

## Is RGF's PHI-Cell® and REME HALO® Ultra Violet technology effective at reducing COVID-19?

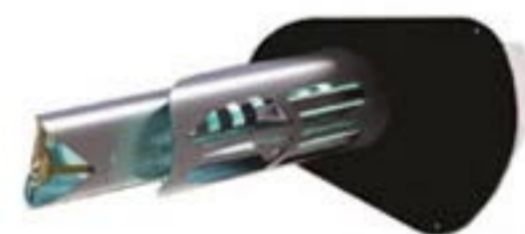

COVID-19 is a member of the enveloped RNA coronavirus (subgenus sarbecovirus, Orthocoronavirinae) subfamily. While RGF® does not have testing specifically on COVID-19, we have validated test results showing 99+% reductions on similar viruses. These viruses, like COVID-19, are also 'enveloped' or protein jacketed virus types. If we can reduce these virus types, an assumption could be made that we would also be effective at reducing the current coronavirus at hand.

Contact **ADVANCED HEATING AND COOLING** for pricing and/or additional details at **585.381.2590** or [miked@advancedheating.co](mailto:miked@advancedheating.co)

**GOOD: Fresh-Aire UV APCO** Indoor air pollution is often five times worse than outdoor air pollution. The unique design of APCO® addresses both biological and chemical contaminants in indoor air. APCO® is especially effective against potentially toxic Volatile Organic Compounds (VOCs) which are the source of nearly all bad smells. APCO® also sterilizes microbes as they pass by in the air stream. The result is cleaner, healthier, fresh smelling indoor air.

**BETTER: REME HALO® Whole Home In-Duct Air Purifier** The award winning REME HALO® whole home in-duct air purifier is the next generation of indoor air quality (IAQ) technology and capable of purifying every cubic inch of air that your central air conditioning system reaches. Designed to eliminate sick building syndrome risks by reducing odors and air pollutants, the REME HALO® whole home in-duct air purifier is the best solution for whole house and building air purification. Invented to recreate nature's process of purifying the air, it's like bringing fresh outdoor air inside without ever having to open your windows. And it's effective against all three categories of indoor air pollutants: Particulates, Microbial and Gases. You can now reduce common allergy triggers from particulates such as pollen, mold spores, dander and dust. Thoroughly tested on airborne and surface bacteria & viruses, such as MRSA, e-coli, and Norwalk, to name a few. **PROFESSIONAL RECOMMENDATION**

**BEST: The HALO-LED™** is the industry's first LED in-duct, whole home air purification system that is both mercury free and zero ozone compliant. The HALO-LED™ proactively treats every cubic inch of air conditioned space, reducing airborne and surface contaminants and pollutants through bi-polar ionization and revolutionary, patent pending, REME-LED™ technology. Reduces airborne and surface microbials, bacteria, viruses, and mold. Reduction of smoke, odors, VOCs, allergens, dust, and airborne particulates.
