

# Ameren Missouri Heating and Cooling Program

## Rebate Chart – Residential Electric Customers Only

Heating and Cooling Program Rebate Measures*		Rebates Valid for Installs on or After March 1, 2017
<b>Air-Source Heat Pump<sup>†</sup> AHRI Rated</b>		
SEER 15 – Replace Operating or Failed Air-Source Heat Pump		<b>\$500</b>
SEER 15 – Replace Operating or Failed Central Air Conditioner and Electric Resistance Furnace		<b>\$800</b>
SEER 16+ – Replace Operating or Failed Air-Source Heat Pump		<b>\$650</b>
SEER 16+ – Replace Operating or Failed Central Air Conditioner and Electric Resistance Furnace		<b>\$900</b>
<b>Ductless Air-Source Heat Pump<sup>†</sup> AHRI Rated, Per Outdoor Unit</b>		
SEER 19+ – Replace Operating or Failed Air-Source Heat Pump		<b>\$300</b>
SEER 19+ – Replace Operating or Failed Central Air Conditioner and Electric Resistance Furnace		<b>\$500</b>
SEER 19+ – Installed With Existing Gas Heat <sup>‡</sup>		<b>\$500</b>
<i>‡ Available only in a dwelling unit with existing gas heat, but where there is no existing ductwork to the space to be conditioned by the Ductless Air-Source Heat Pump and where installation of a properly sized ducted system to that space is cost prohibitive.</i>		
<b>Dual Fuel Heat Pump<sup>†</sup> AHRI Rated</b>		
SEER 15 – Replace Operating or Failed Central Air Conditioner and Non-Electric Heat Source		<b>\$175</b>
SEER 16+ – Replace Operating or Failed Central Air Conditioner and Non-Electric Heat Source		<b>\$200</b>
<b>Ground Source Heat Pump<sup>†</sup> AHRI Rated</b>		
EER 14+ – Replace Operating Air-Source Heat Pump		<b>\$2,000</b>
EER 14+ – Replace Operating or Failed Electric Resistance Furnace		<b>\$2,000</b>
EER 23+ – Replace Operating or Failed Ground Source Heat Pump		<b>\$800</b>
<i>EER requirements above are partial cooling load. Ground Source Heat Pump rebates are only available when replacing a heat pump or electric furnace, not when there is existing gas heat.</i>		
<b>Central Air Conditioner AHRI Rated</b>		
SEER 14 – Replace Operating Central Air Conditioner		<b>\$300</b>
SEER 14 – Replace Failed Central Air Conditioner		<b>\$250</b>
SEER 15 – Replace Operating Central Air Conditioner		<b>\$400</b>
SEER 15 – Replace Failed Central Air Conditioner		<b>\$275</b>
SEER 16+ – Replace Operating Central Air Conditioner		<b>\$500</b>
SEER 16+ – Replace Failed Central Air Conditioner		<b>\$300</b>
<b>Electronically Commutated Motor (ECM)</b>		
	Included in AHRI Efficiency Rating	Not Included in AHRI Efficiency Rating
Factory Installed in a New Gas Furnace or Air Handler	<b>\$50</b>	<b>\$100</b>
Retrofit ECM Replacing Permanent Split Capacitor Blower Motor <i>Note: This measure is not affected by AHRI rating.</i>		<b>\$100</b>
<i>ECMs installed with Ductless Air-Source Heat Pumps are not eligible for a rebate.</i>		
<b>Tune-Up Plus Ameren Missouri Efficiency Analysis</b>		
Performed on Existing Central Air Conditioners or Existing Heat Pump Systems		<b>\$75</b>
<i>Tune-Up Plus Ameren Missouri Efficiency Analysis is only valid one time over the life of each system. Each system for which you received a \$75 tune-up related rebate after January 2, 2013 is not eligible. Systems must be at least one year old to be eligible.</i>		

\*Some restrictions may apply. Visit [AmerenMissouri.com/hvac](http://AmerenMissouri.com/hvac) for full program details. For new construction projects that do not involve replacing systems, please refer to the Heating and Cooling program new construction rebate chart for program details.

†Ameren Missouri does not promote fuel switching or load building. The intent of these rebates is not to incentivize customers to use a different fuel source but to provide a portion of the cost for a more efficient unit once a fuel source has been chosen.

## General Eligibility Information

- The equipment or service must meet the program's eligibility requirements listed here to qualify for the rebate. **Please confirm the eligibility of your system with a participating contractor.**
- The dwelling must be associated with a current Ameren Missouri residential electric account.
- To be eligible for participation in the program, the dwelling unit must be one of the following:
  - Single-family residence
  - Multifamily building with four units or fewer, in any configuration
  - Row house, which is defined as a single-family dwelling unit that shares common vertical walls only with other single-family dwelling units. Multistory, multifamily dwelling units with greater than four units that also share a horizontal surface (floor or ceiling) with another dwelling unit do not qualify.
- A participating contractor must be used to install qualifying equipment or perform the Tune-Up Plus Ameren Missouri Efficiency Analysis, and that contractor must be participating at the time of installation or service. Participating contractors can be located by visiting [AmerenMissouri.com/hvac](http://AmerenMissouri.com/hvac) or calling 1.877.215.5752. When you call the participating contractor, mention that you are interested in Ameren Missouri rebates.
- All rebate applications and supporting documents must be submitted by a participating contractor within 30 days of installation and by February 15, 2019.

## New Equipment Rebate Eligibility

- Newly installed equipment must meet or exceed the Seasonal Energy Efficiency Ratio (SEER) or Energy Efficiency Ratio (EER) levels set forth by the program and documented by the Air-Conditioning, Heating and Refrigeration Institute (AHRI).
- Receipt of a Tune-Up Plus Ameren Missouri Efficiency Analysis after January 2, 2013 does not affect eligibility for new equipment rebates.
- Existing operating CAC and ASHP being replaced must have a SEER rating of 12 or lower.
- Existing operating GSHP being replaced must have an EER rating of 12 or lower (partial cooling load).
- Rebate eligibility is dependent on the existing heating source. Please see the chart below for eligibility.

Does your house have an:	Then you may qualify for these program rebates*:			
	Air Conditioner	Air-Source Heat Pump/Ductless	Dual Fuel Heat Pump	Ground Source Heat Pump
Air Conditioner With Gas Furnace?	Yes	No <sup>†</sup>	Yes	No
Air Conditioner With Electric Furnace?	Yes	Yes	No	Yes
Air-Source Heat Pump With Gas Furnace?	No	Yes	No	Yes <sup>‡</sup>
Air-Source Heat Pump With Electric Strip Back-Up Heat?	No	Yes	No	Yes <sup>‡</sup>
Ground Source Heat Pump?	No	No	No	Yes

## Tune-Up Plus Ameren Missouri Efficiency Analysis Rebate Eligibility

- Tune-Up Plus Ameren Missouri Efficiency Analysis must be completed by a participating contractor who has participated in a tune-up-specific training course offered by the program.
- Each HVAC system is only eligible for one tune-up-related rebate over the life of the system. Therefore, a system is not eligible to receive the \$75 Ameren Missouri Efficiency Analysis rebate if an Ameren Missouri Diagnostic Tune-Up or Tune-Up Plus Ameren Missouri Efficiency Analysis rebate has already been issued for that system since January 2, 2013.
- The existing system must have a rated cooling capacity of at least 1 ton through 5 tons to be eligible for a Tune-Up Plus Ameren Missouri Efficiency Analysis rebate.
- Receipt of a Tune-Up Plus Ameren Missouri Efficiency Analysis rebate does not affect eligibility for new equipment rebates.
- The Ameren Missouri Efficiency Analysis must be performed along with and at the same time as a tune-up service from a participating contractor.
- Repairs to the system may incur additional charges from the contractor. The customer is responsible for the cost of the tune-up to the contractor, as well as any additional charges associated with the test or additional repairs needed to the system.
- Customers should ask for the Ameren Missouri Efficiency Analysis when the appointment is scheduled for their tune-up with the participating contractor to make sure they are eligible to receive the service.

\*Some restrictions may apply. Valid through February 15, 2019. Visit [AmerenMissouri.com/hvac](http://AmerenMissouri.com/hvac) for full program details.

<sup>†</sup>Available only in a dwelling unit with existing gas heat, but where there is no existing ductwork to the space to be conditioned by the Ductless Air-Source Heat Pump and where installation of a properly sized ducted system to that space is cost prohibitive.

<sup>‡</sup>Existing equipment must be operating at time of replacement.
