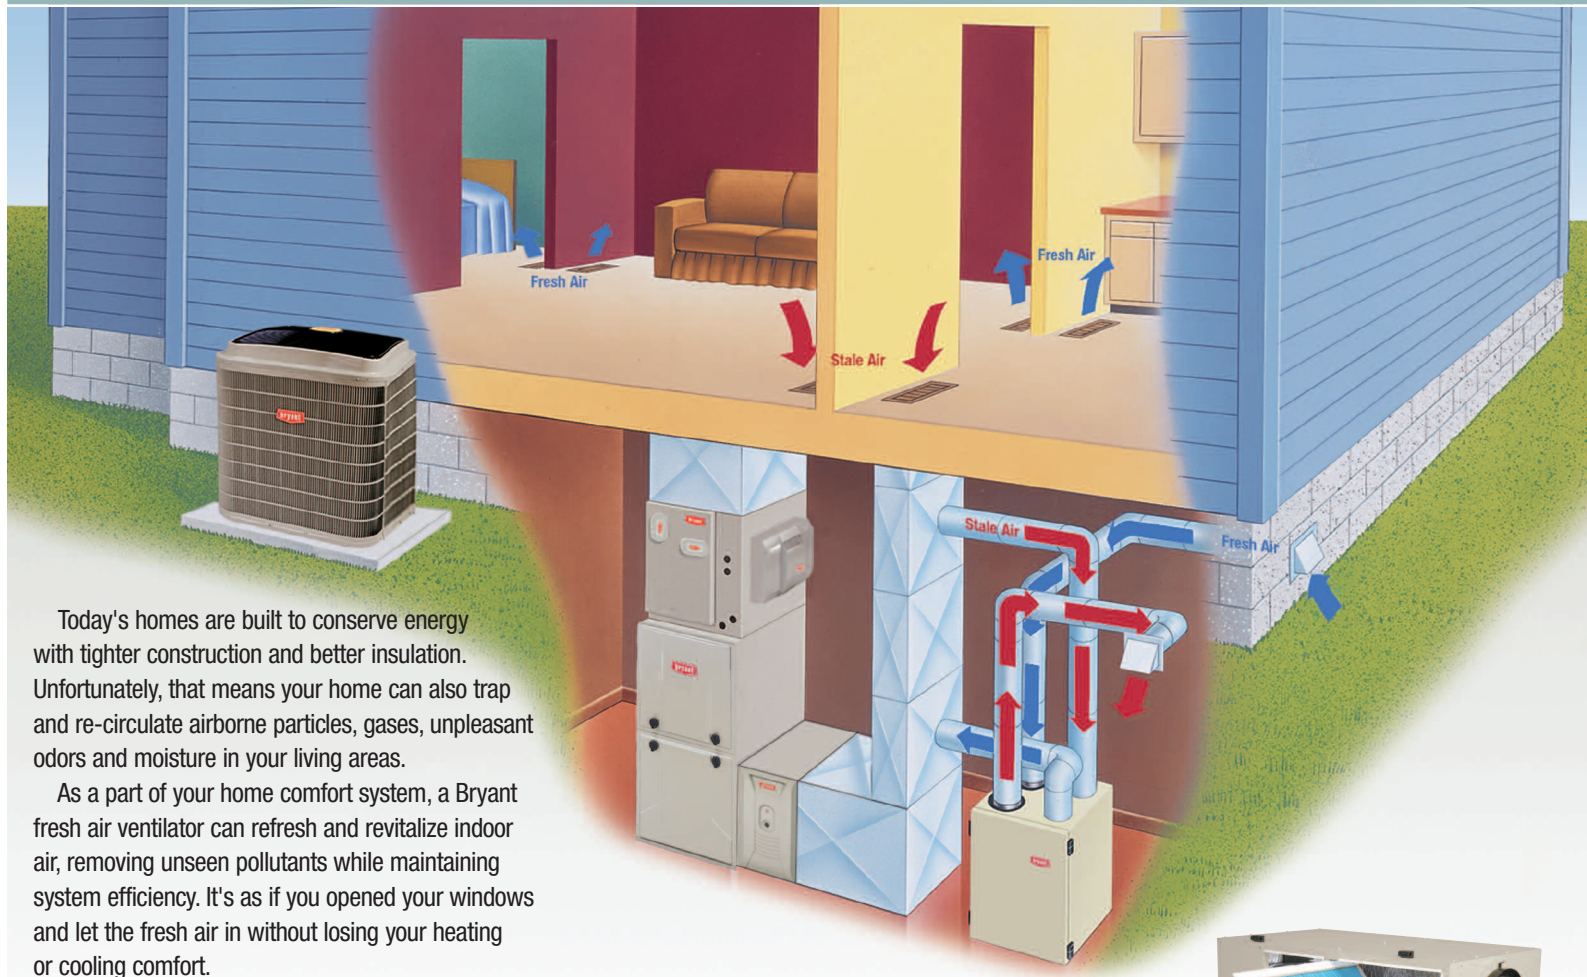

Mold and bacteria can grow on the surface of your cooling coil. Left unchecked, buildup of these contaminants can reduce system efficiency and release potentially harmful pollutants such as mold spores and unpleasant odors into the air you breathe.

Bryant UV lamps are designed to bathe your cooling coil with intense UV-C light. These lamps sterilize coil surfaces to maximize system efficiency and protect the air you breathe. For your convenience, no cleaning is required - just replace the lamps once a year.

*Bryant UV lights provide maximum effectiveness when mounted inside your system near the cooling coil where pollutants can collect. Simply replace the lamps once a year to enjoy the benefits of enhanced indoor air quality.*

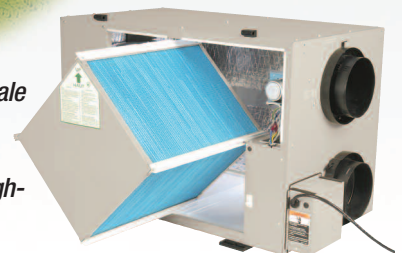

## Fresh Air Ventilators

Today's homes are built to conserve energy with tighter construction and better insulation. Unfortunately, that means your home can also trap and re-circulate airborne particles, gases, unpleasant odors and moisture in your living areas.

As a part of your home comfort system, a Bryant fresh air ventilator can refresh and revitalize indoor air, removing unseen pollutants while maintaining system efficiency. It's as if you opened your windows and let the fresh air in without losing your heating or cooling comfort.

*The high-efficiency core transfers heating or cooling energy from exiting stale indoor air to the incoming outdoor air. The air streams DO NOT mix, yet you continue to enjoy heating or cooling comfort and economy. The core also helps maintain proper humidity to maximize comfort. The filters and the high-efficiency core can be removed and cleaned without using tools.*

## Humidifiers and Dehumidifiers

Overly dry air can cause itchy, cracked skin, dry nasal passages, annoying static shocks, and cracked woodwork. Adding a Bryant humidifier can help alleviate these conditions.

In addition, proper levels of humidity can mean less opportunity for dust and other irritants to circulate in the air that you breathe.

Bryant humidifiers can even help you save money on your energy bills, since humidified air actually feels warmer than dry air – so your control can be set to a lower temperature.

When it's hot and sticky outside, your air conditioner or heat pump can work overtime. This often causes indoor humidity levels to creep upward, making you and your family uncomfortable. A Bryant® whole-home dehumidifier can draw excess moisture from cool indoor air, enhancing your comfort. Offered in a variety of installation options ranging from basement, closet, attic, crawl space, or stand alone, your dealer has the flexibility to offer the ultimate combination of unobtrusive design and convenience.

## Media Cabinets and Filters

An economical alternative to the Perfect Air™ Purifier and Preferred™ Series Air Purifier, the EZ Flex™ filter system can reduce dirt and dust buildup on your system's components while trapping small sized pollutants and contaminants that irritate your eyes, lungs, and sinuses. As a result, this air cleaner promotes lower utility bills, long term

reliability and peak system performance. Unlike many competitive media filter products, the EZ Flex™ filter system is designed to allow maximum airflow even as dust builds up on the filter. Continued optimum performance is as simple and convenient as removing and replacing the disposable media filter once a year.

*A third option for the budget-minded consumer is Bryant's filter cabinet and cartridge filter. Although economically priced, it's far superior to today's 1" disposable filters, in both filtration efficiency and filter life.*

## The Evolution of Comfort

Bryant is at the forefront of a comfort revolution with its exclusive Evolution® System. Starting with the sleek, dependable Evolution® Connex™ control, that offers unmatched ease of use and operation of your indoor air quality products from one convenient location.

A Bryant Evolution System also delivers superior air cleaning capabilities. A nearly continuous flow of air through your comfort system virtually ensures that your air is constantly being cleaned. True Sense™ dirty filter detection enhances indoor air quality and system efficiency by letting you know exactly when it's time to clean or replace your filter. And, with our Perfect Humidity® function, you'll enjoy precision humidity control during the cooling and heating seasons.

Simple, intuitive and powerful, the Evolution® System truly sets a new standard for excellence in home comfort and indoor air quality.

*The Evolution® Connex™ control is much more than just a thermostat. It allows you to take charge of your year-round indoor air quality system.*

# Indoor Comfort You Can Rely On

- 1 ENVIRONMENTALLY SOUND COOLING**  
Bryant offers a comprehensive family of 13- 21 SEER air conditioners and the environmentally sound Puron® refrigerant.
- 2 PRECISION COMFORT CONTROL**  
Our Evolution® Connex™ control allows for precise temperature and humidity control. "Intelligent" circuitry with full 7-day programmability monitors operation and automatically adjusts system settings to maximize comfort and efficiency.
- 3 FURNACE**  
Provides reliable, high-efficiency heating for long-lasting comfort and energy savings. Available in high-efficiency gas- and oil-based fuel sources.
- 4 EVAPORATOR COIL**  
Allows the refrigerant to absorb heat from the air as it passes over the coil surface. The evaporator coil is located with the indoor unit and is also referred to as the indoor coil.
- 5 HUMIDIFIER**  
Replenishes moisture to dry air.
- 6 AIR PURIFIER**  
Improves air quality by removing potentially harmful and irritating airborne pollutants from your home.
- 7 ULTRAVIOLET GERMICIDAL LAMP**  
Helps prevent growth and buildup of contaminants on your indoor coil to maximize efficiency and leave your indoor air cleaner less polluted.
- 8 FRESH AIR VENTILATOR**  
Combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.
- 9 ZONING**  
Sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.
