

CHAMPION®
HEATING AND COOLING

**CHAMPION® LX SERIES
RESIDENTIAL
PACKAGE EQUIPMENT**

14-16 SEER, 2-5 TONS

COMFORT WITHOUT COMPROMISE

Champion® LX Series Residential Package Equipment is designed to provide advanced performance, simplified operation and long-term reliability in a single, outdoor cabinet. This winning lineup of heat pumps and air conditioners are available in multiple configurations, ensuring comfort without compromise, all year-round.

Champion® LX Series Residential Package Equipment

- **For all-electric homes:** Heat pumps and electric heating/electric cooling models provide comfort no matter the season.
- **For homes with natural gas:** Take advantage of low-cost fuels with gas heating/electric cooling models.
- **Reliable performance:** At the heart of each LX Series package unit is an advanced compressor for efficient operation season after season.
- **Higher heat:** Electric heat models with up to 25 kW capacities can be staged to handle extreme cold.
- **Peace and quiet:** Advanced fan design and vibration-reducing technology minimize noise.
- **Precise comfort levels:** Accurate controls give you exact comfort settings.
- **Longer life, fewer repairs:** Advanced ECM fan motors last longer, and a reduced number of components limits potential failures.
- **Cold weather heat pump performance:** Simplified demand defrost controls reduce the risk of freeze-up that occurs with conventional controls.
- **More options:** Single- and two-stage models available.

Advanced Performance. Uncompromising Reliability.

Champion® LX Series Residential Package Equipment delivers proven quality and maximized performance in a smaller footprint, making premium-quality home comfort more accessible than ever. Every Champion® LX Series system is designed, engineered and assembled in our United States facilities to deliver consistent, reliable performance.

- Our engineering and manufacturing experts develop products using a unique quality process. Every design factor, each component and the total system are scrutinized to eliminate potential flaws and stress points.
- The reliability of your LX Series Residential Package Equipment will deliver performance and value year after year, season after season.

We set the standard in comfort without compromise.

Advanced Comfort

LX Series Residential Package Equipment fit all cooling and heating functions into one outdoor cabinet. Low-noise fans and vibration-reducing technology reduce outdoor sound levels to keep your neighborhood quiet, while precision controls let you adjust temperature settings conveniently and accurately.

Affordable Choices

The wide LX Series product range ensures your contractor can choose the right size of equipment for your home to avoid wasting energy. With our efficient 14 SEER and ENERGY STAR® certified 16 SEER products, you save up to 38% more energy compared to older systems. Plus, our quality engineering means maintenance and serviceability are easier – avoiding costly repairs down the road.

Unmatched Quality

By the time a LX Series packaged unit leaves our factory, it has proven itself through a series of rigorous tests:

- A full-system test confirms fans, compressor and control operation.
- Accelerated 15-year component testing.
- Heat exchanger design is tested through extreme life cycling tests, which can exceed 1,000,000 cycles.
- Cabinet exterior is subjected to 1,000-hour salt-spray tests to prove the corrosion resistance of our powder-coated finish.

Verified quality like this lets us offer strong warranties, delivering exceptional value.

Superior Quality

LX Series Residential Package Equipment is designed, engineered and assembled in the United States, where we can closely monitor and improve processes that directly affect quality. It's this commitment to excellence that allows us to offer outstanding warranties, meet the highest industry standards, and deliver energy saving comfort that lasts a lifetime. That's why, when it comes to home comfort, Champion® is always leading, never compromising.

PCG6 Electric Cooling/Gas Heating Packaged Units

MODEL	TONS	SEER	EER	AFUE
