

COVID-19 UPDATE

Absolute Air Services, like many of you, had hoped that we would be past the COVID-19 pandemic by now. Since that is not the case, we wanted to update you on our continued and ongoing efforts to keep both you and our employees safe. We continue to follow all CDC guidelines for mask wearing, hand washing and sanitizing, social distancing and ongoing cleaning of our facilities and vehicles.

Our business office is open with limited visitor access. We require masks and we are taking temperatures upon entry. From the beginning last year, our services and employees were deemed as “essential” by our state agencies and we have continued to lobby for our employees to be included in the Phase 1B Vaccination group. We are hopeful that vaccination can commence soon.

In the meantime, thank you for your business, your patience and you following COVID-19 guidelines when our employees are in your home. We do anticipate that we may have to reschedule your maintenance or service visits should we experience any COVID-19 issues and do so with only your safety in mind. We thank you in advance if you are affected by this.
