

The leader in ductless is also the leader in wireless controllers.

Now it's even easier to meet your customer's comfort needs the ductless way — with the first Mitsubishi Electric Controller powered with **RedLINK™ Wireless Technology**. Available exclusively on our INVERTER-driven residential M-Series systems.

- Controls up to 16 RedLINK™ enabled zones in the home
- Installs anywhere with wireless ease and flexibility
- Backlit, easy-to-read display looks like traditional wall-mounted thermostat
- Monitors outside air temperature and humidity (with optional Outdoor Air Sensor)
- Does not interfere with other wireless devices
- Enabled with HVAC-specific RedLINK™ wireless technology

RedLINK™ and RedLINK™ wireless technology logo are a trademark of Honeywell International
